Because Portland and Seattle shipbuilders make a scramble for the milk bottles when the noon whistle blows they are becoming famous and to the fact that they drink milk is attributed their ability to do better work than any other shipbuilders.

Now comes San Francisco showing she, too, has taken up the habit. The Pacific Dairy Review says "one distributor alone supplies 1,500 quarts daily to men in the Union Iron Works," although, the review adds, "in San Francisco, the milk-drinking habit is still in its infancy." Here's another argument for keeping up the dairy herds. The milk bottle is backing the beer can off the map. Time was when the men of the iron works would have "rushed the can" as they termed getting their beer.

"The food value of a quart of milk is the equivalent of three fourths of a pound of beef, two pounds of chicken or eight eggs. Compare the costs and milk wins." Dr. E. V. MISUNDERSTANDING CLEARED UP

A misunderstanding relative to the canteen work of the Y. M. C. A. has been cleared up by the War Department, which issued the following:

"Matter of prices asked by Young Men's Christian Association for its articles sold in canteens overseas already investigated by war department and condition is being remedied. The Young Men's Christian Association was originally asked by General Pershing to run the canteens for the army on a cost basis. In order to do this it had to reckon in price fixing such overhead charges as transportation charges and marine insurance so that prices were much higher than in this country.

"The Young Men's Christian Association made no profits, but lost thousands of dollars. Arrangements now made will enable them to obtain supplies from sources that will reduce overhead charges and keep prices down."

Huts for Nurses

Huts for nurses are maintained by the Y. W. C. A. at the base hospitals in France. To extend this work a portion of the United War Work funds to be raised in November will be used.

PERSHING'S "DO WITHOUT IT" CLUBS

Organization of "do without it" clubs in America, as a means of aiding the United War Work campaign, which open November 11, was recommended by James F. Pershing, brother of General Pershing, in an address delivered recently in Portland in behalf of the drive. He urged the American people to make some sacrifices in order to help "carry on" the great undertaking that is to furnish money for war work in the battle zone during the coming year. A great percentage of American people, he said, do not know, from any sacrifices made thus far, that a war is in progress. Relaxation of activities because of peace proposals, he declared, should not be tolerated, and asked people of the country to throw their whole energy and co-operation behind this latest drive for securing funds for the seven big war-working agencies consolidated in the campaign.
