Red Cross to Care for Uncle Sam's Men in Germany.

Speedy Relief Made Necessary by Fact That Rations Given Captives by Teutons Are Inadequate.

The American Red Cross has perfect-

There are now comparatively few American prisoners in Germany, Most of these are civilians taken off American merchantmen that have been sunk by submarines. More recent arrivals in the prison camps had served as gun crews on merchant ships.

Speedy provision for their relief and for those who may be taken prisoners is necessitated by the German policy of giving prisoners food totally inade-quate to keep them in good health.

A recent cable from Paris tells of a French soldier just back from a German prison camp and in the last stage of tuberculosis. This soldier was one of a battalion of a thousand young and healthy men captured in a body, early in the war. More than 50 per cent of the number are now dead, or have been returned to France, via Switzerland, as incurables,

Malnutrition, no less than unsanitary conditions, produces these results. Brit ish, Canadian, and Australian prison ers of war in Germany now depend exclusively upon food shipped to them from London and generally give the prison camp rations to prisoners of other countries, who are, as a rule, less well provided. Bread is already being dispatched from Berne to the Americans in Germany, and arrange ments have also been made for trans mitting letters and money from their families and friends in this country.

Thus far bread only has been supplied by the Berne committee of the American Red Cross. Assorted food parcels and clothing will also be for warded. In the meantime the Central Prisoners of War committee of London is acting on behalf of American prisoners in Germany, sending them such foods as the committee regularly dispatch to British and colonial prison

By arrangement with Germany these food parcels are sent to the prisoners three times a fortnight. Each of the parcels which supplement the bread, also regularly supplied, contains ten pounds of meat, butter, sugar, jam coffee or tea, salt, rice, and dried The American Red Cross is forwarding to Berne stocks of the same foodstuffs, as well as cheese, evaporated milk, codfish, and mixed biscult. Tinned goods cannot be sent to prisoners, for Germany has made over the tin containers as hand gren

#### WILL AID DIRECT MARKETING

Uncle Sam's Field Agents Will Endeav or to Foster Dealings Between Producer and Consumer.

#### \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Crops Worth Millions Are Saved From the Squirrels

More than \$1,000,000 worth of crops were saved from ground squirrels in North Dakota this year as a result of a campaign-conducted by the department of agriculture in co-operation with

state authorities. Similar savings may be effected elsewhere in the vast area infested by these animals," according to a department state-

The squirrels on 7,000,000 in North Dakota were killed by means of poison at a cost of about five cents an acre. Nearly 20,000 farmers assisted

Similar work has been started in Montana, Idaho and Oregon and interest is being developed in Nevada and California in organizing like campaigns of ex-

Not Called "Dead Sea" in Bible. The name of "Dead sea" occurs no where in the Bible. This name does not appear to have existed until the nd century after Christ. In the Old Testament this body of water is called the Salt sea and the Sea of the Plain.

Market for Boots A firm in British East Africa is in the market for leather and canvas boots and shoes of all kinds for men and women, about \$5,000 worth of which can be used annually.

Geep Coops and Houses Clean and Get Rid of Vermin.

Every effort must be made to keep the coops and houses of little chicks clean and sanitary. Disease most frequently starts in unclean, poorly venti-lated houses. Clean the house at least once a week. Sand or litter of some kind scattered over the floor of the ed plans for Americans who may be captured and held in German prison range, it is well to spade up the ground range, it is well to spade up the ground camps. A prisoner's relief committee at frequent intervals, so as to provide has been organized at Berne, Switz-fresh ground for them to scratch in. If has been organized at Berne, Switz-fresh ground for them to scratch in. If erland, under the supervision of Ellis L. Dresel of the American legation, Mr. made to get rid of them, by applying included relief work for men of the entents nationalities in German prison will. Keep 'em well!

### LIGHT HORSESHOE IS IDEAL

Keeps Foot Level and Takes Greater Pressure From Toe-Owner Thus Lessens Grain Bill.

The ideal horseshoe is one which is light, consistent with a month's wear. This will keep the foot level instead— as is the case with a heavy shoe and heels of putting the greater pressure on the toe. Very careful examination and calculation has proved that if a four-pound shoe is used—as is sometimes the case on heavy horses-a horse, in an ordinary day's work lifts 52 tons on each foot, or 208 tons in all more than is necessary. This, of course involves a needless expenditure of mus cular energy, and more feed is needed to keep the animal in proper condition. With a lighter shoe the owner would not only relieve the horse, but lessen his grain bill.

#### WIRE SPLICER EASILY MADE Neat and Strong Device Can Be Made With Little Instrument Shown

in Illustration.

The neatest and strongest wire splicer can be made with this little instrument, says a Minnesota writer in The Farmer. Take a strip of iron one inch wide and one-eighth inch thick. Cut one end narrow and bend into a hook large enough to fit neatly

A Wire Splicer.

the largest wire to be spliced. At the sides of the hook two notches are filed. Turn splicer backward to make the splice. Use a pair of large pincers to

#### GIVE TURKEYS BEST OF CARE

Provide Place Where Fowls Can Roost by Themselves and Don't Overfeed-Keep Off Lice.

When hatched under chicken hens they are almost sure to have the large body They acquire these in spite all efforts to prevent.

## BEES HELPFUL TO ORCHARDS

ney Gatherers Cannot Perforate Skin of Fruit—Damage is Done by Some Other Agent.

The idea that bees do harm in an orchard has been disproved in an investigation made at Florence, Italy. The bees cannot perforate the skin of the fruit, and the damage is due to hornets, wild birds, wind or hall. By sucking injured fruit the bees really prevent fermentation and the spreading of rot. They also render service in the cross pollination of flowers and the resulting setting of fruit, orchards and vineyards frequentel by them bear most regularly.

Where Leached by Rains or Otherwi Value is Practically Nothing— Hardwood Best.

Ashes from soft woods only are of little value as compared with hard-wood ashes and doubtless are of less value than ashes from trash piles or garden accumulations of weeds, etc. When soft ashes have been leached by rains or otherwise their market value is practically nothing.

#### BLANCHING ENDIVE IS EASY

When Leaves Are Dry Bring Up and Tie Together-Untie After Rain to Let Them Dry.

(By LE ROY CADY, Associate Hortier turist, University Farm, St. Paul.) Endive may be blanched by bringing the leaves up together and tying. This must be done when the leaves are dry. It is a good plan to untie the leaves after every rain and let them dry out otherwise they may decay.

Use for Coal Ashes. Coal ashes are used largely for the physical effect of breaking up a com-pact, heavy sell. Such ashes do not take the place of fertilizer.

Cut at Right Time. Do not cut the grass a day too early or a day too late. Send in the mower just when the blooms show like a mist

## WILL FEED PRISONERS HEALTHY CHICKS GROW FAST ADVANTAGES IN MULES \$ 100.00

**Have Faculty of Adapting Them**selves to Any Condition.

Superiority They Hold Over Horses In Many Ways Compensate for Objectionable Length of Ear and Kicking Habit.

Those who are accustomed to hand ling mules and who know of their re markable faculty for adapting the selves to almost any condition, realize their value and do not hesitate to pay well for good animals.

The advantages they possess over horses in many ways compensate for the somewhat objectionable length of ear and exaggerated reputation for kicking. They are ready to work when two years old and on account of their toughness and steadiness of

nerve may be kept at it twice as long as horses are fit for service. Mules can be raised more cheaply than any other stock, and, unlike horses, will never founder themselves if by chance they should have access to more feed than is good for them. They can be horses, and if properly handled, when and stand it better, than four-year-old tract diseases than horses, and their Appeal. value is not decreased by blemishes as is that of horses. Mules seldom run away, but when they do they seem to run more from sport than trigger and generally wind up safely. They instinctively avoid holes, obstacles or divide the newspaper more amicably when she's satisfied with the society when she satisfied with the satisfied with the society when she satisfied with the satisfied with the society when she satisfied with the society when horses and can always be relied upon. They are sensitive as well as sensible animals, responding quickly to kind treatment by docility and gentleness.

The great profit in mule raising lies largely in their growth. Mules grow so quickly that they are marketable when three years old, while horse colts cannot advantageously be sold under five years. In this way the cost of feeding and the trouble and risk of raising are decreased.

Buyers will always handle good Don't overfeed the turkeys, and almules, as the demand for them is ways have a place where they can steady. Where large numbers of mules roost by themselves. If kept with are raised there are always plenty of chickens, they soon become lousy. It mule buyers in that section of the does not take many lice to kill a country. Buyers do not go where there young turkey. The best way to keep are no mules to sell. In time of war poults from getting lousy is to keep mules are always in great demand and the old ones free from lice and then bring good prices owing to their pow-hatch the eggs under the turkey hens.

Comparing cattle with mules, one steer will eat as much as two mules. As compared with swine, if the same amount of feed that is fed to a bunch of hogs is fed to mules it will not take long to find which makes the most noney, aside from the fact that there is no risk from cholera.

#### ONIONS PLANTED IN AUTUMN

Multiplier Can Be Grown From Sets and Will Produce Excellent Early Vegetables.

There are several kinds of onions that may remain in the soil over win-ter. The multiplier, or potato onion, for example, can be planted from set in the autumn and will produce excellent green early onions. A large onion of this type contains a number of dis-tinct hearts, and if planted will produce a number of small onions. On the other hand, a small onion contains VALUABLE AS A FERTILIZER but one heart and will produce a large onion. A few of the large ones may lowing year's planting.

#### KEEP CHOLERA OUT OF HERD First Thing to Do Is to Keep Hogs Clean—Keep Them Out of Wallow Holes and Dirty Places.

If you want to keep cholera out of your herd the first thing to do is to keep the hogs clean. Keep them out of wallow holes or filthy places and see that they have clean beds. Do not let the sows that are going to farrow run with the rest of the hogs. Keep lime water where the hogs can get a drink of it once a day but they should not be made to quench their thirst on this. Give a tablespoonful of oil cake for each once a day in

#### **CULLING AS CHICKENS GROW**

Special Tag Band Should Be Put or Particularly Promising Specim Note Its Development.

It is a good plan to cull the flock as the chickens grow. When a particu-larly promising specimen is noted, that is full of life and vigor and growing all the time, a special leg band may be put upon it and note taken of its development. Successful poultrymen know their best breeders from chickod to maturity.

# Baltimore American. A Medicine for Women

### For Forty Years Lydia E. Pinkham's Vegetable Compound has Relieved the Sufferings of Women.

It hardly seems possible that there is a woman in this country who continues to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

> Mrs. Kieso Cured After Seven Month's Illness. Aurora, Ill.—"For seven long months I suffered

Aurora, Ill.—"For seven long months I suffered from a female trouble, with severe pains in my back and sides until I became so weak I could hardly walk from chair to chair, and got so nervous I would jump at the slightest noise. I was entire y unfit to do my house work, I was giving up hope of ever being well, when my sister asked me to try Lydia E. Pinkham's Vegetable Compound. I took six bottles and today I am a healthy woman able to do my own housework. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound, and find out for herself how good it is."—Mrs. Karl A Kiese, 596 North Ave., Aurora, Ill.

Could Hardly Get Off Her Bed. Cincinnati, Ohio.—"I want you to know the good Lydia E. Pinkham's Vegetable Compound has done for me. I was in such bad health from female troubles that I could hardly get off my bed. I had been doctoring for a long time and my mother said, I want you to try Lydia E. Pinkham's Vegetable Compound. So I did, and thas certainly made me a well woman. I am able to do my house work and am-so happy as I never expected to go around the way I do again, and I want others to know what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. Josie Copner, 1668 Harrison Ave., Fairmount, Cincinnati, Ohio.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a worman and held in strict confidence.
