Most Too Light.

"Good morning!" said an old lady briskly, entering a baker's shop. "Permit me to compliment you on the lightness of your bread!" The baker rubbed his hands and smiled benignly. "Thank you, madam!" he said fondly, but respectfully. "It is my aim to bake the lightest bread in this city." "And you do it," said the old lady. "If it gets much lighter it'll take two of your pound loaves to weigh 15 ounces."—New York Journal.

HEADS OF ARMY AND **NAVY APPROVE PLAN**

Additional Trained Men.

Washington, D. C .- Unqualified support was given Secretary Garrison's army plan before the senate military committee by Major General Scott and Major General Bliss, respectively chief and assistant chief of staff of the army. Both amplified statements made on the subject last week before the house committee.

General Scott decarled the plan would save at least five months' time in building up an army of defense in a war emergency. He advocated immediate organization of a reserve corps of officers actually commissioned and assigned to the posts they would take in time of war. General Scott also urged that a quartermaster's re-serve corps of enlisted men be formed to include mechanics of all kinds, telto include mechanics of all kinds, ter-egraphers, radio operators, motor ve-hicle drivers and experts, teamsters, railway men and the like. A repre-sentative of the American Legion, he said, had told him recently that 15,000 men of this sort had been listed by the organization who were willing to en-

list in such a corps.

Both of the generals expressed the opinion that universal military service was the only "ideal democratic" method of building an army, but thought the country would not tolerate the pro-posal now. General Bliss said it was posal now. General Bliss said it was only talked of by army officers as an

cademic question on this account.

Discussing the details of the various bills under consideraion, General Bliss said that the measure proposed by the War department was the only one which appeared satisfactory or which seemed to contemplate a definite policy. The War college division of the General Staff, he said, has fixed 500,-000 men, more or less trained, as the irreducible minimum necessary for the country's safety in the first shock of

war.
The proposal to increase the regular army to 250,000 as suggested in Sen-ator Chamberlain's tentative bill, he added, was wholly inadequate by it-self. Moreover, he added, it was impossible to recruit a larger force than 140,000 men, as proposed by Secre-tary Garrison for the regular army, without increasing pay or otherwis giving added inducement. He read report from the adjutant general de He read a claring that it would be impossible to recuit even 200,000 men in peace times and that the arevage maximum force that could be maintained was only 122,000.
