WOODBURN NURSERIES

Cost of Maintenance.

Beef cows that are not suckling calves may be wintered on sllage alone if the silage is good, without any hay, says the Breeders' Journal. They are the better for a little straw and a pound or two of cottonseed meal per day. Cows of this kind will day and the cost of their keep will vary according to the cost of silage and the length of the period between old and new grass. Anybody can figure this out according to his climate, cost of silage, other feeds and graz-ing, and see whether he can afford to raise cattle on his farm. What does it cost to keep a beef cow per year in your locality? Can you afford to raise steers? A little discussion of this point would be helpful to friend.—Chaucer. a great many people.

BENEFIT BY USING CONCRETE

Farmer Adds Both Comfort and Safety, Besides Saving Money-Cem-

(By WALTER B. LEUTZ.) Safety, economy and utility are the prime considerations in silo building and on all of these points farmers are finding themselves gainers from the use of concrete. Concrete structures are much safer and in the long run are more economical. The original cost is about the same as for silos of other materials if the farmer is able to do the work with his regular force. When the durability and lessened risk are considered it is seen that the con-Washington, D. C .- The Lincoln crete construction is economical in

Concrete Trough for Stock.

supervise it, the outlay for any given piece of work will probably be less than it would be if lumber were used. The proportion of cement required is not a large item of expense.

The farmer also gains in the matter of insurance as he goes forward with his experiments in concrete construction. This is an important consideration, and he adds both comfort and safety, besides saving money.

HOW MUCH WILL SILO HOLD?

Amount Can Be Closely Calculated Provided Number and Kind of Animals Are Known.

(By A. D. WILSON.) the size of silo needed to hold it can the country. be quite closely calculated provided the number and kind of animals to be fed from it are known before build-

An average cow or beef animal may be fed about thirty-five pounds of silage per day and the usual period a continuous sinking. — George Macand chicken. Serve in slices, with where but what has its living example cottage cheese between. Cut nice tomatoes in half and put cheese flowedy to-day, and if your case is stubborn animals or those that are being fattened may consume considerably Co., 160 Swift Bidg., Atlanta, Ga. Their medical laboratory is famous and is conducted by renowned experts in blood and but this has been found a fair aver-

> In a silo of ordinary depth, the average weight of the silage is about forty pounds per cubic foot. Near the top of the silo, however, where the only twenty-five pounds per cubic foot while at the bottom of a thirty-five foot sile it may weigh sixty pounds. Taking these averages, if a cow eats thirty-five pounds of ensilage in a day, she will eat thirty-five fortieths, or seven-eighths, of a cubic foot per day, and with this as a basis it is easy

A silo ten feet in diameter is adaptteen head, and one fourteen feet in diameter will meet the needs of twenty head; but if there are thirty or more cows to feed, a sixteen-foot silo should be erected. These siles should be thirty or forty feet, or even more

SOME GOOD POULTRY DON'TS

Particular Attention Should Be Paid to Drinking Fountains and Character of Feed.

Don't let the drinking fountain sit in the sun, for if you do your poultry Tells How She Was Restored will surely get diseased.

Don't feed sour and unwholesome food, because if you do the fowls will have indigestion and liver trouble. Don't forget to provide shade for the poultry, the scorching hot sun will be sure to make the hens sick. Don't keep the males in the same

badly during summer as they do in

Don't forget to bury any fowl that' chances to die. Disease is spread through a whole flock by allowing a decaying carcass to lie around. Don't wait till fall to sell all surplus stock. Now is the best and nost profitable time.

Don't throw duck feed in the filth.

Feed in troughs, and only what can be eaten clean. Take out whatever is the liver that has become lazy left over. Keep ducks in good appeleft over. Keep ducks in good appetite. The duck has no crop like the chicken. Therefore soft foods are done for me. I suffered with such aw-

HAMMERLESS REPEATING SHOTGUN The Model 1912 Winchester is the lightest, strongest and handsomest repeating shotgun on the market. It weighs only about 5% pounds, yet it has great strength, because its metal parts throughout are made of nickel steel. It is a two-part Take down, without loose parts, is simple to operate and the action works with an ease and smoothness unknown in guns of other makes. See one at your dealer's or Send to Winchester Repeating Arms Co., New Haven, Conn., for circular. THE LIGHT WEIGHT, NICKEL STEEL REPEATER.

Middle Age Mortality.

Putting Pigs on Grass. When pigs are six weeks old they Insurance men are noting an increasing middle-age mortality. In this country it has increased 20 per cent in thirty years. In England it cold and ground wet, keep them in

Success depends largely upon Good Health

In your race for success don't loose sight of the fact that only through good health can you attain success. The tension you must necessarily place upon your nerves, and the sacrifice of proper exercise you have to make at times must be balanced in some way.

Dr. Pierce's Golden Medical Discovery is the balancing power-a vitalizing power. It acts on the stomach and organs of digestion and nutrition, thus purifying the blood and giving strength to the nerves, indirectly aiding the liver to perform its very important work. Dr. Pierce's Golden Medical Discovery has been successful for a generation as a tonic and body builder.
