DELL BROTHERS, Athena, Oregon CATERERS TO THE PUBLIC IN GOOD THINGS TO EAT

BOY BY DECISIVE VOTE OF 95 FOR, TO 37 VOTES AGAINST.

Large Number of Women Voters Cast Ballots, Evincing Interest in the Result.

The question of bonding the district for a new school building and equipment was decisively settled at the election Monday, by a vote of 95 in favor, to 37 against.

The meeting was called to order by M. L. Watts, chairman of the school board, and A. B. McEwen, Cass Cannon and W. R. Taylor were chosen judges of the election and H. A. Barrett, clerk. The polls opened at 2 o'clock and talloting continued until 7 o'clock.

Interest in the result was at fever heat and a large number of women cast their ballots during the afternoon. The judges were furnished with a list of voters for the 1913 tax roll, and when William Vancil appeared to vote, his qualification as a voter was challenged by C. A. Barrett, on the grounds that his name did not appear on the tax roll. Vancil stated that he had been assessed by the assessor for 1914. He was then sworn by the chairman of the election board, and permitted to cast his ballot. A number of others, whose names did not appear on the 1913 list, but who had been assessed this year were likewise sworn by the judges and allowed to ballot.

The question was simply if the judges were to accept the assessment roll of 1913 as a basis to decide the status of a taxpayer or allow all to vote who had been assessed in both 1913 and 1914. So the Vancil challenge brought forth the decision that a taxpayer who had been assessed was eligible to vote, though the judges took the precaution to swear in all voters assessed this year whose names did not appear on the 1913 roll.

The tremendous majority in favor of the bonds was a surprise to many, but the condition of the present building, after thorough inspection, doubtless did more than anything else to overwhelmingly carry the bonds.

The school board now have their hands full in considering plans and specifications submitted by architects, there being no less than five firms after the contract.

WEST CLOSES DEER SEASON

On Account of Fires Will Not Open Until September 1.

By virtue of a proclamation issued by Governor Oswald West, the deer season in Oregon is closed until September 1 in order to keep campers out of the hills and thus lessen the danger of forest fires. District Game Warden E. F. Averill is notified of the proclamation and has instructed all of his deputies and the forest rangers to notify the hunters in the hills of the order.

The present summer has been such an unusually dry one that many forest fires have started, many from carelessness of hunters in the hills. Governor West, therefore, resolved to withdraw one danger by closing the deer season until September 1.

The proclamation comes as the result of carelessness on the part of hunters in Southern Oregon. Arrests and prosecutions of men suspected of starting fires in the Siskiyou Forests west of Eugene, are expected by the State Deputy Forester, and an example will be made if possible to warn hunters whom, the forestry officials say, have been maliciously responsible for scores of fires this year.

Carl V. Oglesby, deputy state fire warden of Eugene, received notice from Frank Fish, his deputy at Loraine, that one man has admitted starting fires. The name is not yet available, for the man is not in custody.

No disposition has been made of the case of the 19-year-old boy whose alleged confession implicated other parties. Prosecutions are expected.

"Hunters are responsible for the fires which we have been fighting during the past month," Mr. Oglesby said. "They seek to clear the forest for game. We have just spent \$500 fighting fires on Wolf Creek, which we know were set by hunters. Five fires were set simultaneously along a path taken by a party of hunters whose names we know."

Pope Plus Dead.

Pope Plus X died at the Vatican Wednesday afternoon. The pope lapsed into unconsciousness at noon, just before the last sacrament was administered. Physicians administered oxygen to keep him alive until the arrival of officials which church rites require be at the pontiff's bedside at the end. At 1:30 p. m. the doctors said the patient's condition was desperate. His fever increased and he was very weak. The sufferer sank steadily until the moment of death.

Lieutenant Porte and Bow of The Hydroaeroplane America

Photos by American Press Association.

LIEUTENANT PORTE, the British naval officer who will attempt a transatlantic flight in the hydroaeroplane America, is very confident of success. He has tried out the craft at Hammondsport, N. Y., and he says the results are even better than expected. He has carried as many as seven passengers in trial flights. Lieutenant Porte and Designer Glenn H. Curtiss have discussed the feasibility of holding a trial flight to test the ability of the engine of the America to run for twenty hours, the time it must remain in the air in order to reach the Azores. Mr. Curtiss said that a duration test of this kind might be held on Lake Ontario or Lake Erie or possibly on the ocean if Lieutenant Porte thought he had the time.

SECRET OF THE LOVE BIRD.

It May Be Discovered in the Milk of Human Kindness.

Everything else dwindles into insignificance when the love bird appears. Affection, devotion, tenderness and love burst gladly forth at her magic touch. * * *

The road to happiness is attained through the generous distribution of the milk of human kindness.

Success, achievement, wealth, prominence, are only worth while when shared by your friends. No matter how large you can spell "success," it gives you little satisfaction if your accomplishment is not sincerely enjoyed by many. When surrounded by friends and loved ones, if you are fortunate in the acquisition of a generous disposition and charming personality, what a joy it is to be able to give them cheer, comfort, pleasure and satisfaction!

Who does not feel better for the "God Bless You" from an old lady to whom you have shown some trifling kindly attention? Who is not thrilled by the joyous barking of his dog upon returning home?

Fortunate are those who feel the arms of children around their necks, bear the baby's laugh and see the wonderful smiles toddling toward them, happy and unafraid.

All these joys sink into insignificance when the one and only one looks into your eyes, tender, true, steadfast. Words need not be spoken; nothing else matters. Then, and not until then, will you know the excess of happiness, the full realization of love, and then is the time to unite yourself steadfastly to fidelity, unflinching generosity and open heartedness to all.

Unto us a child is born, * * * and his Name shall be called Wonderful. —From Richard Clough Anderson's "Animals in Social Captivity."

SURGICAL SHOCK.

Only in a Vague Way Does Science Know What Causes It.

Shock is still one of the great mysteries of surgery. Many theories have been put forward to explain just what it is. Each of these has seemed attractive until its inherent defects were discovered by experience.

In a lecture before the British Royal College of Surgery Dr. A. Rendle Short reviewed these successive theories and described the experiments of himself and others by which they were disproved. But researches by Dr. Crile of Cleveland, Professor Sherrington of England and Dr. F. H. Pike of Columbia university, New York, seemed to him to offer at least a clue to the real nature of shock.

Professor Short did not formulate a definite theory, but suggested that surgical shock was due to an inhibiting or paralyzing of the important nuclei in the region of the fourth ventricle of the brain and perhaps in the cerebellum. These are "continually sending impulses down the spinal cord, maintaining its functional activity and increasing muscular tone." The effect of this paralysis is to cut off these impulses, whereupon the functions of the spinal cord are greatly reduced, muscular tone is abolished, and as a secondary result the blood pressure may fall. The respiratory center and perhaps also the vasomotor center share in this inhibition or paralysis.

GOVERNMENT WILL BUY GRIAN SHIPS

BROAD PLANS TO BUILD UP MERCHANT MARINE FOR U. S.

Project Would Result In Relieving Present Restrictions On Foreign Shipments.

Comprehensive plans were mapped out by the administration for building the American merchant marine with government money for the immediate purpose of transporting the products of the United States to the warring nations of Europe and to South and Central America.

President Wilson, in consultation with democratic leaders of the senate and house approved a project contemplating the expenditure of approximately \$25,000,000 for the purchase of ocean-going vessels, to be operated under the direction of a government shipping board in carrying on the foreign trade of the United States.

Government insurance of American ships and cargoes against the risks of war would be provided for in a bill submitted to congress after it had been approved by the president.

The bill, another of the emergency measures, designed to aid in moving exports, would create a temporary bureau of war risk insurance in the treasury department and would appropriate \$5,000,000 for the payment of losses and \$100,000 for the operation of the bureau.

The plans agreed upon for the purchase by the government of ships include the creation of a shipping board to be composed of the president, the secretary of the treasury, the secretary of commerce and the postmaster general to have charge of securing the needed ships and fitting them out.

It is proposed to use the ships principally in the foreign trade and it is the hope of the administration that through this medium great impetus will be given to the trade with South and Central America.

The present plan is to secure the necessary money to carry on the project by the sale of Panama canal bonds. It is expected by American leaders that the venture will prove profitable, although the question of gain played no part in the discussion.

The necessity for securing the crops of the United States is so pressing that extraordinary steps are decided on.

Fear is Useless.

Problem in addition to fear (another name for worry). If amnesia be unlovely from a social point of view phobism is fatal to its victim. Did it ever occur to you that fear can become a habit and a luxury, just as smoking is? But phobism is the more hazardous. We fear poverty, we fear disease, we fear death, we fear that we shall be snubbed socially. And each separate fear impairs our capacity for work in a definite, measurable way. I know many people addicted to the use of fear. Some of them use it to excess. To the psychologist fear is the most expensive of all habits that people indulge. Ninety-nine and forty-four one-hundredths per cent of fear is as useless as a deckhand on a submarine.—Elliott Park Frost in Atlantic.

NEUTRALITY CALLS FOR TRUE FAIRNESS

OUR POSITION WILL RESULT IN WHAT THE PEOPLE DO

President Asks Newspapers, Speakers and Individuals to Strive for Calmness.

A statement issued by President Wilson regarding the European conflict in part follows: "My fellow countrymen: I suppose every thoughtful man in America has asked himself what influence the European war may exert upon America and I take the liberty of addressing a few words to you and point out that it is entirely within our choice what the effects upon us shall be, and to urge most earnestly upon you the sort of speech and conduct which will best safeguard the nation against distress and disaster. Everyone who really loves America will act and speak with a true spirit of impartiality, fairness and friendliness to all concerned. The spirit of the nation in this critical matter will be determined largely by what individuals and society those gathered in public meetings, do and say; what the newspapers and magazines contain; what ministers utter from the pulpits; what men proclaim as their opinions on the street.

"Our people are drawn from many nations, chiefly from nations now at war. It is natural and inevitable there should be the utmost variety of sympathy and desire among them in regard to the issue and the circumstances of conflict. Some will wish one nation, others another to succeed in the momentous struggle. It will be easy to excite passion but difficult to allay it. Those responsible for exciting it will assume heavy responsibility for no less a thing than that the people of America whose love for their country and loyalty to their government should unite them as Americans, all bound in honor and affection to think first of her and her interests, may be divided into camps of hostile opinion. If not in action, such divisions against us would be fatal to our peace of mind and might seriously stand in the way of proper performance of duty as one great nation at peace and one people holding itself ready to play the part of impartial mediation and to speak counsel of peace and accommodations, not as a parties but as a friend."

Scott Banister Injured.

While driving a loaded wagon down the steep hill near the Chas. Williams place south of town, the brake refused to work and Scott Banister was thrown from the wagon. His right leg was badly bruised, requiring the attention of Dr. Sharp, who dressed his injuries.

Harris Stops Drilling.

Vick Harris has stopped drilling in his artesian well, fearing to go through the solid rock formation and losing the flow he now has. The water is of good quality and cool. He has enough for irrigating his premises and is satisfied with the result.

MRS. H. W. KEMP PASSES

Death Occurred in St. Johns, Funeral Here Sunday.

Friends here were notified this morning of the death of Mrs. H. W. Kemp, which occurred at her home in St. John, Ore., a suburb of Portland, early this morning.

A communication to Undertaker Miller from E. L. Barnett, stated that the body of the deceased would be brought to Athena for interment, and the funeral will be conducted at the Christian church in this city Sunday. The hour has been set for 2 o'clock in the afternoon, with Rev. R. E. Gornall conducting the services. Members of the family will attend the body from Portland.

Mrs. Kemp died very suddenly, from heart disease, having been sick only a short time. Her obituary will be published in the Press next week.

Our Constitution.

The United States constitution is not modeled on any other; but, on the contrary, several are modeled on it, notably those of Canada, Australia, the Central and South American republics, Switzerland and, to a certain extent, China. It was drafted by a convention in 1787, ratified by nine states (the prescribed number) in 1788 and set to work under George Washington as first president in 1789. It is a very simple document, containing originally only seven articles.—Christian Herald.

Optimist and Pessimist.

"What is the difference between an optimist and a pessimist?" "A pessimist is always thinking of his liabilities, while an optimist thinks only of his assets."—Judge

Worth - While Savings in Groceries

Opening Of New Canned Goods

A few cents, nickles and dimes saved here and there make a material difference in the week's outlay.

Let us Figure on Your Harvest Order

We will Make it Worth Your While

While everybody is figuring on the best way of reducing the cost of living, we are doing our share to bring about an improved condition, by offering table necessities at less than usual cost. Taking advantage of every trade condition and buying in large quantities, enables us to give you the benefit of lower prices.
