Found Valuable Pearl.

A negro pearl hunter the other day found a pearl weighing 47 grains in the waters of Lake Bioteneau, near Shreveport, La., said to be one of the largest gems of its kind in the United States. The finder sold it in Shreveport for \$250, and the purchaser in turn received \$1,500 for the stone. The second owner was a merchant, but the third a professional pearl buyer. This last values the gem at \$1,000.

Ginseng.

The light yellow root of ginseng is highly esteemed by the Chinese as a stimulant. It is used, however, for almost every domestic and medicinal purpose, and specimens resembling the human body often command their weight in gold because of supposed occult virtues. China furnishes almost the sole market for ginseng.

Use of the Horse.

Owing to the advancement of science it would be possible to get along without horses now. If it were not for the necessity of having a few of them at the annual horse shows.

Amateur Hunter Again.

Week-End Sportsman—"I just shot a deer, old chap!" His Pal—"Gee! Kill him?" Week-End Sportsman—"I think not. He shot back!"—Puck.

Sure Thing.

Joy riding is no longer risky; it's a dead certainty.—Baltimore Evening Sun.

Bees and Cranberries.

Cranberry producers at Cape Cod are calling for colonies of bees in order to make their plants more productive, practical tests having established that the activity of the bees in carrying pollen from plant to plant is a means of materially increasing the yield of this Cape Cod staple.

Pettis' Eye Salve FOR EYE ACNES

Moral in Evolution.

The history of evolution is one long record of victory in the face of apparently insuperable obstacles. Man is man because he is ever doing the impossible—or that which seems such to weakness and folly.—Rev. W. E. B. Monks.

The Millennium.

There can be no industrial peace until labor and capital have attained to the very highest pinnacle of intelligence and undiluted justice and until there is self-conviction on the part of both that they must deal justly with each other.—New York Tribune.

FASHIONS IN FROGDOM.

Dot—What's the difference between a frog and a tadpole?
Dash—The tadpole wears a hobbie skirt, and the frog wears a harem skirt.

JAPANESE FROG IS AMUSING

Made Out of Stiff Piece of Cardboard, With Thread Attached, It Jumps About Gayly.

If you have a little Japanese boy or girl you would know all about the green paper toy frog, and you would probably think it one of the liveliest and most entertaining of all your toys. One of the most pleasing things about this quaint little creature is that you can make it yourself. To do this cut a piece of tough paper into the form of a square, a good deal larger than you expect the frog to be. Draw lines from corner to corner of the square, and from side to side at the middle. Now fold the paper along the diagonal lines, then turn it over and fold along the lines from the sides. This will give you a sort of box, which you break in the center along the folds, thus making a triangular figure, with the folds sticking up like pyramids. Next grasp the paper below the end of the pyramids and fold it backward so as to make two regular and equal points. When this is done to each of the eight pyramids the result will be a diamond, with a smaller diamond in the center. Fold each one of the pyramids again so as to get all the points

A Japanese Frog.

around the center and as even and equal as possible. Now turn the upper points out to form the fore legs and the lower points to form the hind legs and your frog is completed. A fine thread attached to a frog's body at one end and a pole or cane at the other will make it easy for you to set Mr. Frog to jumping about gayly. The accompanying illustration shows how the frog looks when completed.

OLD TOM STILL IS FAVORITE

Small Boy Felt Exceedingly Sorry for Little Rooster, but Latter Took Care of Himself.

He was a very big white rooster, and, as he belonged only to Willie, why, of course, there never was quite such a wonderful rooster in the world before. At least Willie thought so. One day Willie's papa brought home a new rooster, and when Willie saw him he really felt sorry for him, because he was such a very little rooster by the side of old Tom that Willie felt quite sure Tom would not let him stay in the barnyard.

But the new rooster did not feel the least bit afraid of Tom, even if he was big, and walked right up to him, looking very much as if he would like to fight. And then what do you suppose old Tom did?

Well, he just turned and ran as fast as he could across the barnyard, with the new rooster close behind him.

You may be sure Willie's face looked very serious for a moment, but it suddenly brightened up as he exclaimed:

"Well, papa, old Tom can run the fastest, anyway."

And so old Tom is still a wonderful rooster, Willie thought; but papa only laughed very hard.—Youth's Companion.

How Alligator Got His Name.

When the Spanish discoverers first saw the American crocodile, now known as the alligator, they were so astounded and impressed by its size that they called it "el lagarto." "Lagarto" means lizard and "el" means "the." The Spaniards laid especial stress upon the first word to signify that it was the king of its kind—"the" lizard. When Sir Walter Raleigh sailed up the Orinoco river the natives still called the reptile "lagarto" and he used the word in his book, "Discovery of New Guiana." His English sailors called the name, and never having seen it written, they soon began to transform it by mispronunciation. "El" became "all," and when Ben Johnson had occasion to write of the creature he used "aligarta." "Gator" is a much readier word for English tongues, and it was not long before the transforming process worked out "alligator." Then the dictionary makers pounced upon the word and put it away in their books, where it is likely to keep a permanent place, even though "el lagarto" itself become extinct.

KEEPING SWINE HEALTHY IS OF THE UTMOST IMPORTANCE

There is No Theme Upon Farm That Will So Benefit Farmer as to Keep Quarters and Surroundings in Sanitary Condition Where Hogs are Kept—Guard Against Cholera.

A Desirable Hog Cot.

(By GEORGE W. BROWN, Ohio.)

There is no theme upon the farm that will so benefit the farmer as to keep the quarters and surroundings of the farm in a sanitary and healthful condition where swine are kept.

Nowhere will an outbreak of cholera become so disastrous as upon the farm where these animals are kept with dirty, filthy surroundings, and no care taken in the disinfection of the nesting places and slop troughs during the summer time.

Upon our farm we have never practiced the method of keeping a herd of swine in one place very long, and never do we fatten out more than one bunch of animals in the same field in one year, preferring rather to shift our operations about from place to place.

We have no permanent quarters, but rely upon the service of the cot, shown in the illustration.

These bunks can be shifted about easily upon runners, and many times each year are changed from one field to another, or from one pen to another, thus we always have the animals in fresh sleeping quarters, and upon fresh forage. While the animals are located upon a new range, we break up the old range, cropping it in some profitable farm crop, thus getting the benefit of all excrement from the animals, profiting in its enrichment of the soil, and we as well freshening and sweetening the soil by cultivation.

Then swine should be supplied with some shade aside from a board shelter to ward off the heated rays of the summer sun. There is nothing for this purpose quite so nice as clumps of willows, catalpas or poplars grown in some convenient location in each field, preferably along the fence row, in such manner that the animals may have access to the cooling shade during the heat of the day.

USEFUL GUARD FOR A WINDOW

Missouri Man Has Invented Gate That Will Be Found Convenient for Variety of Uses.

The door and window guard patented by a Missouri man has a variety of uses. It comprises a gate made of parallel pickets linked together by short cross bars and sliding easily back and forth on rollers. It can be

Door and Window Guard.

folded up into small compass against one side of the opening it guards, or stretched all the way across and made fast. The uses to which such a

PROPER PLACE FOR CHICKENS

Should Not be Allowed to Roost On Top of Harness or Buggy—Should Have Good House.

One of the most important things in the care of laying hens is the house that they are to live in. On most farms it used to be that the hen roosted any old place, and her favorite place was on top of the harness or buggy. And when they could not reach their favorite place, they took to the trees, but I can say that the hen's life on the farm has changed, for now you see nice houses and yards for them, says a writer in the Successful Farmer.

A good poultry house may be defined as one that is dry, warm and ventilated, and fitted to accommodate the kind of fowls that is to be kept. A stationary house suitable for any kind of fowl may be built of stone or brick, but the best house is built of

PLAIN REASONS WHY THE WINDS BLOW.

Astronomers and other scientists have not yet succeeded in ascertaining just how far the atmosphere of our earth extends above the land and the sea on which it rests, but some of them hope to some day soon. The Astronomer Royal of England, who has completed his report for the fiscal year ending May 10, tells some very interesting things about the varying densities, altitudes and temperatures of the air cushions, air pockets and air currents surrounding the earth.

In reference to air currents and the reasons why the winds blow, the report explains that air consists of gaseous particles, all trying to get away from one another, and that, under certain conditions, they can be compelled to come closer together by contraction, or forced to fly further apart by expansion. A quart bottle, for example, holds 22 grains of air at the temperature of 70 degrees. If the bottle be cooled by surrounding it with ice, the air inside contracts. When this occurs, more air rushes in through the bottle's neck. The quart of air now weighs more than 22 grains. If the bottle be heated, the air it contains expands, its tiny particles fly further asunder, and many of them escape from the bottle altogether. There is still a quart of air, but it weighs much less than the original 22 grains.

Now, consider the earth and the sea under the influence of varying degrees of the sun's heat. Where the heat is greatest, the air is made lighter and expands. Where the heat is least, the air is unexpanded and heavy. Both the hot and the cold air have weight, but the cold, being the heavier, is drawn more effectively down to the ground. In doing so it drives the lighter air up out of its way, just as a lump of lead dropped into a pall of water forces some of the water upward. If the earth were equally warm at every part, and continued at a constant temperature, wind could not exist. It "blows" because of heat and gravitation. In other words, air moves from the place where its weight or pressure is most, toward the place where its weight or pressure is least.

Disaster. In all its forms, among all ages of horses and dogs, cured and others in the same way discovered from having the disease with Spohn's Distemper Cure. Every bottle guaranteed. Over 500,000 bottles sold last year. \$2.50 and \$1.00. Good druggists, or send to manufacturers. Agents wanted. Write for free book. Spohn Med. Co., Spec. Contagious Diseases, Goshen, Ind.

Light on Ancient Days.

Until recently the exploration of the Sudan was impossible, owing to the attitude of the natives, but last year the excavations of Meroe, the ancient capital of Ethiopia, was commenced. Perhaps the most important result of the early work will be the addition of Ethiopian to our knowledge of languages which have ceased to exist. A large number of inscriptions in hieroglyphic and cursive writing have been found, and it has been discovered that the unknown language is based on an alphabetical system—a circumstance which will make the deciphering of the inscriptions much easier than was the case with the Hittite language, which has occupied Professor Sayce 30 years.

Not a Landseer.

"Is that a Landseer, Mr. Croesus?" asked a visitor, pausing before a painting of a cow, executed with great skill and fidelity. "No," replied the host. "Reckon it's a Durham. See how broad it is between the horns, and see the color and curl on its forehead. That's a genuine Durham, sure. That ain't no Landseer."—Youth's Companion.

If you use Eye Salve use the best. PETTIS' EYE SALVE is the standard, reliable and costs no more than inferior goods that are unknown. Used by Physicians and Oculists, helps where all others fail. It is not the TUBE or BOX that cures, it is the SALVE that does the work. Guaranteed by Howard Bros. under the Government Food and Drugs Act. Don't be deceived or misled. The only really antiseptic Eye Salve that has been in the market for years. Sold by Druggists throughout the known world.

Guard Against Unfortunables.

About 250,000 immigrants are turned back every year by the immigration officials of this country. To guard the ports and boundaries against those whom the law forbids entry, the government employs nearly 2,000 trained men.

No Hope.

"Well, how are you getting on with your admirer, Alice?" "Oh, I have given up all hope now. We got stuck in an elevator for three hours yesterday and even that didn't make him propose."

Doubtful.

It is possible there may be a funnier sight than a dignified man with a long nose, an undershot jaw and bushy whiskers, trying to get a full drink at a bubbling fountain, but we doubt it.

Do Away With the Blues.

Well, now, when all is said and done, after you recovered from that last fit of blues, did it do you, or anyone else, any good to have it? Make that last fit the last one.

The Alarm Clock.

The devil was asleep when man was made, but he awoke before woman was completed.—Life.

MEXICAN MUSTANG LINIMENT

For Sprains and Bruises. B. Street, Cedarville, Cal., writes: "I have used Mustang Liniment a number of years on stock for cuts, sprains, bruises, etc., with best results. The boys on the ranch here use it for rheumatism, lumbago, sprains, cuts and burns with the most satisfactory results. In fact we use it on man or beast as the best remedy we know of." 25c. 50c. \$1 a bottle at Drug & Gen'l Stores

Swindlers Prosecuted.

The mayor of New York is vigorously prosecuting swindlers who sell short weight potatoes. The law requires the barrel of potatoes to contain 100 quarts, and to weigh 174 pounds, but most of the barrels in use are short from 20 to 50 pounds.

Write for free color card and shoe catalogues in the world. Illus. Catalogue Free. W. L. DOUGLAS, 145 Spruce St., Brockton, Mass.

THE USE OF THE COMMA.

The point on which most writers are at odds with the compositor is the comma, says the London Chronicle. It is not that he misplaces it so outrageously, as in that sentence which was the cause of many tears in a Berlin newspaper office some years ago: "Prince Bismarck walked in on his head, the well-known cap on his forehead, large, brightly polished top boots on his forehead, a dark cloud in his hand, the inevitable walking stick in his eye, a menacing glance."

No, but he is too fond of this particular punctuation point. He takes a delight in breaking up the flow of sentences with his artificial pauses. We all say: "Why then did you do it?" in one breath. It is the compositor who says, "Why, then, did you do it?" It is possible to be too hard on the comma. It has its undeniable uses.

Free to Our Readers. Write Murine Eye Remedy Co., Chicago, for 48-page illustrated Eye Book Free. Write all about Your Eye Trouble and they will advise as to the Proper Application of the Murine Eye Remedies in Your Special Case. Your Druggist will tell you that Murine Relieves Sore Eyes, Strengthens Weak Eyes, Doesn't Smart, Soothes Eye Pain, and sells for 50c. Try It in Your Eyes and in Baby's Eyes for Sore, Itchy, Red and Irritated Eyes.

CHRONOLOGY OF INVENTIONS.

Barometers were first made by Torricelli in 1642. Bombshells were first made in Holland in 1498. The first almanac was printed in Hungary in 1476. Iron rivements were first laid in London in 1817. Buckles were first made in 1680. Brandy was first made in France in 1310. Roller skates were invented by Plympton in 1863. Covered carriages were first used in England in 1580. Alcohol was discovered in the thirteenth century. Stem winding watches were the invention of Noel in 1851. The first tin wire was drawn at Nuremberg in 1851.

AVOID LIQUID BLUING.

The reason so many housewives prefer RED CROSS BALL BLUE is because it is all blue. Liquid blue contains a large percentage of water. Why buy water when you have it by the tub full? Buying solid RED CROSS BALL BLUE is real economy. Dissolve it as you need it. A large four-ounce tin contains all blue for 10c. Used in thousands of homes. FOR SALE AT ALL GROCERS.

Childish Beliefs.

Yes, children believe plenty of queer things. I suppose all of you have had the pocketbook fever when you were little. What do I mean? Why, ripping up old pocketbooks in the firm belief that bank bills to an immense amount were hidden in them. So, too, you must all remember some splendid unfulfilled promise of somebody or other, which fed you with hopes perhaps for years, and which left a blank in your life which nothing has ever filled up.—Holmes.

Recognizing People.

Data have been gathered in Germany with reference to the distance at which persons may be recognized by their faces and figures. If one has good eyes, the Germans claim, one cannot recognize a person whom he has seen only once at a greater distance than 82 feet. If the person is well known to one, one may recognize him at 300 feet and if it is a member of one's family, even at 500 feet.—Scientific American.

Inflammatory Rheumatism may make you incapable for life. Don't test for inflammation to set in. When the first slight pains appear, drive the poison out with Hamlin's Wizard Oil.

Hose or Hosiery.

A New Rochelle whose yard needed fall attention, called at the hardware department of a New York store. "I am in need of some lawn hose," he said. "Try the hosiery department, second floor," responded the young lady in charge.

Fond of Walking Sticks.

Of all people perhaps none is more fond of canes or more skilled in their use than our fellow citizens of Porto Rico. The walking stick in that island would seem to mark social distinctions among men as fans do among women.

FILES CURED IN 2 TO 14 DAYS

Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Files in 6 to 14 days. 50c.

Practically Indestructible.

A flight of stairs has been erected in Paris over which 14,000,000 persons have passed without so much as scratching the surface. These steps are almost imperishable, for in the concrete of which they are constructed a generous proportion of carborundum has been introduced, and since carborundum is almost as hard as the diamond, it has given the concrete a wearing quality which no marble or granite could possibly approach.

Origin of the Bath Towel.

A towel manufacturer found that his machinery was not working right and that his towels were suffering a vast tangling of the threads. While adjusting the machine he used one of the damaged towels to dry his hands. He found it pleasantly absorbent, and from the idea to which that gave rise was born the bath towel and a fortune to the patentee.

Explanation of Colors of Leaves.

In extremely moist atmosphere the color of the leaves are not usually very bright, as in England. And in very dry climates the leaves dry up suddenly, and their skin, which is very thick to prevent the escape of moisture, is not sufficiently transparent to allow the color to be seen beneath. In regions where the autumn foliage is most vivid we find that an average season produces the most exquisite colors. Neither a very dry nor a very wet summer will result in much brilliancy.

BE FAIR WITH YOUR STOMACH
