## Gold Won by Our Ships

### Prosperity of Merchant Marine Due to the War

Washington.—The present golden era for American shipping, resulting from great demand for ocean tonnage, and the extraordinary profits that have been made in our carrying trade by sea, have been shown by research to be a recurrence of similar conditions that have prevailed three times before in the history of the American merchant marine.  
Whenever there has been an extraordinary condition to change political or economic balances in this or other great countries, prosperity for shipping has followed, say experts of the United States shipping board.  
In proof of this they point to the great expansion of our foreign trade following both the Revolutionary war and the War of 1812, by which the merchants of New York and New England were enriched, and also the fortunes made by American ship owners following the Mexican war, with its resulting great rush of pioneers to the new gold state of California.

None of the stories of fabulous earnings of vessels in the merchant marine in the first three years of the present war—before the shipping board began regulating freight charges at sea—are more interesting than those of the wealth won by ships owned in old Salem, Mass., in the period in which their owners were developing American trade with distant parts of the earth, following both peace treaties with England.

In 1790 the ship Mt. Vernon of Salem made a profit of \$100,000, four times her original cost, on a single round trip to China, going out with sugar, and returning by the Mediterranean, where she took on silks and wines for the American market.  
The owner of the Mt. Vernon, Elias Hasket Derby, died while she was on this voyage and left an estate valued at \$1,000,000, the largest American fortune to that time.

Salem captains were ever on the alert for new ventures in those days of rich profits. When in 1795 Capt. Jonathan Carter of Salem heard by word of gossip when ashore at Barcelona, Spain, that pepper grew wild on the coasts of Sumatra, he noted the information carefully. On his arrival home he imparted it to Jonathan Pelee, a Salem merchant, who forthwith fitted out the schooner Rajah, and dispatched her to Sumatra.

The Rajah brought back the first full cargo of pepper to be landed in America, and her owner reaped the tidy profit from its sale of 700 per cent on his investment.  
Certain ships, known for their lucky voyages, made fortunes for their owners. One famous in the annals of that period was the ship George—known as the "Salem frigate"—which made regular voyages to the East Indies for 22 years, accomplishing 21 voyages in all, and earned a fortune for George Pebody, afterward famous as a millionaire philanthropist.

The value of her cargoes may be judged in that in her 22 years of active existence there was paid on them at the Salem customhouse, in import duties, not less than \$600,000.  
The George was a tiny ship, as vessels go nowadays, being only 114 feet long, yet she proved a shining example in other ways of the glories of the early American merchant marine. She had the reputation of carrying the most intelligent crews to be found anywhere—except possibly on certain other American ships—and was famed for the number of men who graduated from her forecastle to the quarter deck.

When she sailed on her first voyage to India, in 1815, hardly a man in her crew was twenty-one years old, yet each was an experienced seaman, and nearly every one was a navigator.  
Of the sailors who served on her in her long and prosperous career, 45 became captains, 29 chief mates, and six second mates. Thomas M. Saunders, who served on her as a boy, passed through every grade—of ordinary and able seaman, third, second and chief mate—and ultimately became her captain.

The case of the George has been cited as an example of the beneficial effect of continued prosperity on a nation's merchant marine.  
Not less than 7,000 men signed articles in the counting room of Joseph Penbody to man his fleet, the various craft which made 38 voyages to Calcutta, 17 to Canton, 32 to Sumatra, 47 to St. Petersburg and 30 to other European ports.

In the later period of the so-called clipper ship era of the merchant marine, great profits were made by American ships at a time when the vessels of other nations were grubbing for charters. This was due to the superior speed of the American vessels.  
The Rainbow, the first distinctly clipper ship built anywhere, cleared

200 per cent profit on her first voyage to China, in 1846.  
The Oriental, an American clipper built in New York in 1849, to compete with the English tea ships, earned \$48,000 in freight money on her first cargo of tea from Hong-Kong to London. Her cost was \$70,000.  
In the gold rush to California, in 1849 and 1850, many ships earned more than their value in a single voyage. Demand for space regulated the charge for carrying freight, as it does now, and the top price reached was \$60 a ton.  
At this rate the ship Samuel Russell earned \$72,000 in freight money on one voyage—more than her cost.  
Some of the charters made in the earlier period of the war for American vessels were on such a liberal basis that the freight money for a single voyage to Archangel, for example, paid for the ship making the voyage, a condition to be looked for, say the experts, in times of abnormal demand for cargo space.

**Food Problem**  
By Dr. Samuel G. Dixon  
Commissioner of Health of Pennsylvania

Most of our foodstuffs are made up of different constituents. A potato is largely composed of starch, whereas beefsteak is largely composed of nitrogen or protein. Starch represents so many heat-producing units, and beefsteak likewise produces its own quota.

This is so when you consider the matter from a laboratory standpoint, but if you made a test of the same values by feeding these foods to human beings you would find the values varied greatly because of the variations of the human or organic machinery which handled them. Starch, for instance, in the cases of some individuals, passes through the digestive system without the body assimilating it and obtaining the addition of its heat units. In the cases of other individuals, the same thing would happen with beefsteak.

For this reason we must remember, when advising foodstuff for a community, that what is one man's meat is another man's poison. Thus it behooves those who have the power to regulate foodstuffs for a community to be liberal enough in drawing up their lists to meet the demands of the different capabilities of the digestive system of the different individuals. In other words, one capable of making a rational selection must have a thorough knowledge of the physiology of foodstuffs.

The people of the state of Pennsylvania eat too much potato. The large proportion of starch in the composition of this vegetable produces a catarrhal condition of the digestive tract, which interferes with digestion and leaves the patient insufficiently nourished, eventually over a long series of years producing starvation.

Meat, as a rule, is also over-eaten by Pennsylvanians. Just now, however, during the tension of the war, we need more meat than usual.  
It should also be kept in mind that meat will be more easily produced during the war than will vegetables, for our trouble will be the want of male help to carry out the continuous demands occasioned by the cultivation of vegetables during all stages from planting to gathering, whereas cattle can in great measure take care of themselves, and what human help is required need not be of the highest development, either physical or mental.

**To the Point.**  
A face that never wears a smile should be avoided.  
He who prates men and flatters women has many fair-weather friends.  
No, Robert, the starboard of a steamer is not reserved for the star boarders.  
A man can't have his cake and eat it, too—especially on his first trip across the pond.  
The bachelor is the prune of the human family and the spinster is the preserved peach.  
It isn't necessary that a brilliant conversationalist should know what he is talking about.

Save sugar in cooking rhubarb, cranberries by adding the sugar after the cooking and using a little corn starch for thickening, cook well after adding the corn starch.  
**Cereal Coffee.**  
Mix together thoroughly two quarts of bran, one quart of whole ground cornmeal and a cupful of molasses. Rub together with the hands until the whole resembles moist brown sugar. Turn into two large dripping pans and brown in the oven, stirring often. Store in airtight fruit jars. Use two tablespoonfuls to cupful and half of boiling water. Boil twenty minutes.

Save all fats, the reason they are so scarce and so necessary is that explosives are made of glycerine and glycerine is made of fats.  
Save on butter, by using oleomargarine or any vegetable butter.

**Mother's Cook Book.**  
War Time Dishes.  
A two-pound cut of short ribs cooked in a kettle as stew with a bunch of carrots put around it while cooking and about twenty minutes before meal drop in a few potatoes to cook, the meat seasons and flavors the carrot and the carrots sweeten the meat. The broth may be saved and used for soup, adding an onion, a tablespoonful of rice and egg noodles or any vegetables left over from a previous meal. Cut up a tablespoonful of parsley in the soup just before serving.

**Bread Crumb Bread.**  
Take two pounds of left over bread, crusts, or rolls, soaked well in plenty of water then squeeze out and pass the mixture through a sieve to make it fine grain, add two tablespoonfuls of molasses, a half teaspoonful of salt, and a half cupful of home made yeast, knead in flour until well mixed, let rise, mold into loaves and bake.

**Spot Cash we will Pay!**  
We do Not Charge Commission.  
We are buying as follows for fat produce:

Sliced ham, 18c.  
Big dressed veal up to 300 lbs., 14c.  
Live chickens, 22c.  
Live roasters, 18c.  
Small dressed goats, 12c.

**FRANK L. SMITH MEAT CO.,**  
"Fighting the Beef Trust."  
228 Alder St., PORTLAND, ORE.

## SALTS IS FINE FOR KIDNEYS, QUIT MEAT

Flush the Kidneys at once when Back hurts or Bladder bothers.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Ad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders.

Ad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complications.—Adv.

**Strict Regulation**  
Freeman was visiting at his grandpa's home, and as he was a mischievous little chap, was constantly being told "Don't do this," and "Don't do that." Finally, with a look of disgust on his face, he climbed up into a chair and said solemnly, "What can a fellow do in this house, anyway?"—Exchange.

**Winter Skepticism.**  
When touched by frost, the waters sleep.  
The ice, at least, should be quite cheap. Yet human faith has failed a lot. And something tells us it will not.—Washington Star.

**Obedying Orders.**  
"See here, daughter, didn't I tell you that young man of yours must keep early hours when he calls?"  
"He does, pa. He never leaves later than 11 a. m. Could he keep any earlier hours?"—Exchange.

**Noncommittal.**  
"Jones told me this morning his fiancée was light headed, and I said 'is she?'"  
"Why weren't you more sympathetic?"—Exchange.

**Good Training.**  
"How very fluent your parrot is."  
"Yes; I always hang his cage up in the room when my wife's 'lab meets here."—Baltimore American.

**WHEN IT LOOKS DARK to any weak or ailing woman, Dr. Pierce's Favorite Prescription comes to her help.**  
For "female complaints," pains, internal inflammation or ulceration, bearing-down sensations, and all other ailments of the female system, Dr. Pierce's Favorite Prescription is the only medicine that can be guaranteed. "Favorite Prescription" will benefit or cure, in the case of every tired and afflicted woman.  
An easily procured vegetable pill is made up of May-apple, the dried juice of the leaves of aloes, and the root of jalap, made into a tiny pellet and coated with sugar. It was first put into ready-to-use form by Dr. Pierce nearly 50 years ago. Almost every drug store in this country sells these vegetable pellets in vials for 25c—simply ask for Dr. Pierce's Pleasant Pellets. They have Dr. R. V. Pierce stamp.—Adv.

**Pawed Over.**  
"Are these hats felt?"  
"Frequently, mum, but we don't like it, I can tell you."—Louisville Courier-Journal.

**Cuticura Stops Itching.**  
The Soap to cleanse and Ointment to soothe and heal most forms of itching, burning skin and scalp affections. Ideal for toilet use. For free samples address, "Cuticura, Dept. X, Boston." Sold by druggists and by mail. Soap 25c, Ointment 25c and 50c.—Adv.

**Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative—three for a cathartic.**  
**His Status.**  
"The tenor who sang last night reminded me of a pirate."  
"Why so?"  
"Because he did murder on the high C's."—Baltimore American.

**Whenever there is a tendency to constipation, sick-headache, or biliousness, take a cup of Garfield Tea. All druggists.—Adv.**  
**A Dangerous Guest.**  
"That fellow who hinted on being thorough. Wherever he goes he gets to the bottom of things."  
"Then please don't invite him on our yachting trip."—Baltimore American.

**RELEASE OF ENERGY.**  
"So you approve of the government's action in taking over the railroads?"  
"Yes," replied Mr. Grover. "I approve of that and prohibition for several reasons, one of them being that now a lot of people can quit lecturing on the subject and go to work."—Exchange.

## DAIRY

**SELECT DAIRY COW BY TYPE**  
Milk Production and Reproduction Are Essential Functions—Records Are Lacking.

The essential functions of the dairy cow are milk production and reproduction. According to L. W. Wing, Jr., of the Missouri College of Agriculture, the most accurate methods of determining these are:  
(1) Milk production by means of the milk scales and the Babcock test;  
(2) Reproduction by breeding records.  
There is only a small proportion of the cows used for dairy purposes on which such records are kept. This necessitates the employment of some other method of selection. In the breeding of high producing animals through several generations it has been observed that there are certain characteristics of the conformation which are correlated with large production. These characteristics are: (1) Extreme angular form, carrying no surplus flesh, but in good physical condition. (2) Prominent development of the udder and veins. (3) The symmetrical development of the barrel with large capacity. After one becomes familiar with these external characteristics it is possible to select cows producing 300 pounds of fat per year from those producing 150 pounds. The difficulty comes in picking the animal that will produce 500 pounds of fat per year compared to the one producing 400 pounds.

The selection of animals by this method is rather uncertain. Until records are kept of more animals or some other means devised for selection, the selection by type should be used and it is up to everyone interested in dairy cattle to become familiar with it.

**LEGUME HAYS ARE VALUABLE**  
Utilization of Alfalfa or Clover Party Solves Dairyman's Problem of Feed.  
(By G. E. WEAVER, University Farm, St. Paul, Minn.)  
One hundred and seventy-five pounds of good alfalfa or clover hay is worth as much as 100 pounds of the ordinary grain feeds. With the present prices for feeds ranging from \$25 a ton for bran to \$85 per ton for corn, the average cost for 100 pounds of grain is about \$2.75. The cost of its food equivalent in the form of 175 pounds of legume hay is \$2.15. This much hay will produce 200 pounds of milk and effect a saving in feed cost of 60 cents, which is at the rate of 30 cents for each hundred pounds.

The utilization of such hay partly solves the dairyman's problem in these days of high feed cost and milk investigations.  
**HEIFERS OF GOOD BREEDING**  
No Stock More Profitable as They Consume Less Compared With Growth They Make.  
No stock pays better to grow at this time than young heifers of good breeding. They consume less feed compared with valuable growth than almost any other animal and there sure will be a good market awaiting them when they begin to be cows. They should be kept thrifty and doing their best, though—and a very little grain will do this.

**Good Cow in Hands of Unintelligent Dairyman Is Most Undesirable Dairy Proposition.**  
A good cow in the hands of a poor dairyman is a poorer proposition than a poor cow in the hands of a good dairyman. Both are very poor combinations, however; a good dairyman will not keep a poor cow more than one season.

**STRONG FENCING FOR STOCK**  
Where This Improvement Has Been Overlooked There Is Sure to Be Trouble in Herds.  
Remember that it takes a good strong fence to hold the cows and calves apart during the long winter months, and where this improvement is lacking there is sure to be trouble for you.  
Frequent Cream Deliveries.  
Make as frequent deliveries of your cream as possible. Suit the size of the can to the size of your herd. Ship at least twice a week in winter.

**Sufficient Nutrition.**  
The average cow producing 15 pounds of milk a day will get sufficient nutrition from the alfalfa hay and silage.  
**Qualifies Cow as Desirable.**  
It is the yearly test that qualifies a cow as a desirable animal or not.

## WILL YOU BE ONE?

Thousands of thoughtless people neglect colds every winter. A cough follows; they get rundown—then stubborn sickness sets in. Sickness can be prevented easier than it can be cured and if you will give your system the benefit of a few bottles of

## SCOTT'S EMULSION

you will find your whole system strengthened. It will fortify your lungs and throat and enrich your blood against rheumatism. It is powerful concentrated nourishment without alcohol or opiates. Don't neglect taking Scott's—commence today.

The imported Norwegian cod liver oil always used in Scott's Emulsion is now refined in our own American laboratories which guarantees it free from impurities. Scott & Towne, Newfield, N. Y.

**VAUGHAN'S PORTABLE DRAG SAW**  
Cuts 20 Cords in 10 Hours  
THE ORIGINAL. THE LIGHTEST. THE STRONGEST. HAS MANY Imitations. BUT NO EQUALS.—Write for Information.  
Vaughan Motor Works, 475 E. MAIN PORTLAND, OREGON.

**IF HAIR IS TURNING GRAY, USE SAGE TEA**  
Here's Grandmother's Recipe to Darken and Beautify Faded Hair.  
That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application of two Sage and Sulphur enhances its appearance a hundredfold.  
Don't bother to prepare the mixture; you can get this famous old recipe improved by the addition of other ingredients for 50 cents a large bottle, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural color and lustre of your hair.  
Everybody uses "Wyeth's" Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous. This ready-to-use preparation is a delightful toilet requisite for those who desire dark hair and a youthful appearance. It is not intended for the cure, mitigation or prevention of disease.—Adv.

**Why Pay High Prices for Soaps?**  
Send us \$2 and receive by return mail \$3 worth of retail price of Wash and Hand Soaps, together with Afta and Furniture polish, and for a premium, the Formula to make at home for very low cost. Write today.

94 Eleventh St., PORTLAND, ORE.

**HAVE YOU BARRAN COWS?**  
Are your cows or sows troubled with Abarria? Overcome the difficulty by feeding BREEDING TONIC. Price \$1.00. It acts on the organs of reproduction and put the animal in better breeding condition.  
Read the Practical Home Veterinarian. Send for free book on Abarria in Cows. If no dealer in your town, write to Dr. David Roberts' Vet. Co., 100 Grand Ave., Washburn, Wis.

**BIRCH MOTOR CARS** Super four 8000; Light far out-class other similar priced. 1 c. h. Chicago, Distributor, J. Schlatter, Box 711, Twin Falls, Idaho.  
**EVERLASTING GRIMM AND COSSACK** Alfalfa plants \$4.50 per 1000 prepaid. Also Dakota grows Grimm seed. D. K. Noble, Salem, Ore.

**The Final Reason.**  
Officer (wearily)—Now, Smith, you have already had leave because your wife was ill, because your little girl had measles, and because you had to attend the christening of your youngest son. What—what is it this time?  
Private Smith (briskly)—P—please, sir—I'm going to get married.

**Probably?**  
"Who's that you're waving at?"  
"An old flame of mine."  
"I suppose your father has to put him out whenever he calls."—Brooklyn Citizen.  
**Sometimes It Can't be Done.**  
"Early to bed and early to rise" is a good old motto.  
"Well," replied Granma Rilem, gloomily, "this daylight saving's all right, of course. But out our way somebody's simply got to stay up all night to tend the furnace."—Washington Star.

**In the Animal Store.**  
"What on earth did the crank want, you were so short with?"  
"What did he want? Oh, nothing we couldn't supply. He only wanted a sun-dog, a moon calf, a sea peep and an ocean greyhound."—Exchange.  
**Acts Like It.**  
"There is one force which always wears a fatigue uniform."  
"Who are they?"  
"Messenger boys."—Baltimore American.

**Garfield Tea, by purifying the blood, eradicates rheumatism, dyspepsia and many chronic ailments.—Adv.**  
**On His Dignity.**  
"What'll you say, ol' man, if your wife asks if you've been drinkin'?"  
"I sh't tell the queen-hun with (hic) dignified shillence."—Brooklyn Citizen.  
As we grow more sensible, we refuse drug cathartics and take instead Nature's herb cure, Garfield Tea.—Adv.

**Release of Energy.**  
"So you approve of the government's action in taking over the railroads?"  
"Yes," replied Mr. Grover. "I approve of that and prohibition for several reasons, one of them being that now a lot of people can quit lecturing on the subject and go to work."—Exchange.

**SUFFERING CATS!**  
GIVE THIS MAN THE GOLD MEDAL  
No hump! No cough! No sneeze! Whether hard, soft or between the toes, will loosen right up and lift out without a particle of pain or soreness. This drug is called frezone and is a compound of ether discovered by a Cincinnati man.  
Ask at any drug store for a small bottle of frezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callous.  
Put a few drops directly upon any tender, aching corn or callous. Instantly the soreness disappears and shortly the corn or callous will loosen and can be lifted off with the fingers. This drug frezone doesn't eat out the corns or callouses but shrivels them without even irritating the surrounding skin.  
Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have frezone have him order it for you.—Adv.
