The present eastbound rail rates on wool from Oregon points are around \$2.70 per 100 pounds. Woolgrowers, contending that the rate is excessive filed a petition with the interstate commerce commission for joint rail and water rates on shipments through the Panama Canal. Denial of the petition has been recommended by Howard C. Faul, the examiner.' Portland, San Francisco and Los Angeles joined the railroads in opposing the joint rates on the ground that were they granted, the rates would tend to concentrate the wool business of the country at Boston and other Atlantic points, and check development of Pacific coast wool markets.

Our quality has been a revelation to some people who have been told or who have imagined that because our prices were low the grade of our goods was correspondingly low.

A single visit to our Store-wherever it may be located; in any of the 44 States in which we operate-will quickly dispel such thoughts and claims. It will establish in your mind beyond a shadow of doubt, that article for article and dollar for dollar more in genuinely reliable and standard quality can be had than is ordinarily obtainable.

Bear in mind that with the tremendous buying power for our hundreds of Stores goes a selective power that assures us the better grades of goods.

This being the last week that we will be open for business in Athena, we wish to thank our many patrons for their loyalty and it is only on the account Athena being too small that this store is being moved to a larger town. We respectfully solict your continued patronage in our stores that are near by, Pendleton, Milton and Walla Walla. "ge Bonney Co.

At their next session, Canadian law makers have promised a dose of legislation that will place the fruit business on the square.
