A Magnificent Production

of the Secret Service

"3 FACES EAST"

The various powerful dramatic scenes of "Three Faces East" are bound to thrill all screen fans. What can be more romantic in the way of the introduction of such a story as this, than an air duel high above the trenches in Northern France? A British plane and a German Fokker are shown maneuvering in thrilling combat, the British machine finally staggering and half-falling to the ground, a victim of anti-aircraft marksmen. From the half-demolished aircraft crawls "Frank Bennett," brought down behind the German lines—a strange meeting of old friends—and the story begins.
