to Forget Your Aches and Palne

and the Bad Weather. It was a wise old wif who remarked that if talk about our aches and pains were suppressed a third of the conver-sation of civilized life would cease. If to this interdicted subject were added that of unsatisfactory weather another

third would be chopped off.

It is amazing to hear humanity devoting so much of the brief time allotted us here to painfully detailed diag-notes of our headaches, backaches, stomach aches and innumerable other

The comical part of it lies in the solto the other. He or she knows, however, that his or her turn comes next, and the laxury of unloading sickening accounts of sickness will be indulged.

Many of us are not miserable enough with the pains of the present, but must treasure up the pains of the past as constantly accumulating reservoirs of misory and borrow them of the future as a debt under which to groan and

if we could forget it all and permit schers to forget it, throwing open our spiritual side to the boundless blesshe a offered it, what a universe of lov and theer and brightness before unseen would lie before us!

It is all a matter of mental turn. We tray shut the shades of the windows of our minds on the sunny side and moan in darkness, or we may open the same windows wide and laugh in the smallight.—Christian Herald,

#### FORGED ANTIQUES.

Even British Museum Experts Have Been Fooled by Them.

"antiquity" manufacturer is man who thrives on expert forgery. Furniture, prints, china, pictures, plate, tapestry-he initates them all most successfully. Each man has his specialty. One devotes himself to old leather jacks, another produces horn books, a third turns out "medleval"

The British museum once bought a Palissy plate for \$250. While an attendant was handling it one of the sends attached to its back attesting its genulneness became detached, discloslag the mark of a modern French pot

On other occasions terra cotta fig ures of Isis and Osiris, bought by the institution for hundreds of pounds, have been discovered to be composed

of modern clay.

A good story is told of a forged silver cup in Rome that purported to have come from some secret excavation in Si fy. This ancient cup was ornamented with a circular bas-relief. representing the friene of the Parthenon. But in the height of his inno cence the forger had given the frieze to its present ruined condition. The exhibition of the cup was received with shouts of laughter. - London

Effect of Bad Tooth.

A paper by a dental surgeon in the Journal of the American Medical association, tells the story of bad teeth end the effects on the laboring man's efficiency. The dentist said be made 30,000 examinations in sixteen months of 17,000 Americans and 13,000 foreigncra and found 96 per cent in need of dental service. "In 30,000 mouths," the dentist said, "we find 62,000 cavi-tles and 18,000 extractions necessary, 18,000 in all. If each one causes an average loss, through waste of time and cost to repair, of \$2 it means a cost of \$156,000. In New York city List year 67,000 children falled to be promoted to higher grades because of defective teeth, and it costs New York city \$1,007,695 to duplicate a year's schooling to those who fail."

Digestibility of Cheese.

By experiments on the digestibility of cheese it has been shown that much depends on the special physical char-acters of the food. All fat cheeses are great rapidity, because the molecules cheese-are separated only by the fat, large surface of the cheese at one time. Whether the cheese be hard or soft does not appear to influence digestion, and there is no connection between the digestibility and the percentage of wa-

### The Churches,

Methodist Episcopal Chu h. Commencing next Sunday morning I shall preach a series of doctr and sermons. This is my first at mpt at such sermors. I shall make them ar-tumentative in nature and base the corcus ons upon the scriptures of both old and new testaments together with the inferences drawn ly scholars of today including clergymen and laymen. If any have questions to ask up-in the topics suggested berewith these inquiries will be gladly received and answered to the test of my ability. These are subjects dealing with Christian fundamentals and have no cirect reference to any organized religious nodies of today. They have primary reference to each individual's relation to God and to man.

to God and to man,

"Flying" Am ritara. William and Grylle Wright beman their experiments with the aereplane fourteen years before the great con-fit awakened Americans to the wonderful part that mirerall was to play in warfare. The first tight of these famous brothers over the barren sand dunes at Kitty Hawk, N. C., lasted but twelve seconds. It was mucher Amer lean, Gleun II. Curtiss, who made the first successful flight in a flying boat. He was then working on seroplanes for the navy and experimented with a biplane equipped with floats. Giving this up for one with a true bont body, straightway came success. That was in 1911, and the first great stride toward giving the American navy Its feet of fighting boats that fly followed five years later, when congress set

Star pazers of northern lands offer overlook the fact that some of most belinne and beamful stars fluest nebulae and star clusters in the heavens belong to the southern hem isphere and are not visit le la our latt

Magnificent blue Canopita, the se ond brightest star in the heavens, Ees Just, below our southern horizon in the large and important conthern constellation Argo Navis, named for the famous ship of the Argonauts. It is usually divided into three constellations-Puppis, Carlus and Vola. Canopus was the chief pilot of the Argonauts, but the star was known and worshiped on the banks of the Nile long before ft received its name from the Greeks and has been called the Star of Egypt It has also been a cuide to many telber in Africa, South America and Austra-In in their journeys through pathless

Although Sirius appears pearly twice as beilliant as Canopus, this is due only to the fact that Sirlus is compara tively near to us, not quite nine light years distant, while Canopus has been estimated to be at a distance of 460 light years. It is, as far as we know. the greatest of all the glant sons. equal in light giving power to 55,000 suns such as our own. Sirius, with a brilliancy estimated at forty-eight times that of the sun, shrinks into a pygmy when contrasted with Canopus -New York Sun.

CARVED JADE.

It Takes Chinese Patience to Work This Hard Oriental Stone,

When you go tuto an oriental shop in any big city you are almost sure to see rings or neckiness or branelets which are a pretty, clear green in color and are made out of fade. If you ask the shopman to tell you something about jade he will answer that the true jade is seldom found outside of Asia and Oceanica, but that in these parts of the world it is to be had in considerable quantities.

mond is so hard that it will scratch glass, but perhaps you have not heard that Jude is also extremely touch and will cut glass and quartz. Because of Its great hardness the man who carves It must possess vant patience, and the Chinese are almost the only people who have sufficient patience and persistence to carve designs in Jade.

The Chinese make numberless arti-

eles out of Jude-paper weights, ban-dies for swords, beits, bangles, rings, venes, cups, plates, pendants, and so on.
Jade is far from cheap to buy. Now adays fine pleces of jude are just as much valued among collectors as are one pathtings for their great beauty and artistic value. So, then, if a me-one gives you a little pendant of carr-ed lade, you will understand that you have a present which not on'y would be valued highly today, but one which many peoples in all times would have treasured.-Christian Science Moulton
