 By Cutter's Blanking Pills. Low priced, fresh, reliable, prepared by Western stockmen because they prefer them to any other. Blanking Pills 1.50 25-dose size, Blanking Pills 4.50 50-dose size. Cutter's Blanking Pills are the only reliable, but due to over 15 years of specializing in venereal and venereal-like diseases, and are sold by
THE CUTLER LABORATORY, Berkeley, California.

BLACK LEG
 The Sunday school teacher was possessed of the praiseworthy desire to promote thrift among the class of lads. He had given Joe and Johnny sixpence each for doing some work for him.

Double His Talents.
 "I hope to hear, when we meet again," he said, "that you have used the money to advantage."
 The next time they met Joe produced two sixpences.
 "Well done, my lad," said the delighted teacher, "I am pleased to see my lessons are having their fruit. But what of your sixpence, Johnny?" said he to the other hopeful.
 "Please, sir, I lost it tiffin' with Joe!"—Chicago News.

His Chief Concern.
 Mrs. Hemmndhaw—"If another man should win me would you see him for my love?"
 Hemmndhaw—"Yes, just for spite."—Judge.

Radium Water as Beverage.
 Radium water to be used as a medicinal beverage has been introduced in Holland.

A Cheery Disposition
 is something entirely foreign to the person with poor digestion, liver troubles, or constipated bowels—but there is no need to remain in such a condition, for
HOSTETTER'S Stomach Bitters

JUDGE CURED HEART TROUBLE.
 I took about 6 boxes of Dodds Kidney Pills for Heart Trouble from which I had suffered for 5 years. I had dizzy spells, my eyes puffed, my breath was short and I had chills and backache. I took the pills about a year ago and have had no return of the palpitations. Am now 63 years old, able to do lots of manual labor, am well and hearty and weigh about 200 pounds. I feel very grateful that I found Dodds Kidney Pills and I may publish this letter if you wish. I am serving my third term as Probate Judge of Gray Co. Yours truly,
PHILIP MILLER, Cimarron, Kan.
 Correspond with Judge Miller about this wonderful remedy.

Blood Trouble Often A Puzzling Question
 The Searching Power of a Great Remedy Answers the Worst Riddle.

Thousands Have Solved It With S. S. S.

It is now known that the serum of blood disorders are found in the minute spaces of the tissue fibers. They can be seen only through a powerful microscope. And it is in these spaces that S. S. S. goes to work rapidly, effectively and with wonderful noticeable results.

This famous blood purifier contains medicinal components vital and essential to healthy blood.

There is one ingredient in S. S. S. which serves the active purpose of stimulating each cellular part of the body to its normal and healthy condition. It is a very essential nutrient. That is why it regenerates the blood supply, why it has such a tremendous influence in curing eczema, skin eruptions, all skin affections, rheumatism, sore throat, weak eyes, loss of weight, thin pale cheeks, and that weakness of muscle and nerve that is generally experienced by all sufferers with blood trouble.

Get a bottle of S. S. S. at any drug store, and in a few days you will not only feel bright and energetic, but you will be the picture of new life.

S. S. S. is prepared only in the laboratory of the Swiss Specific Co., 221 Swift Bldg., Atlanta, Ga., who maintain a very high standard of purity. Where all who have any blood disorder of a stubborn nature may write freely for advice.

S. S. S. is sold everywhere by all drug stores.

Beware of all attempts to sell you something "just good." Insist upon S. S. S.

Score One for Baltimore.
 "Not long ago," said a Washington lawyer, "I attended a trial in Baltimore, during the course of which there was summoned as witness a youthful physician.

"It was natural, of course, that counsel for the other side should, in cross-examination, seize the occasion to utter certain sarcastic remarks touching the knowledge and skill of so young a doctor.

"Are you," demanded the lawyer, "entirely familiar with the symptoms of concussion of the brain?"

"Yes, sir."

"Then," continued the lawyer, "I should like to ask your opinion of a hypothetical case. Were my learned friend, Mr. Reed, and myself to bang our heads together, should we get concussion of the brain?"

"Mr. Reed might," smiled the youthful physician.—Atlanta Journal.

Free to Our Readers
 Write Murine Eye Remedy Co., Chicago, for 48-page illustrated Eye Book Free. Write all about Your Eye Trouble and they will advise you as to the Proper Application of the Murine Eye Remedies in Your Special Case. Your Druggist will tell you that Murine Relieves Sore Eyes, Strengthens Weak Eyes. Doesn't Smart, Soothes Eye Pain, and sells for 50c. Try It in Your Eyes and in Baby's Eyes for Baby's Eye and Granulation.

Hobson to an "Anti."
 Representative Hobson was arguing prohibition with a red-faced millionaire at a tea in Washington.

"So-and-so," said the millionaire, naming a noted temperance lecturer, "drinks like a fish."

"Maybe," said Mr. Hobson. "Maybe. And do you drink yourself?"

"That's my business," said the millionaire angrily.

"But you can't say that," said Mr. Hobson. "And how any other business?"—New York Globe.

Putnam Fadeless Dyes color in cold water.

Supply and Demand.
 Mr. Francis was about to start away to attend the funeral of his rich old uncle.

"Put a couple of large handkerchiefs into my grip, dear," he said to his wife. "The old gentleman promised to leave me \$20,000, and I shall want to shed some appropriate tears."

"But suppose when the will is read," said the wife, "you find he hasn't left you anything?"

"In that case," replied he, "you had better put in three."

Be sure that you ask for Wright's Indian Vegetable Pills, and look for the signature of Wm. Wright on wrapper and box. For Constipation, Biliousness and Indigestion. Adv.

Would Cut it Up.
 An easterner who had bought a farm in California had heard of his neighbor's talent for raising large potatoes, so sent his farm hand over to get 100 pounds.

"You go back home," answered the talented farmer to the messenger, "and tell your boss that I won't cut a potato for anyone."—Everybody's Magazine.

Guilt.
 Wife—There must have been some punishment for King Solomon.
 Hubby—There was. He had a thousand mothers-in-law.

He "Raised" It.
 Mr. Rural Hamlet (to ministerial guest)—Do have some more of the corn, Dr. Elightly. It came out of our own garden.

Little Buttin Hamlet—Yes, 'n' the chickens came out our own garden, too. Pa said he bet the folks next door would keep their hens at home after he caught a few more of 'em.—Judge.

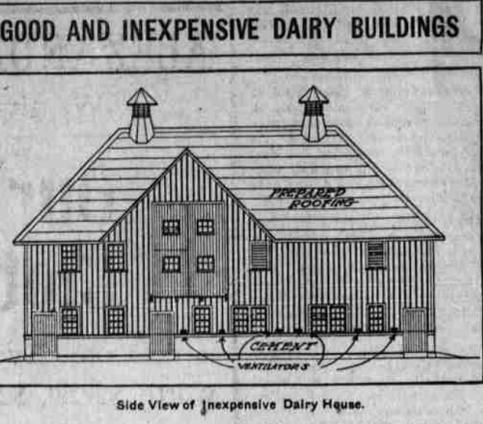

The Result.
 "Did you see how the tango has got into the silk trade?"
 "That so? Now we'll have even the silkworms doing the proper wriggle."

Burglar Proof.
 "John—John, dear," whispered Mrs. Timmid, shaking her sleeping husband violently by the arm, "there's a burglar in the house."

"Gh, well, let him burgle," returned John, sleepily. "He can have the silver if he wants it, but the cuss isn't going to rob me of my sleep."—Judge.

Darwin at the Bottom of It.
 Hokey—a St. Louis minister says that the teachings of Darwin are responsible for the tango and the turkey trot.

Fokey—That's very possible. He's to blame for most of this monkey business.—Buffalo Express.

Side View of Inexpensive Dairy House.

Prepared by the United States Department of Agriculture.
 The department of agriculture as the result of a great demand for information relating to the construction of dairy buildings started a line of investigation through its dairy specialists for the purpose of developing the basic principles of such construction. In order to make the work thoroughly practical, these studies were extended to the planning and actual supervision of construction of a number of dairy buildings in different sections of the country. Few localities will require or even permit of the same treatment so far as exposure, size, form, or building material are considered, but the problem of light, floor, ceilings, etc., are nearly alike in all cases.

Stably for 24 Cows.
 The plan shown is designed for 24 cows, and allows ample room for calf pen and box stalls for bull and cows, also space for feed room, hay chute, wash room and silo. The amount of space allowed for the various purposes will meet the usual requirements. The arrangement of the space can be adapted to the needs of the particular location.

Special Features Common to All Well-Planned Barns.
 The width of this barn is 31 feet 4 inches outside. This allows ample room for the stalls and passageways. While the length here shown is 73 feet 6 inches, this depends on the number of cows to be handled. The side walls are built of brick or concrete up to the window sills, the balance of the walls being frame. The end walls are constructed of brick or concrete up to the ceiling. A partition extends across the barn so that the cow stable can be entirely shut off from the rest of the barn.

Windows.
 One of the faulty points in ordinary barn construction is the small amount of window space usually allowed. This plan provides approximately 6 square feet for each cow. It will be noted from the elevation that the windows are sliding sash extending to the ceiling, making them nearly twice as high as they are wide. This arrangement will admit much more light than the same space if the windows were placed otherwise.

Manger.
 The manger is planned to be 2 feet wide and 6 inches deep, with slightly rounded corners, the front sloping at an angle of 45 degrees and the bottom being 2 inches higher than the floor of the stalls.

Stalls.
 The width of stalls is 3 feet 6 inches, which is as narrow as should be allowed.

Watering.
 Watering devices may be put in the stable or provided for outside at the option of the builder.

Storage of Feed.
 There is no objection to storage above the cow stable proper so long as the floor is similar in construction to the one in the drawing, so as to be kept perfectly tight.

Ceiling.
 In colder climates it is deemed better to have a comparatively low ceiling on account of temperature, and this construction admits of changes in this respect.

Ventilation.
 The plan adapts itself to any system of ventilation. The openings shown give suggestions as to where the fresh air may be taken in and the impure air discharged.

PLACE FOR HEN TO SCRATCH
 Oat Straw Found to Be as Cheap as Anything Else in Long Run—Buckwheat is Too Fattening.

There are a number of different materials which furnish an excellent place for the hens to scratch in, says a writer in the Poultry Journal. Leaves are probably the stuff most used by the small poultrymen. These are good if gathered when perfectly dry. They must be put into the pens every few days, because the poultry will break them into dust by their continual scratching. I find oat straw about as cheap in the long run, because it lasts quite a while and furnishes some feed if fed before threshing.

Some of my neighbors have tried feeding buckwheat as a scratching material and a feed combined. Buckwheat is too fattening and should be used only occasionally. Corn husks make an excellent scratching material. Shredded or cut corn fodder does very well if there is nothing else on hand. I do not like any form of meadow grass or awale for scratching material because it mats down too much when out and not enough when not out.

Guarding Lambs Against Ticks.
 The good shepherd will see to it that his lambs are entirely free from ticks. At least six weeks before lambing time the ewes should be very carefully examined and if there is any sign of ticks they should at once be dipped. Place the ewe on its back, part the wool along the belly, and pour on the dip solution so that it will run down and cover the entire skin.

Hillside Crops More Dependable.
 Records of crops will show that the trees grown on the hillsides or at the top of elevations have a greater percentage of crop years than those in the hollow. This condition is primarily due to the air drainage or to the difference of temperature between the low ground and that a few feet higher up. Experiments have shown that on still, frosty nights there has been a difference of 15 degrees in as many feet between the bottom of a ravine or hollow and the top nearby.

Rearing Calves.
 The man who plans to rear his heifer calves should bear this point in mind: Vitality is one of the most important things to be developed, and it is obtained only through liberal feeding and proper care. And this is only partly true, for unless the calf is well-born to start with, the best care and feeding will not produce a profitable cow.

Avoiding Lightning Danger.
 Many a bunch of cattle with heads between the wires of a fence have been killed by a single bolt of lightning, because the fence was not grounded. Wires every few rods connecting each wire of the fence with moist earth will take the current off and make the bolt harmless.

NATURE'S WAY OF CLEANING
 Electrically Driven Air Washes Are Made Which Produce Artificial Rain or Spray.

To imitate nature's way of cleaning and cooling the atmosphere, electrically driven air washes are made which produce artificial rain or spray through which the air is passed. In winter the same apparatus is used to put the needed moisture into dry air.

Within a chamber numerous nozzles are installed that divide the water forced out of them by a motor driven centrifugal pump into very fine spray which in the air washer moves in the same direction as the air, thus reducing the power necessary to handle the water. From the top of the chamber, also, additional nozzles spray water downward through the air. After the water has been used, it passes to the bottom of the tank and is used again, but not until it has passed through a

screen fine enough to remove the accumulated dust. When it becomes necessary to clean the screen, this is done by reversing the direction of flow of the water for two or three minutes each week when any dirt will be thrown off the screen and readily drained away.

Makeup water is provided automatically. A ball float opens the inlet valve from the water supply system whenever the water falls below a certain point and closes it as soon as the tank or basin is full. In this way there is always furnished an ample water supply.

QUEER FREAKS OF WIRELESS
 Failure to Operate on Account of Atmospheric Conditions Has Been Source of Annoyance.

Wireless telegraphy has many apparently mysterious qualities for which scientists have been unable satisfactorily to account to the layman. Failure to operate on account of the conditions of the atmosphere has been the chief source of annoyance. Another fault, which has recently been remedied, is in the absence of secrecy in transmitting messages.

Lighting and other electrical disturbances have also caused some inconvenience, but in the event of a storm the apparatus is now usually grounded in order to prevent injury. It is reported that lightning will seriously injure, if not entirely destroy, instruments, even though it might strike at a point five or ten miles distant.

Why the wireless has worked better at night or in cold weather rather than hot, why transmission is better on the Pacific ocean than on the Atlantic, or why communication is better in one direction rather than in another have all been puzzling questions. These elements of unreliability and disappointment are now disappearing, however, and the confidence of the public has been won.

HANDY ELECTRIC PUFF IRON
 Milliner by Drawing Plume Over Convex Heated Surface Secures Pretty Wavy Plumage.

Puff irons are used by milliners for treating plumage. By drawing a plume over the convex surface of the heated iron the plume is given a beautiful wavy appearance. The electric puff iron shown in the illustration was

made especially for a large millinery concern and is much superior to other forms; the heat is always uniform and the risk of burning the delicate plumes is reduced to a minimum.

The iron operates on current taken from any electric light socket.

High Current Protection.
 So that linemen testing telephone circuits will not be endangered by heavy currents, a new English testing outfit is mounted on a steel rod for grounding.

Municipal Electric Plant.
 The English city of West Hartlepool claims to be the first municipality to produce electricity in its own plant by waste heat obtained from a nearby iron works.

Dangerous Current.
 According to a European investigator any electric current powerful enough for industrial purposes is dangerous to human life under certain conditions.

New Electric Light Base.
 Many requirements are filled by a new electric light base fitted with a suction cup bottom by which it can be attached to almost any smooth surface.

New Electric Pump.
 An English invention is a new centrifugal pump directly connected to an electric motor that runs equally well in or out of water.

The first electric plant within the arctic circle will be erected at a mission at Point Hope, Alaska, the power being supplied by a windmill.

Hubby's Ration Limited.
 A Wichita attorney is very fond of a certain kind of cake his wife is expert at making. Recently she left for a visit with her parents, and before going baked a large cake. She knew that if she left the entire cake where her husband could find it he would eat it all in one day, so she cut it into slices and hid them in various parts of the house. Each day she wrote her husband, and in the letter she told him where he could find a piece of the cake.—Kansas City Star.

Too Many Minutes.
 The negro coachman of a southern senator who attended the Episcopal church, after many invitations from the senator's wife, went into the church one Sunday morning instead of staying outside.

"How did you like the service, Jim?" she asked afterward.
 "Not much, Missis," Jim replied.
 "That ain't no church for me. Dey wastes too much time on de letter-utes of 'e previous meetin'."—Saturday Evening Post.

Again the Bride.
 Mrs. Macdonald was a young housekeeper and marketing was new to her. One morning she went down to the market to get some supplies.

"I wish to get some butter, please," she said to the dealer.
 "Yes, ma'am," he replied, "do you wish roll butter?"
 "Oh, no," she replied, quickly, "Toast butter. We never eat rolls."

Shake Into Your Shoes
 Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, aching feet. Makes new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitutes. Sample FREE. Address A. S. Oimsted, Le Roy, N. Y.

Coal Black Tulip Soon.
 Hartford Times: A black tulip, which has been a dream of horticulturists ever since Dumas wrote of such a mythical flower, has been very nearly realized. At the flower show in Horticultural Hall, London, a specimen of tulip has been shown which has such a dark purple color that it might at first glance be mistaken for a black flower. Its growers declare they will be able to exhibit a specimen almost coal black next year.

Righteous Judgment on Rockefeller.
 Springfield Republican: When so conservative an economist as Professor E. P. A. Seligman of Columbia university condemns the Colorado mine operators for refusing to grant the strikers' demand for collective bargaining—a principle already recognized in many other states of the Union, in Canada and in England—the bottom is beginning to fall out of the Rockefeller position.

Seen, but not Recognized.
 The position of Huerta recalls the irate congressman who vainly attempted to get the floor, and who finally shouted at Speaker Reed:
 "Is it possible that the speaker does not see me?"
 "Oh, yes," replied Mr. Reed, "I certainly see the gentleman, but I don't recognize him."—Norfolk Ledger-Dispatch.

Exact.
 Judge—What is your age, madam?
 Witness—Twenty-seven and some months.

Judge—I want your exact age, please.
 Witness—One hundred and twenty.—Boston Transcript.

A Modern Instance.
 "Seems strange that people could be so credulous as they were in the days of the Salem witchcraft."
 "Oh, I don't know. Some of us went in pretty strong for those poisoned needles stories which were so popular a few months back."

Wahkiakum county, the smallest in the state of Washington, has a woman clerk.

The average of school teachers in Missouri is \$37 a month.

Sick Women Made Well
 Reliable evidence is abundant that women are constantly being restored to health by Lydia E. Pinkham's Vegetable Compound

The many testimonial letters that we are continually publishing in the newspapers—hundreds of them—are all genuine, true and unsolicited expressions of heartfelt gratitude for the freedom from suffering that has come to these women solely through the use of Lydia E. Pinkham's Vegetable Compound.

Money could not buy nor any kind of influence obtain such recommendations; you may depend upon it that any testimonial we publish is honest and true—if you have any doubt of this write to the women whose true names and addresses are always given, and learn for yourself.

Read this one from Mrs. Waters:
 CAMDEN, N. J.—"I was sick for two years with nervous spells, and my kidneys were affected. I had a doctor all the time and used a galvanic battery, but nothing did me any good. I was not able to go to bed, but spent my time on a couch or in a sleeping chair, and soon became almost a skeleton. Finally my doctor went away for his health, and my husband heard of Lydia E. Pinkham's Vegetable Compound and got me some. In two months I got relief and now I am like a new woman and am at my usual weight. I recommend your medicine to every one, and so does my husband."—Mrs. TILLIE WATERS, 1135 Knight St., Camden, N. J.

And this one from Mrs. Haddock:
 UTICA, OHLA.—"I was weak and nervous, not able to do my work and scarcely able to be on my feet. I had backache, headache, palpitation of the heart, trouble with my bowels, and inflammation. Since taking the Lydia E. Pinkham's Vegetable Compound I am better than I have been for twenty years. I think it is a wonderful medicine and I have recommended it to others."—Mrs. MARY ANN HADDOCK, Utica, Oklahoma.

Now answer this question if you can. Why should a woman continue to suffer without first giving Lydia E. Pinkham's Vegetable Compound a trial? You know that it has saved many others—why should it fail in your case?

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No one sick with woman's ailments does justice to herself if she does not try this famous medicine made from roots and herbs. It has restored so many suffering women to health.

Write to LYDIA E. PINKHAM MEDICINE CO., 100 N. WEST ST., LYNN, MASS., for advice. Your letter will be opened, read and answered by a woman and held in strict confidence.
