ATHENA. ORE., JAN. 29...... 1915

In the interest of lower taxes, the legislature has abolished the Oregon State Immigration Commission and the office of State Immigration Agent, the latter held by C. C. Chapman. As neither the memters of the commission or Mr. Chapman received any salaries or other compensation from the State, they did not oppose the repeal of the law. The principal part of the fouds which have hitherto been used for ney harbor.—Sir Charles P. Lucas in Science. statewide farm organization has been subscribed by Portland business men. EAR DRUMS AND DROWNING. and while withdrawn, it is certain that activities for the development of Why Good Swimmers May Meet Sudthe state will not be permitted to cease. As we understand it, the commission as an organization, had the prestige of the State behind it, while individuals paid Mr. Chapman's salary. Is that it or not?

Senate Bill No. 80, introduced by Senator Wood, creates the new Board of Fish and Game Commissioners, provides for county deputy game wardens, their duties, etc. The bill leaves the game and fish license moneys in the fund for propagation and protection of fish and game as at present. A radical change in the issuance of licenses, however, is noted. The till makes it compulsory for the taking out of a license for every county to te hunted or fished in by the applicant, whereas at present one license is good for hunting or fishing in all counties of the state. It is a question whether the county livense system as proposed in the bill, will meet with general approval.

Europe may laugh at America as the land of "dollar chasers," but that this country has love for humanity in its heart as well as love for the almighty dollar, is shown ty the way its heart and pockets are open to the call I have hitherto refrained from obtrudof the suffering in Europe, and its millions pour forth to heal and to help. The time is fast coming when Uncle Sam will be thanked and revered by these buttle-worn countries of the eastera continent.

Senator Barrett's tax measure, in the main, would be a great improvement over present conditions of paying taxes, if it should be put into the statutes. The less complicated the collection of taxes and the setting of proper periods of the year in which the angel of death.

Dayments are to be made, as provided I am the naval eye that put the payments are to be made, as provided in the Barrett bill, will greatly simplify tax collection and add conven ieuce to tax payment.

A really good bill, that for comthe House but met defeat in the Sen ate. Hinkle in the House, and Barrett and Burgess in the Senate, opposed the measure. The bill in question would have made it possible to tell who a lobbyist was, and what he was lobbying for.

Denmark, Norway and Sweden have formed an alliance to safeguard the neutrality of those three countries along which the world war rages, The combination makes a strong guard that will be hard to break down. In union there is strength.

Protably President Wilson would rather be grandfather than president, If it were a matter of choice, but since the arrival of a grandeon in the White House, he is both-and just ain't mad at nobody.

It will take more than the ax in the neck of the game commission to lessen taxes in Oregon. Come, Mr. Legislator. Strike in the right places and redeem those pre-election pledges.

Golden Anniversary Celebrated, In commemoration of "Fifty Years Continuous Grinding." the Preston-Shafter Milling company this week mailed its patrons and friends an unique and highly typographically artistic golden anniversary announcement. M. S. Wait laid the foundation for the present milling plant at Waits burg, in 1865. The timbers for the building and waterwheel, were hewn with trond axes on the slopes of the Blue mountains, the mill stones came by vessel around the Horo, and the flour sacks were sewed ty the women of the valley, most of them by hand, there being at the time only two sew ing machines in the country. In 1866 Messrs. W. G. and P. A. Preston became owners, Inter taking into pert-nership Frank Parten. In 1886, W. B. Shaffer converted the Mill into a B. Shaffer converted the Mill into a modern full roller process plant, and undertake to train you be sing in operation business guidance the industry grew until the Athena mill, now managed by M. L. Watts was built and equipped to take care of the ever increasing trade. W. G. Preston the vanerable miller, still resides at his home in Walteburg, but the active management of the business has for a number of years devolved upon Messra. Shaffer and Watts.

ENGLAND AS AN ISLAND.

Changes a Channel Tunnel and Perfect

Aviation Would Bring. Great Britain is an island. Unless there is some great convulsion of na-ture to all time the strait of Dover will separate it from the continent of Eu rope. Yet every now and then a renewni of the scheme for a channel tunnel is heard, and at this moment men are flying from England to France and France to England.

Suppose the channel tunnel to be made; suppose flying to be improved— and it is improving every day—what will become of the island? What will become of the sea? They will be there and will be shown on the map, but to all human intents and purposes the reography will be changed. The sen will no longer be a barrier; it will no longer be the only highroad from England to France. There will be going to and from on or in dry land and going to and fro neither on land nor sea. Suppose this science of aviation to great strides and beavy loads to be carried in the air, what will become of the ports, and what will be-come of the seagoing peoples?

The ports will be there, appearing as now on the map, but Birmingham goods will be shipped at Birmingham for foreign parts, and Lithgow will export mineral direct, saying goodby to the Blue mountain and even to Syd-

den Death In the Water. Sudden death of swimmers has never been explained satisfactorily, but it is generally assumed that it is due to cramps that affect the respiratory muscles. The Medical Record says there is another theory that "has never received the attention which it merits." This is that cold water penetrating the ear sets up an irritation in the delicate passages of the inner ear. It cites an address delivered by Dr. Guettich before the Berlin Otological society, in

which he revived this theory.

The irritation of the labyrinth of the inner ear by cold water might cause sudden paralysis, just as a shock to it through a sharp blow on the chin will cause a "knockout." The symptoms of the swimmer and the fighter are simling. They can make motions, but cannot direct them; they may become temporarily unconscious. In the case of the swimmer, of course, drowning follows unless some one helps him.

The Medical Record says that persons with perforated ear drams are those chiefly menneed by this accident, at though it may occur to others. And this in spite of the fact that children with large perforations of the ear drum often swim and dive with impunity.

The Periscope.

Permit me to introduce myself to the public generally. Modest and retiring both by nature and occupation. ing myself upon the attention of the

multitude. My name is Periscope. My principal object in life is to rise to every neces-sary occasion. When this demands my more or less immediate presence I occupy myself by holding up the mirror, not to nature, but to the enemy. Like an occasional idea which renders superfluous old systems of philosophy, I have come to render superfluous as entire cycle of inventions. I am the inst triumph of mind over matter. reflect, and a thousand men go down to their fate. Within the bive zone of my horizon, subject to my orders, flits

Fires In the Philippines The fighting of fires in the dry sen son is a grave problem in the cities and pueblos of the Philippine Islands. being made from nips palm leaves, the framework of bamboo and the sides of either nips or sawali-s woven product of certain species of bamboo. When this material has been exposed contin uously to the sun for several months it becomes as inflammable as tinder. Fires that break out in the nipa districts always gain great headway be-fore any kind of an alarm can be sent In even where there is a fire department. Fires in such districts spread with great rapidity. In thickly populated areas it is not ancommon for a fire to burn several hundred houses before it is stopped.

Keep the Hands Clean. Clean bands and palls are most im portant precautions against carrying poisonous germs into the mouth on food taken in the hands. Nurses at tending cases of typhoid have not infrequently taken the disease because of such failure to cleanse their hands before enting. A towel may carry germs from one person who has been infected into the eyes of another who uses it and so produce blindness

SHE COURTED CRITICISM

And the Queen Got Rather More That She Anticipated.

In her youth Queen Elizabeth of Roumania speat much time on the training of her voice, and, encouraged by flatterers, crime to believe berself o be a singer of unusual talent. At length, says Bibliothek der Unterhalt ung und des Wissens, she decided to have her voice tried by some great teacher. So she went one day, dress ed very simply and without the usual retinue of servants, to see Professor Damanots of Bukharest and urged him to give his frank opinion on the quality of her voice and her future prospecta. He tested her voice with great care, first with the simple scales, then with a song and instly with an operatio

When the trial was over the profess or said, "I connot say that you have a wonderful voice You sing fairly well and with not a ditte feeling. I might

fore him no tess a personage than royalty itself. The queen thanked him beartily for the frank way in which be had judged her musical ability and went home with her ambition in that direction decidedly diminished.

School Notes.

The following very satisfactory report for the month ending Friday. January 22, shows an ever increasing excellence in attendance and efficien cy of the Athena schools:

Whole number of days' attendance 2500; whole number of days' absence, 30; whole number of times late, 6; number of pupils neither absent nor late, 145; average daily attendance, 166; per cent of attendance, 98.8. For the month, the room which had the most regular attendance was that of Mrs. McPherson, with an average of 100; Miss Cutsforth's room was second, with average of 99.6.

Taxpayers' Association Meeting. The regular monthly meeting of the Umatilla County Taxpayers' Association will be held at the rooms of the Commercial Association in Pendleton, Oregon, on February 1, 1915, at two o'clock p. m., for the purpose of disoussing some of the tills that are be fore the Oregon Legislature. The Roads and Bridge Committee will have an interesting report on the expenses of each road district, the cost of the macadam road, cost of the right of way, the cost of the different bridges in Umatilla County during 1913, 1918 and 1914; the amount of road money collected and spent during these years, and there will be other subjects of interest to the taxpayers. All taxpayers of Umatilla county are invited to be present and take part in the discussions. Manuel Friedly, Scoretary.

Studies For Degree.

All degrees are to be obtained only after years of study and experience. To get a "D. of H., B., S., H.," etc., is indeed a great task, because it is

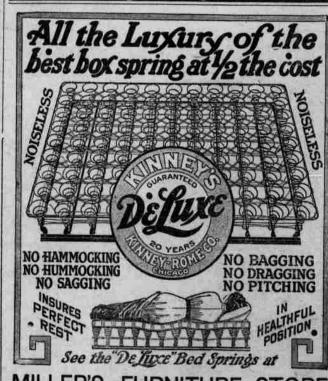

such a long degree.

And yet by the constant study and application of modern methods of building it is possible to tell how to build rightly; how to get the most room and comfort for the least money. Especially is this true in homes, where a number of modern step-saving

homes have been collected, as well as barns, silos, hog-sheds, etc.-because it is just as possible to build a sile or a hog shed or a barn rightly as it is to arrange a home conveniently. The use of a little "TUM-A-LUMapplied according to the Free

Plans and Specifications accompany-ing—in the cheerful warmth of "TUM-A-LUMP" is the prescription of any "Doctor of Homes, Silos, Hog-Anyone contemplating building or remodeling, is advised to see Johnson about it at the HOME OF "TUM A-LUMBER" and the place for "TUM-A-LUMP." How about wood and
