USES FOR SOY BEANS

Soy beans seem to have a great many uses. Among the differ ent uses listed by the department of agriculture are the grinding of meal and feeding, which has the double purpose of furnishing feed for cattle and making a manure that has especially strong fertilizing value; milk may be made from them, as is done in Japan, and s vegetable cheese made from the milk; they may also be made into a flour for the manufac-ture of crackers, breads, etc., that are of value in cases of diabetes, and a good oil may be extracted from them.

ausing his heps to die.

Upon visiting the farmer's poultry yard, a member of the poultry department found 75 hens had died during the summer. The livers of dead hens were found to be enlarged, fowls were overfat, and the yard in which they were kept was bare. The owner stated that when he shut up his birds, they did not die, but that when he turned them out, he would lose one or two hens each day.

Moldy grain was found to be the ource of his trouble. His wheat was grown on low land that was submerge luring heavy rains at threshing time and the grain molded rapidly when pu into the bin. Also, as the corn crib had no door, sun and rain could beat in freely, and the corn looked dry and bright on top, but was moldy underneath. Consequently his flock received nothing but moldy grains, with the re sult that many died.

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a cer-tain amount of incombustible material in the form of ashes, so the food and drink taken each day leave in the allmentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishmen

tended to suck in only nourishment to sustain the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract, before putting more food into the stomach.

Men and women with sallow skins, Men and women with sallow akins, liver spots, pimples or pallid com-plexion, also those who wake up with a coated tongue, bad taste, nasty breath, others who are bothered with headaches, bilious spells, acid stom-ach or constipation should begin this phosphate hot water drinking and are assured of very repropued results in

phosphate hot water drinking and are assured of very pronounced results in one or two weeks.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshehs the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more iminternal sanitation is vastly more im-portant than outside cleanliness, be-cause the skin pores do not absorb impurities into the blood, while the wel pores do.
