That has given complete satisfaction. It is built to cut grain in the most economical way, maximum efficiency in the field with a minimum of trouble and repair cost. Practicability, ease of operation and features of merit all combined in what the users of Cutting Machinery are demanding today. These can best be found in the Johnston line of harvesting machinery.

The manufacturers of this line of cutting machinery were established in 1871 and today they are getting 43 years of knowing how in every machine that leaves their factory. Johnston Harvesting Machinery is being sold today in most all civilized countries. Much time and money has been spent in perfecting their line of machinery to meet the rigid requirements of the Pacific Northwest. A policy of the Manufacturers is to know that every machine is in perfect running order before it leaves the factory. This is an assurance that it will do the work when placed in the field. All machines are guaranteed to the work for which they are intended.
