#### HARMONIZING UNCLE SAM'S WAR WORK

Each of the ten cabinet officers has appointed a representative from hi department to make up a committee which holds daily sessions with the coun oil of national defense. The object of the committee is to co-ordinate the entire government machine so that it may approach the task of military, na val and industrial preparedness to the best advantage. Seated in this group, left to right, are: William C. Fitts, department of justice: William M. Ingra ham, assistant secretary of war; Louis Freeland Post, assistant secretary of labor. Standing, left to right, Dr. B. T. Galloway, agriculture; Frank Frayser, post office department; Lathrop Brown, Interior, and Leland Harrison, department. Mr. Harrison is the state department's press censor.

# GOOD INVESTMENT Should Be Kept From Firing Line,

Judgment of Man Who Engineered Deal Fifty Years Ago Has Been Vindicated.

#### WEALTH IN NORTHERN EMPIRE

To Have Neglected Opportunity to Obtain Territory Would Have Been Colossal Blunder, Says Secretary Lane.

"Fifty years ago," says Secretary ane of the United States department of the interior, "Alaska became a part of the United States.

"We are only beginning to realize how tremendous the service was that William H. Seward performed when he ecured for us that great source of ealth. When Seward was secretary wealth. of state, few men realized the great potential value of Alaska. Popular impression held it a snow-bound wilderess, a land of ice and polar bears. Seward felt that the time would come tound the world. His judgment today

"Opposition to the taking of Alaska was as blind as it was virulent. But after fifty years, actual financial statements show us, and prove conclusively, that to have neglected that opportunity would have been a colored by would have been a colossal blunder, a blunder future generations could

"A moral obligation was one of the primary reasons that led to the pur-chase of Alaska. Russia had given us the passive support of two fleets of warships during our Civil war, and saved us from serious indignities that threntened from abroad. Russia needed money. We, of course, could not give it to her outright, but we could let her have it and take in exchange ber barren North American provinces. In the face of a storm of protest the treaty was signed and fully ratified; the Russian ambassador collected \$7,-200,000 from Uncle Sam; and Alaska edged her way into a protesting and inhospitable democracy.

Cost Two Cents an Acre.

Cousin Elmer had a big boil on the back of his neck that was interfering seriously with his enjoyment of the spring and the world in general, and the conversation at the dinner table turned from cousin Elmer's allment to a general discussion of boils.

When a lull came, John, age 8, who had been listening intently, spoke up: "The last boil I saw, papa, was in the tea kettle."—Indianapolis News.

No Doubt About That,

"What! Paid \$50 for a bat? Woman in the Country, and the profits are just beginning to come in. A scant 65,000 people are living in that vast country, one-fifth as large as the United States. One hundred million to the states day. After a call at the United States Marine corps he decided be would give up newspaper work and follow the fortunes of the "soldiers of the sea." He sent his report back to the editor by messenger.

### BUYING OF ALASKA CHEMISTS WAR FACTOR

Says U. S. Aid.

Needed in Making Munitions, Testing Foods and Perfecting Other Industrial Activities.

"The chemist and mining enginee will play a most important part in winning the war for the United States." sald Charles Curtis, superintendent of Uncle Sam's customs assaying labora-tory in Kansas City, Mo.

"The development of explosives and poison gases is wholly a chemical proc-ess. The problems of trench digging, mining and other earth operations are those of the mining engineer.

"Recognizing these facts, the American Chemical society has offered its services to the president, and is mobilizing its forces for war.

"We are in the best possible position to take advantage of the experience and mistakes of the other countries. Germany has made a terrible mistake in sending her chemists to fight in the trenches. Several hundred of the most eminent chemists in Germany have been killed, and their services are lost not only to Germany, but to the world when the wealth of Alaska would as- The chemists should be kept out of the firing line and put to work in making

be employed, such as bromine or fluor ine. These things are positively devil-ish, and it is terrible to think of using them, but it seems that war stops at nothing these days."

Uncle Sam's Apple Expert Makes Concentrated Cider.

No Manufacturer Will Market It for None Can Get Exclusive Use of the Formula.

With the problem of finding a way to utilize the vast percentage of waste in the annual apple crop of the land, one-fourth of which is lost in the orchards, H. C. Gore, chemist in charge of Uncle Sam's fruit and vegetable utili-zation laboratory, discovered that this great apple loss was not so much due to lack of cold storage and marketing conditions as to a lack of knowledge on the part of the farmers as to what to do with the culls and apples for retall sale that would net them any

Clder-making, though neither difficult nor expensive, did not give the solution, for it is so perishable, so bulky, and the price it brings too low to make it profitable. So, also, cider

to lks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible mater. the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stom. contrated nonfrozen liquid which possessed all of the flavor, but which possessed all of the flavor, but which contained much less water. The outer ice proved to be mostly water, with very little of sugar. Analysis of the contained any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keeping you feeling fit day in and day out. sessed all of the flavor, but which contained much less water. The outer ice proved to be mostly water, with very little of sugar. Analysis of the concentrated cider proved that it contained sufficient proportions of the acid and sugar to preserve it, and the chemist believed that at last had been found a means to keep cider for the

Laboratory experiments duplicating nature's freezing finally established the fact that concentrated cider would keep much longer than in its original dition and in cold storage would

keep indefinitely. Delicious as this new kind of cide is, it is not being adopted commercially, for the simple reason that no manufacturer is willing to put it on the market, though all who have sampled market, though all who have sampled it admit its superiority to many of the soft drinks which now are popular at the soda fountains. The reason is that ier-Journal. Uncle Sam will not give the formula exclusively to any one bottler. The leading drink purveyors insist that commercial success in marketing a new drink depends chiefly upon the manufacturer having the exclusive secret and patented recipe which will give his brand a monopoly.

However, being always paternal, Uncle Sam has gone still further in his efforts to teach the apple raisers the full value of their crops, for he has had his chemists compile and issue a bulletin with all of the methods, directions, cost and even recipes for the utilization of cider made in this new way, and then teaching ways of making splendid apple sirup that is marketable. The same builetin gives out pain. recipes for a number of dishes which the sirup forms part.

#### \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Seek Heirs of Men Who Died in Uncle Sam's Army

The endeavor of the European nations to locate the relatives of men who have fallen in battle while serving the various foreign legions bears an interesting comparison to similar efforts now being undertaken by Uncle Sam to trace the relatives service who have died, some of whom have left valuable prop-

erty. The United States Marine corps issued a bulletin containing the names of Sergt. Albert Jolly of Melbourne, Australia; Corporal Thomas Brophy of Dublin, Ireland, and Private Owen Woods (former address unknown), in a further effort to locate their heirs or next of kin. These men, who have been dead over ten years, left effects of ous inquiries during that period ful heirs.

Recipe of Sage Tea and Sulphur.

Hair that loses its color and lustre, or when it fades, turns gray, dull and lifeless, is caused by a lack of sulphur in the hair. Our grandmother made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful, and thousands of women and men who value that even color, that beautiful dark shade of hair which is so attractive, use only the old-time recipe.

Nowadays we get this famous mixture improved by the addition of other ingredients by asking at any drug store for a 50-cent bottle of "Wyeth's Sage and Sulphur Compound," which darkens the hair so naturally, so evenly, that nobody can possibly tell it has been applied. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning the gray hair disappears; but what delights the ladies with Wyeth's Sage and Sulphur Compound, is that, besides beautifully darkening the hair after a few applications, it also brings back the gloss and lustre and gives it an appearance of abundance.

Wyeth's Sage and Sulphur Compound is a delightful toilet requisite to impart color and a youthful appearance to the hair. It is not intended for the cure, mitigation or prevention of disease.

That's What He Meant.
