

GET WELL

Thousands of sufferers who have
FAILED
to get relief in any other way, are invited to investigate Chiropractic methods, which are permanently curing hundreds every day.

Chiropractic is the Safe, Sane, Sure and Modern science of curing and preventing disease.

Chiropractic will permanently cure 95 per cent of all diseases.

Chiropractic removes the cause; health returns.

The Best of Chiropractic Doctors will thoroughly diagnose your case and direct your treatment FREE. In the Clinic department of college.

Hospital. The college conducts a hospital in connection with the school where patients from a distance can have room, board and all Chiropractic service at a very small cost.

Don't Suffer. Get Well. For full information and reservation in hospital department, address Dr. Oscar W. Elliott, President.

LESS MEAT IF BACK AND KIDNEYS HURT

Take a glass of Salts to flush Kidneys if Bladder bothers you.

Eating meat regularly eventually produces kidney trouble in some form or another, says a well-known authority, because the uric acid in meat excites the kidneys, they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.—Adv.

Anxious.
Sister—Is George waiting still?
Willie—Not very still. He acts kind of nervous. Guess he's going to propose.—Brooklyn Citizen.

Jawing.

LOSSES THROUGH SWINE DISEASES

Cholera, Tuberculosis and Parasites Are Drawbacks.

SIMPLE METHODS ARE URGED

Farmer May Avoid, to Large Extent, Decimation of His Herd by Epizootics—Sanitary Preventive Measures Are Favored.

The greatest drawbacks to the hog industry that breeders in this country have to contend with are the losses through hog cholera, tuberculosis, and the infestation of the animals, especially young pigs, by parasites. Were it not for the fecundity of swine their profitable production in the presence of these serious diseases would be out of the question. In the following remarks on sanitation no attempt is made to go into the details of the diseases affecting hogs or their treatment. The object is merely to call attention to the simple measures which may be used by any farmer to avoid, to a large extent, the decimation of his herd by epizootics. Cleanliness and rational methods of management are relied upon by thousands of farmers to keep their herds in health and vigor. They are the marks of the good farmer and successful hog breeder.

Hog cholera and swine plague, both highly fatal diseases characterized by fever and heavy mortality, are so very similar that the breeder may regard them as identical so far as his practical management of the herd is concerned. Positive differentiation between the two diseases can only be made by the most careful bacteriological tests, and by employing the assistance offered by a fully equipped laboratory. However, sanitary preventive methods which are found beneficial with one of these diseases will prove equally efficacious with the other.

There are a few fundamental facts which the breeder must remember if he is to avoid losses through hog cholera or swine plague. The first is that they are specific diseases caused by germs, and the contagion can be spread from one animal to another or from one herd to another except through the agency of these minute organisms. They may be carried in a multitude of ways—by the hogs themselves, on the clothing of persons, on vehicles, in feed, by birds, dogs, and other animals, or by streams. The breeding or feed of a hog cannot cause either disease, although bad methods may so weaken the constitution and vitality that the animal becomes more susceptible to them than would otherwise be the case. Since these diseases can only arise from the presence of these specific causative agents, it can readily be seen that dentition and the presence of supernumerary teeth or black tusks cannot, as has been suggested by many, play any part in their development. A second fact to be borne in mind is that diseases caused by germs may be best prevented or controlled by thorough disinfection and scrupulous cleanliness.

Tuberculosis Increasing.
Tuberculosis is rapidly increasing among hogs in the United States, and every owner of swine should be on his guard against the introduction of this serious malady upon his premises. Unlike hog cholera this disease is infectious in its attack and slow in its development, so that it may be present for months in a herd without exciting the least suspicion of the owner, and will be revealed to him only at the time of slaughter. Until recent years tuberculosis has been looked upon as of uncommon occurrence and only of importance from a meat-inspection standpoint; but today it must be recognized as a serious menace to the owner of hogs, and especially to the owner who allows his hogs to run with cattle that have not been proved to be free of tuberculosis, or who feeds them upon nonsterilized products as part of their ration. As tuberculosis of hogs is chiefly contracted through eating infected feed, the importance of this statement is obvious.

Danger in Inbreeding.
While inbreeding is the surest and quickest means to fix type, it should be resorted to with the greatest care. The value of the system is that it enables the breeder to intensify desirable characteristics in a herd and makes improvement possible in a shorter time than where selection alone is used. It stands to reason that if desirable characteristics can be intensified, the same will be true of undesirable ones. Much of the disaster which seems to have followed inbreeding has probably been due to the fact that this point was overlooked or given only slight importance, and thus loss of vitality and constitution and susceptibility to disease have followed. Therefore if the young breeder contemplates inbreeding, he should avoid matings that tend to unite similar defects. Not only should care be taken to prevent this in the animals mated, but there should be no chance of bad effects due to the inheritance of undesirable characteristics, from parents and other ancestors. Some of the greatest work ever done in hog breeding has been based on these principles.

Drain Wet Spots on Farms
The production acreage can be increased by drainage—Can Be Made to Return Good Profit.

The production acreage can be increased on many farms by drainage. Many wet areas are being cultivated which do not produce profitably and are often a hindrance in planting and proper cultivation of the rest of the field. These places are found along the creek bottom, and on seepy hill-sides. They are very fertile and can be made the most productive part of the farm by tile drainage.

Large Farm Machines Best
Make Seed-Bed Preparation More Timely and Economical—Also Increases Farmers' Efficiency.

The use of large farm machines makes seed-bed preparation more timely and more economical, increases the farmers' efficiency, reduces man-labor requirements per acre, results in better quality of work, makes large-acre farming possible and profitable and farm life more satisfactory and more enjoyable.

SAGE AND SULPHUR DARKENS GRAY HAIR

It's Grandmother's Recipe to Restore Color, Gloss and Attractiveness.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome. Nowadays, by asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recipe, improved by the addition of other ingredients, for about 50 cents.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, glossy and attractive.

Comparative Happiness.
"I'm so happy! My heart is full of laughter."
"So am I happy. My cellar's full of coal."—Exchange.

Signer Himself.
"You'll find my ancestor's name on the Declaration of Independence."
"Well, you'll find my name on the registration lists of 1917."—Kansas City Journal.

The Proper Term.
"Yes, I am going to move to Boston."
"When do you matriculate?"—Louisville Courier-Journal.

Nom de Plume.
"What is the name of that handsome young woman?"
"No, 2206, miss," replied the guard.
"How funny! But, of course, that is not his real name."
"Oh, no, miss; that is just his pen name."—Boston Transcript.

Natural Proceeding.
"Pa, do they muzzle poets?"
"Of course not, child. Why do you ask?"
"But don't poets have to have a license as well as dogs?"—Baltimore American.

In a Dry Town.
"Everybody in Crimmon gulch seems to think prohibition is a good thing," remarked the stranger.
"Yep," replied Broncho Bob. "A man kin go ahead now an' drink plain water without gettin' the reputation of bein' stingy."—Exchange.

WOMEN'S PART IN WAR
Shall we say that women contribute only the bandages, the socks and the ties? No, they do the fighting!

The Usual One.
Manager—Has this play of yours any plot?
Aspiring Author—Oh, yes. It's a scheme of mine to make money quick.

THE BEST BEAUTY DOCTOR

MARKETING COSTS FOUND TOO LARGE

Uncle Sam's Experts Seek to Eliminate Losses in Handling Farm Products.

TERMINALS TOO NUMEROUS

Investigators Propose Remedies for Evils Which Directly Affect the Prices Received by the Farmers.

The farmer has a direct interest in the efficiency of the marketing organization in cities, according to officials of Uncle Sam's department of agriculture, since lack of efficiency may be reflected in the poor prices he receives for his products.

Sooner or later, it is argued, the great majority of the perishable products raised on the farm for sale finds its way to the cities for distribution, and, whether it passes from the ownership of the farmer before or after reaching such centers, the sales are usually based on city quoted prices.

Many farm products, especially perishables, are consigned to city commission merchants to be sold for what they will bring, the prices received in such cases being directly dependent on their city market value. Prices based on these values are paid also when such products are sold by the producer directly to wholesalers or jobbers at or shipment to city trading centers. Even the products which the farmer sells at the nearest railroad station are bought largely for consumption in cities and so are paid for, in most cases, at prices which are dependent on those prevailing in city markets. The city, therefore, through the operation of city demand in relation to supply, largely determines the prices which the farmer receives for his perishable products.

Study Distribution System.
The office of markets and rural organization of the department has taken up as one of its important studies city marketing and distribution. Through this project the aim of the office has been to study marketing conditions in various cities; to determine as accurately as possible the sources of loss and waste in city marketing and the methods by which such losses and wastes may be eliminated; to develop general plans for efficient marketing facilities of various kinds for cities, and to aid by specific suggestions such cities as may seek assistance in improving their marketing conditions.

The general fact, it has been found, is the existence of numerous terminals separated from each other and from the wholesale district. In some cases it was found that there are as many as a score of separate terminals existing in a city. Shipments for a given dealer may arrive at a number of these terminals on the same day, necessitating much more costly cartage or the employment of many more salesmen than would be necessary if but a single terminal for perishables existed, and the wholesale dealer has his store located conveniently to it. Every extra handling, every square of extra cartage and every additional salary paid increases the labor cost of marketing, which must come out of the margin between the producer's selling price and the consumer's buying price.

Separate Terminal Proposed.
The aggregate losses and additions to marketing costs, due to inefficient terminal facilities, are so great in the average large city that market specialists believe it would be a feasible plan in many instances for the communities to promote and finance a separate terminal for perishables which would be connected with all railroads.

The studies that have been made of the various kinds of market institutions have enabled the office of markets and rural organization to offer an advisory service to cities, truck growers and produce dealers' organizations, which has proved very helpful. It is said that this service has been carried on so far in some 25 or more cities, and the officials think that the widespread demand for other places is an indication of the general interest in marketing questions.

BIG INCREASE IN NEW GOLD
Uncle Sam Adds \$98,891,000 Worth of Yellow Metal to His Total Wealth in One Year.

Uncle Sam added new gold to his total wealth during 1915 to the amount of \$98,891,000, which is almost a record, and a gain of \$4,305,300 over 1914. If we add to this the gold ore mined, but not smelted yet, the total passes \$100,000,000—every penny of it new wealth.

Says the joint report of geological survey and the bureau of the mint: "An increase in the yield of gold is indicated by the mine returns from every important gold-mining state, and a decrease is reported from Washington, while the output of Idaho remains the same."

"The preliminary estimates indicate an output of 67,485,600 fine ounces of silver, valued at \$34,417,850. Although not the record output of 1914 in quantity, the value, based on the low average price of 51 cents per fine ounce for 1915—the lowest in the history of the industry—was considerably below the values for 1914 and many previous years, when production was smaller but prices ruled higher."

"Increases in the mine production of silver were especially notable in Montana, Utah and Arizona, and were considerable in Idaho, Alaska, New Mexico and Texas; but large decreases were reported from Colorado and from Nevada following similar decreases in 1914."

For a Hard Winter.
During the past hundred years the worst winters have generally followed wet and cold summers, with little sunshine.

SUFFERING FROM COLD

If you shiver in frosty weather, if you have cold hands and feet, if colds are stubborn and frequent, then your blood may be thin and impoverished.

SCOTT'S EMULSION

has been correcting this condition for nearly fifty years. It possesses rare powers for creating natural body warmth, for charging summer blood with winter richness and strengthening both throat and lungs.

The Norwegian cod liver oil in Scott's Emulsion is now refined in our own American laboratories which makes it pure and palatable. Scott & Bowne, Bloomfield, N.J. 17-12

MURINE Granulated Eyelids.
Sore Eyes, Eyes Itched by Sun, Dust and Wind quickly relieved by Murine. Try it in your eyes and in baby's eyes. YOUR EYES ARE SCORING! Just Eye Comfort Murine Eye Remedy At Your Drug Store, or by Mail, 50c per bottle. Free. Ask Murine Eye Remedy Co., Chicago.

Very Concise.
A certain teacher asked her pupils to bring in "three items of information" about the river which flowed by their town; and from one boy she received this model of concise composition: "I have lived near it. I have skated over it. I have fell into it."—Exchange.

Anticipated.
"You know, Gladys, since I promised you a diamond ring, diamonds have gone up so—"
"And you want to make sacrifices to prove your love for me? You darling boy!"—Exchange.

The Village Belles.
"What called you to go to the village church, old maiden?"
"Why, the belles."
"The belles?"
"Yes."
"Take care you don't have to ring one of them."—Exchange.

The Brute's Revenge.
"But couldn't you learn to love me, Stella?" he pleaded.
"I don't think I could, Frank," she replied.
He stood erect, then quickly reached for his hat. "It is as I feared—you are too old to learn."—Tit-Bits.

A Blow for the Bench.
The judge (to jury who have retired several times without agreeing)—I understand that one jurymen prevents your coming to a verdict. In my summing up I have clearly stated the law, and any jurymen who obstinately sets his individual opinion against the remaining 11 is totally unfitted for his duties.

The Solitary Objector—Please, m'ud, I'm the only man who agrees with you!—Passing Show.

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.

Not So Bad.
Mrs. Suburbs was on the way home from the musical show. "I think," she said primly, "that those ankle watches are positively immodest."

"How do you say?" replied Mr. Suburbs soothingly. "The ankle watch is very modest. It keeps its hands before its face all of the time."—Exchange.
