

## Foss-Winship HARDWARE Company

### Sell Superior Ranges

The World Leader Since 1837

In Barrett Building, Athena, Or.

So many of our friends have asked us: "What is the meaning of

### "TUM-A-LUM"

that we are going to explain the origin of the word. Like a good many words in English, "TUM-A-LUM" is derived from a great many languages. Originally, from the CHINOOK INDIAN meaning "SCATTERED WATERS" "TUM-A-LUM" has come to mean:

- IN FRENCH, "TO EXCEL."
- IN DUTCH, "HANDLING THE BEST OF GRADES."
- IN GERMAN, "SERVICE."
- IN IRISH, "QUALITY."
- IN SPANISH, "THE BEST FOR THE MONEY."

Put all of the above meanings together and you have the meaning of TUM-A-LUM in ENGLISH. But in the language of Athena, TUM-A-LUM stands for THE UP-TO-DATE LUMBER YARD.

A fine lot of Screen Doors on hand.

### The Tum-a-Lum Lumber Company

"See A. M. JOHNSON about it."

## THE ATHENA MEAT MARKET

## ORDINANCES WILL NOW BE ENFORCED

### CURFEW WILL RING-COW, HOG AND CHICK REGULATION.

### Engine and Pump To Be Installed At New City Well for Emergency Use.

Hereafter the ordinances relating to curfew regulations, and running at large of chickens and live stock within the corporate limits of the City of Athena are to be rigidly enforced. City Marshal Gholson received instructions to this effect at the meeting of the council, Monday evening.

Hereafter the curfew bell will ring at 9 o'clock p. m., when children within the age limit provided in the curfew ordinance must be off the streets.

Those keeping hogs within the city limits will remove them at once. Hereafter no cows will be permitted to be picketed on the streets, in alleys, or allowed to run at large, and owners of chickens must keep their fowls in an enclosure on their premises.

Failure to comply with these provisions will make the violator subject to fine as provided by ordinance.

The vote of the recent city election was canvassed at the meeting Monday evening and E. E. Koonz, mayor; Henry Dell, W. P. Littlejohn, Homer I. Watts, councilmen; V. C. Burke, treasurer and B. B. Richards, recorder, were declared elected and were sworn into office.

The application of James Stewart for permission to erect a frame building covered with corrugated iron on the North side of Main street, between Second and Third, was refused.

Councilmen A. B. McEwen, N. A. Miller, and W. P. Littlejohn were named as a committee to have charge of putting in the drainage system leading from the brick buildings on Main street, between Second and Third.

The water committee was instructed to secure an engine and pump to be installed at the city well at the head of the water system, which is to be used during dry seasons as an auxiliary to the present gravity system.

The city treasurer was instructed to issue a call for redemption of \$9000 of city warrants in consecutive numbers applying alike to city and water scrip.

The following bills were allowed, and warrants ordered in payment of the same:

W. J. Gholson, salary	\$75.00
Fred Hummel, salary	65.00
B. B. Richards, salary	27.00
V. C. Burke, annual salary and stamps	50.60
J. F. Wright, team	1.50
Athena Press, ballots	5.00
W. P. Littlejohn, street work	2.00
Dell Bros, paper groceries	5.45
Mill Co. lights	65.00
Burke & Son, cartage	9.00
F. S. LeBrow, refund	3.00
<b>Total</b>	<b>\$309.45</b>

### Cattle Range High.

The week started off with a big run at the Portland yards, which is now the customary thing for Monday, the arrivals being in excess of 8000 head. The demand was more than equal to the liberal offerings, and a firm market was the result, with prices showing an upward tendency. The feature of the day was the activity in the cattle division. About 60 loads of steers were sold and prime stock ranged high. Fifteen cars brought better than \$8, two extra fine loads going at \$8.20 and \$8.25, and nine loads selling at \$8.10. The bulk of steer sales were from \$7.75 to \$8.10.

### Wool Buyers Ready.

This week will witness the actual opening of the Oregon wool market for the current season. Buyers and manufacturers' agents are in the field in the eastern part of the state and all seem very anxious to do business. They are ready to contract for unshorn wool if growers will only set a price. It is probable the first buying will be in the Pendleton district. Shearing is now under way around Echo, and there has been some shearing in a small way in other sections. It will be two weeks yet before shearing is general in Eastern Oregon.

### Baby Chloroformed, Dies.

The death of the infant of Mr. and Mrs. Charles W. Vonderab, which occurred Saturday at the home of the child's parents in Milton following the administration of chloroform preparatory to the performance of a minor surgical operation, has been investigated by Dr. E. S. Garfield, coroner, who has decided that no inquest is necessary, says the Tribune. The child expired within three minutes after the anesthetic had been first inhaled, according to attending physicians, as quoted in Dr. Garfield's report, and they say less than a dram was used.

### A Welcome Rain.

A much needed shower of rain, which was general over the county, fell Saturday night and was welcomed by the farmers and stockmen. The month of March was the driest of any March since 1902, according to report of government observer Averil of Pendleton.

## Miss Eva Booth's Collapse Alarmed Friends and Workers

Photo by American Press Association.

**F**RIENDS and coworkers of Miss Eva Booth, commander of the Salvation Army in America, were apprehensive when she collapsed while touring New York state, and serious illness developed. Miss Booth, who gained fame some years ago for her prison work, broke down while making an address at Elmira, N. Y., and was taken to the army barracks in New York city, where pleurisy and intestinal trouble, combined with a nervous breakdown due to overwork, made her condition very serious. It was hoped, however, that she would recover.

## SALTING WILD MORNING GLORY

### Gasoline and Coal Tar Prove Ineffective as Weed Destroyers.

Henry Barrett has resorted to salt for the destruction of a couple of acres of wild morning glory on the ranch, south of town. By experimenting, he finds that salt is the only sure annihilator of this annoying weed.

He tried saturation of the soil with gasoline, then setting fire to it. After the turn over, the morning glory would grow as prolifically as before. The same result followed an application of coal tar after a torch had been applied to it.

Mr. Barrett will sow five tons of salt on his fool ground. He finds that the salt penetrates the soil to hard pan, totally destroying the morning glory. Of course the effects of the salted soil is detrimental to all vegetable growth and will remain so for three or four years or until through mulching process it evaporates, when crop resumption will take place.

In Mr. Barrett's opinion the wild morning glory is the worst of all weed pests, and he says there is more of it in existence in this vicinity than any are aware of, only those who have it on their farms. He believes there should be no secrecy in the matter, but that an open fight should be made against further encroachment. It is a hard weed to control, from the fact that cultivation scatters it broadcast over the field, to take root from every joint covered by soil.

### Greatest Flag Pole.

The greatest flagpole of Oregon, 67, which was towed to San Francisco from Astoria for the Panama-Pacific Exposition, will be set in place on the exposition grounds in the last week in May. The timber, donated by the Whitney Lumber Company and towed to San Francisco in one of the Hammond rafts, was cut in the Nehalem country. It is 248 feet long and 5 1/2 feet in diameter at the butt. It weighs 93,000 pounds and contains 23,515.46 feet of lumber. Owing to its great weight it will cost fully \$1000 to prepare the big stick, raise it and set in place. It will be the largest flag pole standing in the world.

### Store Broken Into.

The warehouse room of the Golden Rule store was entered Friday night by robbers, whose evident intention was to make their way into the store room, but brick wall and iron doors frustrated this intention. Entrance was made through the removal of a window pane, and boring a series of holes until it was possible to break a wooden cleat nailed across the window on the interior. A few pairs of silk socks was all that the robbers secured.

### Farmers Line No. 24.

Farmers Telephone Line No. 24, has recently been reorganized and a new constitution and by laws adopted. Charles Gerking is the newly elected president; Jerry Stone is vice president, and George Woodward, secretary treasurer, these officials being the managing board. The line leads from Athena, west and southwest. New poles and equipment will be installed.

## JOHNS SHOWS WHY TAXES ARE HIGHER

### LEGISLATURE ALLOWED STATE OFFICE INCREASES.

### Cost of Maintaining Attorney General Office Has Increased Nearly 270 per Cent.

C. A. Johns, republican candidate for governor gives the following in interview to a Portland paper, relative to the enormous increase in state taxes. He says:

"All over Oregon the people are deeply aroused over this question of high taxes. Wherever I went in my recent trip I found that the attention of the people is almost wholly absorbed with the question of how to raise money to pay their taxes, and they blame their troubles upon extravagant legislatures and state officials.

"Every fair minded man will concede," continued Mr. Johns, "that there should be a material increase in the state expenses for the years 1913-14 over the years 1903-4, but conceding that to be true there is no valid reason why the expenses of the office of Governor should have increased from \$11,000 for the years 1903-3 to \$25,700 for the years 1913-14, or that the expenses of the office of Secretary of State should have increased from \$24,330 for the years 1903-4 to \$68,000 for the years 1913-14, or that the expenses of the office of State Treasurer should have increased from \$10,600 in the years 1903-4 to \$35,530 in the years 1913-14, or that the expenses of the office of Attorney-General should have increased from \$7200 in the years 1903-4 to \$26,600 in the years 1913-14, and yet such are the facts as shown by the legislative records for these years.

"We find that in ten years the cost of maintaining the Governor's office has increased 150 per cent, that the cost of maintaining the office of Secretary of State has increased 180 per cent, that the cost of maintaining the office of the State Treasurer has increased 250 per cent and that the cost of maintaining the office of Attorney General has increased 370 per cent. Everywhere the people are studying these figures and to the tax payers of this state they tell a story of official extravagance that is without reason and without excuse.

"There is no valid reason why the appropriations for boards and commissions should increase from \$67,600 for the years 1903-4 to \$1,176,091.50 for the years 1913-14, and yet the legislative records show such an increase. There is no valid reason in the world why the amount of money which was required to pay the expenses of the state government should be increased from \$2,019,774.78 in the years 1905-6 to \$6,173,475.17 for the years 1913-14, yet the records of the last legislature show it to be a fact."

### U. S. District Court.

The United States District Court is in session at Pendleton, beginning Tuesday, and will continue possibly two weeks. Robert S. Bean, District Judge; Clarence L. Reames, District Attorney; E. A. Johnson, Assistant District Attorney; John Montag, United States Marshal, and Leonard Becker, Deputy United States Marshal, will be in Pendleton. Three criminal and two civil cases are on the docket.

## A WELL KNOWN EDUCATOR DEAD

### W. W. WILEY, FORMER PRINCIPAL OF ATHENA SCHOOLS.

### Died In San Diego Sunday Morning and Interment Will Be At Portland.

W. W. Wiley, one of the best known educators of the state, and former principal of the Athena public schools, died at San Diego, California, Sunday morning, after a long illness from tuberculosis.

Professor Wiley superintended the Athena schools during the year 1911-12, and his services were retained for the following school year. He began his duties on his second year, but after a couple of months, was forced to give up his work on account of ill health, and his brother-in-law, Howard Drew, the present superintendent, took his place.

Mr. Wiley went to Arizona, and later to California, where he was joined by his family.

Professor Wiley was a native of Minnesota, where his relatives reside. He was a graduate of the Monmouth normal school and served two terms as school superintendent of Tillamook county. Before coming to Athena, he was superintendent of the public schools of Newberg, Oregon. He is survived by his wife and four small children. They are left in comfortable circumstances, he having had his life insured for \$10000 after coming to this city, and he owned business property at Tillamook, which brings in a good monthly revenue.

Mr. Wiley could never reconcile himself to believe otherwise than that he was destined to recover, and only a few days before his death had partially made arrangements for the purchase of a home in San Diego, the household goods had been ordered shipped from Athena and were intercepted at Portland in transit, and transferred to the old home at Tillamook.

The funeral will take place at Portland, Sunday, to which city the remains were shipped from San Diego.

### Kaffir Corn for Hogs.

Elmer Cleaver, representative of the Western Land and Irrigation Co., has been showing a sample of kaffir corn which was grown on the Prindle place on the project under the company's ditches, says the East Oregonian. It was grown for experimental purposes only and did so well that Kaffir corn may become the staple article of diet for hogs raised in the west end. Three grains were planted to the hill and the hills averaged from 16 to 24 stalks. At this average a 100 bushel per acre yield would be a conservative estimate. It is claimed for Kaffir corn that it is 20 per cent more nutritious than wheat and is the best hog and chicken feed to be had. Inasmuch as the raising of hogs is becoming a profitable industry in the west end, the experiment may have important results.

### Church Has Commission.

The commission plan of government as applied to church matters is proving a success at the Walla Walla Congregational church. Five commissioners have charge of affairs. It is said to be the only church in the country following such a plan.

Every Good Housewife

should conduct affairs of household much the same as her husband does his business at office or store.

Keep your accounts square, mark down what you pay for every item, check up your bills and see that all goods delivered to you measures and weighs correctly

Do this, and you will find how easy it is to economize and how it pays to buy your groceries here, where prices are lowest and where short weights or short measures are unknown quantities

## FIX & RADTKE

THE "MONEY-BACK STORE" ATHENA, OREGON.
