Spitzbergen Rich Land.

Spitzbergen, virtually the only "No Man's Land" of any value left on the earth, promises to present an important question after the war ends. Jutting up from one of Europe's most northerly points toward the regions of perpetual ice, Spitzbergen received little attention from world powers even those near by, until its important mineral resources were revealed. By some it is said the country will prove to be a second Alaska in the surprises awaiting its complete exploration and study.

Coal in apparently unlimited quantities, easily mined without shafting abounds in Spitzbergen. Besides there are found deposits of iron ore, marble, copper ore, iron and copper pyrites, molybdenum, galena, zinc blende and other minerals.

Will There be Sugar Enough for Canning Purposes?

A good many customers have been asking this question and it is answered by the Food Administration in their Bulletin No. 686, February 21, 1918.

There Will be Plenty of Sugar But There Will Not be Jars Enough

In order to take proper care of your needs, we would suggest the following:

Order at once or soon, all the jars you think you'll need. We have only a limited quantity of jars purchased, and do not expect to be able to get any more when these are gone. We Give Fair Warning—first come, first served. We have the Kerr line of fruit jars, as we consider them the best on the market. This line consists of:

Kerr regular Mason Jar, Kerr wide-mouth Mason jar, Kerr Economy Jar, Kerr Jelly Glasses, Kerr caps and lids for all jars.
