prine, \$5.25 @ \$; Foigh newy, \$5@ 8.25; pigs and skips, \$8@8.25. Sheep—Yearlings, \$8@10; wethers, \$7.25@9; ewes, \$6.25@8.25; lambs, \$9.50@10.50.

New Potatoes Arrive.

Celery is about through for the sea-son, it is reported. The vegetable is quoted at \$5.75 a crate. Radishes, and lettuce arrived by steamer and went out quickly. The demand for green stuff increases daily. Apples continue to sell good, Wine-

saps are the most popular variety here, wholesaling from \$1.25 to \$1.65 a box. Meats and poultry are firmer.

Tacoma-Butter is firm and dealers do not look for a decline for two weeks yet. The market of the Pacific Coast is reported to be unchanged. Receipts of butter are none too large. Eggs are arriving plentifully and the mar-

ket is steady. Cheese is unchanged and the demand is light. The fish market is well supplied with various kinds of fish with the ex-

A Shortage in Paper. A Shortage in Paper. A commodity even so indirectly re-lated to the demands of war as paper is showing the prevaiing tendencies to such a degree as seriously to em-barrass publishers. The higher price of paper stock and the difficulty of obtaining it at all in England was a chief factor in the discontinuance in March of the London daily Standard, after a career of sixty years, for a con-siderable portion of which it was the most important organ of the middle classes in England. In Amorica the demand for paper has been increasing for six months as a result of general business activity. At the same time, supplies used in its manufacture have been decreased by war conditions, and in some cases have almost been shut off. The supply of old rags is affected **GERMANS IN MASS ATTACK**

ON VERDUN FRONT MOWED

Paris—Abandoning the new open formation and the lately established practice of night attack, the Germans Tuesday engaged two army corps (80,-000 men) in dense masses against the French positions northwest of Verdun, between Avocourt and Cumieres. Forces numbering at least a division

and a half (about 30,000 men) charged the line between Avocourt and Bethin-court. They approached within 100 yards of the French trenches, and seemed insensible to the fact that hundreds of their men were falling by the way; but notwithstanding their courage and the weight of their masses they were stopped. There was å dead-line beyond which they could not pass. When the attacking columns were thinned out by artillery and machine and a half (about 30,000 men) charged off. The supply of old rags is affected by the cutting off of the importations from the European peasantry and by the demand for the making of guncot-ton. The chemicals used in bleaching

by the cutting off of the importations from the European peasantry and by the demand for the making of guncot-ton. The chemicals used in bleaching the paper produced by sulphuric acid and alum are being devoured by the manufacturers of explosives, while im-portations of jute have failen off until the price is doubled. An embargo has been placed on shipments of wood pulp from Norway and Sweden, while Canada stopped access to her vast re-sources some time ago. The newspa-per publisher is, indeed, hard hit by war conditions in many other items of supplies besides the basic one of paper stock. Practically everything going into the manufacture of a daily newspaper has increased in price from 10 to 50 per cent—inks, owing to the advance in the cost of acids and dyes, from 300 to 3000 per cent; type, owing thinned out by artillery and machine gun fire so that a reformation became necessary, the order to retire was

Twice they were obliged to fill up the gaps in their ranks, but none of

"Saviour of Paris" Must Quit

Ordinary powders and dynamites waste much of their energy by shattering and pulverizing. To get the best

results in land-clearing operations the explosives should disrupt, crack, split and heave the stumps and at the same time lift and remove the roots for easy handling. The explosives that do this are

-made by a Western Company especially to meet Pacific Coast conditions. More than 2,000,000 pounds used every year for stump blasting in Washington and Oregon alone.

There are two Giant Farm Powders - Giant Stumping Powders for wet soil and Eureka Stumping Powder for blasting in dry soil. They do their work at the lowest possible cost.

Test one case. Compare it with any explosive that you have ever used. After you have blasted a dozen stumps you will understand why those who have once used them always continue to use Giant Farm Powders.

Our free book on Stump Blasting Subsoil Blasting, and Ditch Blasting. Write today for the book in which you are interested. Your name on a post-card will bring it.
