## BUY DIRECT \$2 MARK POSSIBLE IN WHEAT MARKET

Great Excitement Prevails on Boards At Chicago This Week.

PRICES HIGHEST SINCE 1888

Conditions Considered Dangerous by Many Traders - Corn Reaches Highest Mark Since 1867.

Chicago-Speculation has gone wild in everything, especially in foodstuffs, with grains taking the lead. There has never been anything like the spec-ulative buying and advancing tendency of values, as shown in the wheat mar-ket of late.

ket of late.

A 13-cent advance in 24 hours was followed by an eight-cent break and a 12-cent bulge. To see December wheat sell at \$1.90 in Chicago, \$1.97\frac{1}{2} in Minneapolis, \$1.85 in Kansas City, \$1.89\frac{1}{2} in Winnipeg, and \$2.02\frac{1}{2} for durum wheat in Duluth, and \$2.08 for the cash article of the latter variety in Minneapolis, is expressing that the in Minneapolis is something that the grain trade of today has never experi-

Predictions of \$2 wheat at Chicago, which were not expected to be realized before next March or April, may become a reality this week, unless some-thing develops to check the bullish enthusiasm and the heavy volume of buy-ing, despite the fact that prices have more than doubled within about a year. Wheat prices are the highest 1888, when the market was artificial. Present prices are legitimate, as prices the world over are abnormally high. So long as nothing develops to disturb the confident feeling existing among holders, there is no telling how high prices may go. The

farmers are met by the advance and interior reserves are being reduced, while the visible supply is increasing.

There is a general impression in the trade that the bulk of the cash Decemer wheat in the United States and Canada is owned by foreigners and exporters. They are expected to take a delivery of the cash grain in Decem-

ber.

Cash corn sold up to \$1.121 for No. 2 yellow last week, or the highest since 1867. Corn at \$1 a bushel and over looks high by comparison, but with wheat above \$1.90 it is not out

Premium Paid to Holland.

Washington, D. C .- A new arrangement for diverting Dutch products under which England will be assured of obtaining a greater percentage than she has been able to get by purchase the open market in competition with German buyers was reported to this government. The report says England will pay for many Dutch agricultural products the same prices she now is paying her colonies, the English government making good the difference between such prices and those paid by Germany.

Negroes Moving North, Washington, D. ALLIES DEVELOP OWN RESOURCES: BECOME INDEPENDENT OF U. S.

New York-The necessity for the United States to show a proper appreciation of the business received in the way of war orders from the entente al-lies is the subject of a statement is-sued here Tuesday by Henry P. Davi-son, of J. P. Morgan & Co., detailing his impressions of the financial and military situation that he found on his recent trip to Great Britain and France. He returned Monday from England, after having assisted in the arrangement of the new \$300,000,000 British loan.

"It is perfectly clear that if we regard Great Britain and France as degard Great Britain and France as de-sirable customers and wish to continue to sell them our products," the state-ment says in part, "we must treat them as a producer usually treats a de-sirable customer, in which event I am confident we will continue to supply them largely, not only during the war, but for the reconstruction period which will follow.

"Great Britain and France have not only carried on the war on the Western front, but have at the same time developed their own manufacturing resources in a way which surpasses be-lief, so that today they find themselves well equipped and in a position to pro-vide not only for themselves, but in a large degree to assist their allies. "In stating this I do not mean to

imply that there are not many things they will require from us, as they did before the war, and will after. I do mean that there are many supplies which they would rather purchase from us than produce at home, reserv-ing the resources required for such production for other purposes to their better advantage. The point is that today their position is one of indepen-dence compared with that of two years
