

It is well to note that more than expected interest is being manifested in the O. W. R. & N. company's Corn Show, which is to be held in Pendleton next month.

The blare of trumpet which is sounding the return of Mr. Worcester from the Philippines is so much in tune with that of Harry Lane Wilson that one is apt to become confused, but not to the extent of not recognizing the sensible sonnet of profound judgment exercised by the administration.

What will the Oregonian and Cartoonist Reynolds have to work on after the administration gets through with Huerta and Mexico, is the wonder of the average reader. Just what the Oregonian would advise in settling the Mexican question is hard to discern.

The stock of the regional banks of the new currency system will be owned by the public, and regional banks will be controlled by the government. The senate banking committee at Washington incorporated that feature in the administration currency bill by a vote of 7 to 5.

The tail of the great Eastern storm of last week is lashing us, but the lashings are tempered with the mild wand of climatic favoritism. And, as usual, we of the Pacific coast will get off with lighter fuel bills and less suffering than our brothers to the eastward.

The interstate commerce commission's order reducing express rates was again extended to February 1, to give the companies more time to arrange for the change. It was to have been effective on December 1 and has been postponed once before.

The war department at Washington has placed at the disposal of the interior department a military force sufficient to handle the threatened outbreak of Indians on the Navajo reserve. Who said the red man had quit fighting?

The Massachusetts republicans put up two so-called republicans for the governorship with the idea, perhaps that they were as good as one democrat. They got fooled. One was a bull moose and the other a progressive.

The Washington administration is hoping Huerta will get so short of money as to be compelled to get out without the help of U. S. soldiers.

Roosevelt will probably have all the delegates from the South and Central American states at the next national republican convention.

Minneapolis is having trouble with her milkman. Something has gotten in her milkyway—something in the way of dirt.

All government should be run economically and with no more expense than necessary. Oregon is no exception.

A DARING BASE RUNNER.

One of the Desperate and Winning Chances Mike Kelly Took. Hugh S. Fullerton, the baseball writer for the American Magazine, tells a story about Mike Kelly, the famous player of Boston and Chicago, a generation ago, as follows:

"I believe the most desperate and brilliant bit of base running I ever witnessed and the climax of taking chances was by Kelly. The score was a tie late in the game. Runners were on second and third bases, one out, and the opposing infield was drawn in to cut off the runner from the plate. Kelly was the man on second. The ball was pitched toward third. The ball was hit sharply to the shortstop, who scooped it perfectly and threw home. The runner going from third slid desperately toward the plate, where the catcher was waiting. Kelly had rounded third base at top speed and was coming up the path behind the other runner, screaming 'Look out for Kell' at the top of his voice. As the runner from third slid behind the plate, trying to get past the catcher, he was tagged out, but before the catcher could touch him and dive back to protect the plate Kelly slid in front of the rubber, dodged under the catcher and scored the winning run."

Stormy Cape Horn. The waters of Cape Horn have never been visited by storms for more than a week or two at a stretch within the memory of man. Standing on the outposts of the world, Cape Horn is the meeting place of ocean currents of very different temperature, from the icy cold waters of the Antarctic drift to the warmth of the Brazilian and Peruvian return currents.

The prevailing winds are from the northwest and west, and these, coming from the warm regions of the Pacific, condense into fogs, which the sailors call "Cape Horn blankets" and which are the forerunners of storms. The extremely low level to which the glaciers of Tierra del Fuego descend, the perpetual congelation of the subsoil, the meeting of conflicting winds at very different temperatures, are all direct or indirect causes combining to make this the most constantly stormy region of the world.

Poor Man. "Is the man your sister is going to marry rich?" "No. Every time the marriage is mentioned he says, 'Poor man!'"—Houston Post.
