Uncle Sam's Models Show Man's Rise From Burden Bearer to Master of Air

The photograph shows the most conspicuous leaps of progress, covering many centuries of time, in the development of means of transportation, as illustrated by models gathered by the Smitheonian Institute. The models show nan's evolution from the state of a burden bearer to that of master of the air. The flying machine shown is the first gliding model.

On these the Indians and colonists piled thier game, fuel and forage and even used such conveyances to transport people. A primitive sledge made from the forked limb of a tree and covered with cross sticks was probably the next step. This was attached to the animal by something similar to traces and permitted to drag on the ground. Simple straps like the Eskiground. Simple straps like the Eskiground. mo dog traces were primitive forms of the modern trace. Rough parallel runners were soon found to make the sledge slide easier and before long a shown by the federal consuses of 1900 pintform was built upon the runners. Thus the siedge was developed and used by most peoples, whether there was snow in their country or not.

Enter the Roller. Having first transported burdens on his own back, or that of his animal, and then dragged them along the ground, man seemed to have realized that cylindrical objects might be rolled. History relates that rollers with a small diameter were used as such by the ancients of many nations, under sledges, and for moving large blocks of stone with the assistance of a lever or an inclined plane. Another method is illustrated in the museum by a model of a short stone pillar attached by plyots in the center of each end to a Kentucky frame which, when pulling, caused the Mipillar to roll, a method said to have Mi been adopted by Cteslphon when transporting the columns for the temple of Diana at Ephesus. In Virginia and the neighboring states hogsheads of tobac-co were rolled along much the same as the above stone. Two barrels coupled N in tandem within a frame were transported in this manner from the forests to the shipping point, as shown by the next model in the series. Another miniature illustrates a scheme of Paconius, who built cylindrical crates around marble prisms in the first century, B. C., when moving stone for the base of the colossal statue of Apollo. It is believed that the roller, or this

rolling crate, was the forerunner of the wheel, which was the first great step in the art of land transportation, although the advance was very slow with the ages. The idea of making the axie and wheel separate was the second great step and no greater discovery has ever been made. The invention of the felloe and spoke soon followed and eventually a complete cart try business."

"Then I'm the very man you want to meet. I can supply your needs. I'm thinking of going out of the poultry business."—Louisville Courier-Journal.

lowed and eventually a complete cart or carriage was evolved. The first vert to meet. I can supply your needs. I'm thickes were equipped with but two thinking of going out of the poultry wheels, made of wood. Examples of early Egyptian chariots modeled after early Egyptian charlots modeled after early Egyptian charlots modeled after originals dating back to the Ptolemaic era, 300 B. C., are to be seen in the miniatures exhibited. From here on, many models illustrate the rapid advances. Among them are a "carreta" or ox-cart created in Spain and used in New Mexico until recently; a Per-sian farm cart of 1870; a Red River cart, common in the United States and Canada; a conestoga or "prairie schooner," said to have traveled from Pittsburgh to Philadelphia in 20 days; an example of the famous colonial "one-hoss shay," celebrated by the United States geological survey, Holmes; a stage coach used between department of the interior. BAD TAKE SALTS been eating too much

IF KIDNEYS ACT

When you wake up with backache and dull misery in the kidney region it generally means you have been eating too much meat, says a well-known authority. Meat forms uric acid which overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and loggy. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels; removing all the body's urinous waste, else you have backache, sick headache, dizzy spells; your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, wa

Either consult a good, reliable phy-Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Saits; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous saits is made from the acid of grapes and lemon juice, combined with lithia, and has been used for grapes and lemon juice, combined with lithia, and has been used for grapes and lemon successful to become a scene of intensive activity. There is bined with lithia, and has been used for generations to clean and stimulate sluggish kidneys, also to neutralize acids in the urine so it no longer irri-tates, thus ending bladder weakness. Jad Salts is a life saver for regular meat eaters. It is inexpensive, can-not injure and makes a delightful, ef-fervescent lithia-water drink.

WEATHER BUREAU IS AID TO FARMER

Says Backache is sign you have System for Giving Warnings Has Been Highly Developed.

GIVES PROTECTION TO CROPS

Man Take an Umbrella May Result in Intense Activity in Agricultural Districts.

Few city people reading Uncle

Sam's weather forecasts in their morn ing papers realize the importance warning of rain, snow, frost, or high winds may have for the farmer, fruit sediment, channels often get sore, wa winds may have for the farmer, fruit ter scalds and you are obliged to seek grower, or stock raiser in the country. The message which causes the city man merely to debate whether he shall carry an umbrella or take his over scene of intensive activity. There is a rush to hay or grain fields to get in the crop or, in the spring, work like beavers covering young seedlings in the truck gardens with paper or other protection from frost, or preparing to build fires or light smudges in orchards. On ranches every available worker may be dispatched to herd in sheep or stock to protect them from storms. To them the message, which in the city may have foretold only slight personal discomfort, carries ild-ings of conditions which may mean heavy monetary losses to the unpre-pared farm or ranch.

On the other hand a forecast predictng good or hot wenther for three or four days to came may send thousands of reapers into the fields to take advantage of favorable weather, and, as if by magic, change the landscape from one of waving grain or grass into a scene of haycocks, or wheat sheaves.

Special Systems Perfected. The United States weather bureau

perfected special systems and facilities for obtaining and disseminating advance weather news adapted to the protection of growers of many spe-cial crops in different sections of the country. In connection with the weather reports received from 1ts 200 stations and from 4,500 other observation points, the bureau has established a large number of special stations for observating crop weather conditions in the corn, wheat, cotton, sugar, rice, and cattle-raising districts. The object of this service is to furnish the growers of each of these crops throughout the summer with information that will enable them to handle the crops to best advantage. The corn and wheat region service covers, for example, the 15 principal grain states, in which it low's number?
Second Officer—No, he was going too fast.
First Officer—Say, that was a fine looking dame in the car.
Second Officer—Wasn't she!—Puck.

Suffered Great Pain!

Letter Tells of Long Looked-for Prescription

Dear Mr. Editor—I am making a personal appeal to your readers who are bothered with kidney and bladder trouble and rhoumatism, to give up the use of harsh saits, or alcoholic kidney medicines and in their place take a short-treatment of "Anurie" and be convinced of its wonderful virtues as I was. I suffered great pain, had a creat deal of irritation, water became foul. I tried everything advised but with no results. I sent for a box of "Anurie Tablets" and soon discovered that they brought relief. I have used them since, and not the water is matural, my health good, and appetite splendid. Some of the doctors pronounced my trouble enlarged prestate. Now I have no more trouble and I most assuredly feed that this latest discovery of Dr. Pierce's is the best remedy for hladder and kidney troubles that I know of. If I can induce anyone to give it a trial, I feel that he will thank me for calling attention to this great boon that relieves this seemingly worst of all troubles that human flesh can fail heir to. Dear Mr. Editor-I am making a per (Signed) H. H. FLEISHUEL

Nors: Up to this time, "Anuric" has not been on sale to the public, but by the persuasion of many patients and the increased demand for this wonderful healing tablet, bottor Plerce has finally decided to put it into the drug stores of this country within immediate reach, or send 10 cents for large trial package.

Simply ask for Dector Pierce's Anuric Tablets. There can be no imitation. Every package of "Anuric" is sure to be Dr. Pierce's Avortic Prescription, the ever-famons friend to alling women, and Dr. Pierce's Golden Medical Discovery, proven by years to be the greatest general tonic and reconstructor for any one.

At any rate don't give up hope of boing cured of your malady until just a few doses of "Anuric" have proven that it will make you fed like a different person.

Elorros-Please insert this letter in some conspicuous piace in your paper.
