

LOW RATES for time payments on these cars

ANY FAMILY entitled to credit may buy a General Motors car and pay for it while using it, under the GMAC Plan.

When time payments first became an accepted form of car purchase, General Motors organized its own finance company, the General Motors Acceptance Corporation, to make sure that the sale of its cars on time would be in the buyer's interest and that the finance charges would be fair.

GMAC rates have always been low; and the last reduction has saved General Motors' customers more than \$12,000,000.

The General Motors line includes "a car for every purse and purpose"—a suitable model for every income. You can buy it out of income, paying no more than the cash delivered price, plus only the low GMAC financing charge. And the whole transaction is so conducted as to keep your goodwill and satisfaction.
