of the prime favorites. An often proved recipe calls for one-half pound of sugar, a pound of butter, six eggs, the juice of two lemons with their

a light piecrust with open top. Pow-done dish up with brown gravy and dered sugar and lemon fuice should be send to the table with apple sauce. spread on the top of each ple.

ingue mixtures. An English tart calls a cup of augur, two lemons (the blended in water, a dozen raisins parbolled, cut in two and seeded. Best

A lemon sauce which is very fine for rice, bread or boiled puddings, espe cially for the old-fashioned cottage pudding, is made from a cup of sugar, of a lemon and half the grated peel, a teaspoonful of grated nutmeg and three tablespoonfuls of boiling water. Cream the butter and sugar, beat in

the egg, very well whipped, then the emon and nutmes; beat well for ten minutes, then add by degrees the boll-ing water. Put in the inner pan of a double boiler, with boiling water in the outer pan, and stir well until the sauce becomes very hot.

Lemon souffle is a light, refreshing dessert. Put in a bowl four yolks o eggs and four ounces of powdered sugar, add the grated rind of two lemons and stir well for 20 minutes until quite thick. Then add by degrees a tablespoonful of lemon fuice, and fin-ally beat in, lightly and quickly, the whites of six eggs beaten to a stiff froth. Pour into a pie dish and bake in a moderate oven for about 25 minutes to a golden brown. Serve on a lace paper dolly within a silver dish. the fruit and very easy to make, is composed of the juice of six lemons with the grated peel of three, one sweet orange (the juice and the grated rind), a pint of water and a large cup of sugar. The acidity of the

medium allowance. Squeeze all the juice and place in it the grated rind of the fruits, leaving them an hour standing. Then strain well and mix in the augar and the water, stirring until dissolved. Then turn into the freezer and stir several times while it hardens to keep it entirely

ice can be regulated by the amount of sugar used. A large cup is the

A modification of the lemon cure which of course is not permitted in the lemon club, is the consumption during the day of one or two lemons in this way: Cut off the top and make an incision downward in the core without losing any of the juice. Edge in by degrees a lump of white sugar, brough which the juice can be taken School children have a way of im dding an old-fashloned lemon cardy stick in the fruit and sucking the juice Both of these processes are good for reduction.

Citron when properly used and pre-pared is so delicious that it should be introduced for a change more fre-

ing for dried fruit; for a plain cake transformation, white, regular or gingerbread, add one cupful of minced citron, slightly floured. Put a small cupful in the doughnut batter, measured after dicing. In your lemon or sprinkle a little of it shaved on top cake before icing is applied.

When the vanilla ice cream is near ly frozen, remove the lid and for two quarts drop in one of the large pieces of citron, previously put throu Query-Why do they always try to meat grinder; again cover and finish

Citron is delicious in apple sauce and "Brown Betty." Fricassee of Lamb With Gravy.

Get lamb from the forequarter, cut in pieces for serving. Wipe meat, put in kettle, cover with boiling water and cook slowly until meat is tender. Remove from water, cool, sprinkle with salt and pepper, dredge with flour and saute in butter (here you need to use butter). Arrange on platter and pour sauce made from liquor in which meat was cooked after removing all fat. It te better to cook meat day before serv ing, as then fat may be more easily To Prevent Irons Rusting.

Irons treated in the following manper can be kept in excellent condition: Tie a lump of beeswax in a thin white rag. When the frons are hot, rub them with the rag and then scour with a cloth sprinkled with sait. After t can be put up the troning is finished and the trons for any purposa are still warm, rub the wax over them, and it will keep them smooth and free from rust. If a brick which has been ironing stand, the irons will be found to keep hot much longer than if an ordinary from stand is used.

Frogs' Legs, Brown Fricasses. Remove the skin from the frogs' legs and scald them with hot water, cidulated with a little vinegar. Dry, roll in flour and saute a light brown Make a thin, brown sauce, add a slice of lemon, a shallot, a small bay leaf. a sprig of parsley, and a few mush-rooma. Stomer about fifteen minutes, add a tablespoonful of sweet butter or a little cream and serve.

Toe Substantial a Dish for Hot Weather, But There Still is Time to Enjoy it.

Before the weather gets too hot we may like to have one more good roast of fresh pork. A fresh shoulder or fresh ham will stuff to best advantage. Select one not too large, make a large incision just below the knuckle between the skin and the neat for the purpose of introducing cured by sewing up with small twine Then with a sharp-pointed knife score the leg all over and in the following the juice of two lemons with their manner: With the left hand hold grated rind, a nutmeg and half a glass the pork firmly and with the knife a quarter of an inch apart. Roast for the yolks, the lemon, the spice and about two hours and a half or three brandy, then add the whites. Bake in hours, according to size, and when

The stuffing for the pork may be There are a great many varieties of thus prepared: Chop a dozen sage emon pie, with cocoanut and mer-leaves and six large onlons and boil these in water for three or four minutes and put on a sieve to drain; juice and some of the peel grated), a then put in a stewpan with pepper teaspoonful of cornstarch smoothly and salt and a little butter and let it simmer for twenty minutes, when It is ready to place in the leg of pork these ingredients well together and While this onion stuffing is possibly bake between two crusts in small ples more favored than a dressing in which cracker or bread is used, it ly removed and thus give room for a good quantity of the real old fash-foned bread stuffing.

A loin of pork may be stuffed with the same preparation by making an incision in the upper part of the loin and after the stuffing is put in sew-ing up as you would the leg.

HAVE REGULAR MENDING DAY

By Employment of System, Drudgery of Necessary Repairing May Large-ly Be Done Away With.

"There is nothing in the world like system, and nowhere does one realize this more than in the matter of dress." Thus writes one woman, who thinks that the woman who puts off mending to in ten minutes is laying up much trouble for herself when the little hole ecomes undarnable. The rin under the arm in the blouse that hardly shows when it is put on extends alarmingly, and there is usually a day A lemon ice, strongly flavored with of reckoning for all put-off things of plant 25 muskmelons six feet apart the same kind.

nending day or a mending evening, if squash, all six feet apart. The nex a woman is engaged in business. Se-lect the best day for this purpose and squash and twelve rhubarb plants, set stick to it; you will be surprised to six feet apart, and the last two rows find that your clothing will not only may very properly be given over to look better but also last longer. As herbs and flowers for cutting.

Cornstarch Snow Pudding.

Those who have always made a substitute is made by adding whites meat. of eggs to a plain cornstarch pudding. Mix one-half cup of cornstarch, one quarter cup of sugar, a saltspoonful of salt with one-half cup of cold milk. cook 15 minutes. Add a teaspoonful of vanilla and the whites of three eggs beaten stiff. When stirred light ly pour into small molds and serve with custard sauce. If the family is colds, although the sugar retards flesh will make it even lighter and more

Marrow Balls.

Mix together: One tablespoonful of marrow taken from the soup bone before you put it on to boil, the white of one egg beaten stiff and seasoned slice of green pepper chopped fine And enough fine bread crumbs to make into a dough stiff enough to roll

into balls. Make them half an hour before you are ready to cook them, as they retain their shape better if allowed to stand. Drop them into any hot stock and let boil six minutes, being careful not to crush them in taking out. Serve at once.

One and one-half cupfuls granulated

der, sifted with two quarts of flour, creameries and cheese factories is portion of their living as scavengers pinch of salt.

cupful pulverized sugar, one table spoonful gelatin, one cupful chopped candied cherries, pineapple, and Eng-lish walnuts. Dissolve the gelatin in lish walnuts. Dissolve the gelatin in one-third cupful hot water and mix weed pest. However, as alfalfa will all lightly together. Flavor with va-nilla and pour into mold and stand seed each year, extreme care should whipped cream.

Some Useful Hints.

Perfumed olive oil sprinkled on li from black cloth by rubbing with a remove the poison.

LAYING OUT A GARDEN NOTES OF THE POULTRY YARD

ERRONEOUS IDEA THAT MUCH TIME IS REQUIRED.

Plot 150 by 100 Feet Will Produce Enough Fruit and Vegetables for Family of Six-Run the Rows North and South.

(By E. PARKER.) There is an important economical ide to this question of a garden. Beef, for instance, in its various form is notoriously expensive, especially a day, whereas beans, peas, spinach, make up half the amount eaten, thus finish the hatching, and it will save reducing the cash cost of the whole. And the impression that a vegetable garden requires much time and care three hours a week will suffice for a able of producing fruit and vegetables enough for a family of six, provided

a horse may be used.

In laying out such a garden the is the results that count. rows should be run north and south, for planted thus vegetables receive the first of these might contain twelve current and twelve gooseberry bushe set six feet apart. In the second row plant a hundred raspberry canes three feet apart, with two canes at each The third row will be for strawberries and will hold 150 plants grown in hills set one foot apart, no being allowed to grow. next thirteen rows will be three feet apart and may be planted to the folowing vegetables in the order given: Asparagus plants, 50 one-year seedlings, set three feet apart in the row; parsnips, 50 feet; then a hundred feet young sets for early summer; beets and lettuce, 50 feet; early cabbage, a hundred feet; late cabbage, a hundred feet; cauliflower, 50 feet; peas, three full rows, corn, four full rows; toma toes, a hundred feet; beans, 50 feet; okra, ten feet; then 50 feet more of string beans and 150 feet of dwarf lima beans. The remaining four rows should be eight feet apart to allow the vines to spread. In the first row then a row of cucumbers set six feet The remedy for this is a regular apart, five eggplants and ten early

soon as a garment needs mending put It is frequently forgotten that it aside for the mending day that is great many people abroad, notably the drawers of water and hewers of wood, live almost entirely on vegetables, con sidering meat a luxury only to be in dulged in once a week, while we in now pudding with gelatin and lemen America, having the most delicious juice thickened with the white of eggs and greatest variety of vegetables will be surprised to find how easily a grown anywhere, discard them for

OSWALD, Minnesota Experities of wheat, bran, clover, oyster shell and sound grains in the ration

SUNLIGHT AS DISINFECTANT

Most Disease Germs Are Killed by Direct Light, as Repeated Tests Have Demonstrated.

(By H. PRESTON HOSKINS.) Sunlight is one of the best and cheapest disinfectants at our disposal, and we should take advantage of this fact at every opportunity. In the con-struction of barns or shelters of any kind for animals, ample provision should be made for the admission of the maximum amount of sunlight. Southern exposure is desirable, that is, facing the south. The warmth thus and much of the excessive heat in and much of the excessive heat in summer can be avoided by providing suitable curtains or screens. Most dis-case germs are easily killed by direct sunlight, as has been repeatedly shown

given every pupil who takes our ourse. In this way they become pro-cient in all branches of office work, and are never nervous or uncertain as to their duties when they enter the business world.
