

All these closed cars have FISHER BODIES

THE mechanical performance of General Motors cars is tested and proved on General Motors' 1,245 acre Proving Ground. Before any new model is put in production, it must pass more than 135 different tests for power, speed, durability and general performance.

As to the appearance and comfort of General Motors cars, we invite you to be the judge. Every closed body is built by Fisher—the largest builder of automobile bodies in the world. The experience and the vast production of the Fisher Company mean more beauty, more comfort, and more luxury than you will find anywhere else at corresponding prices.

We invite you to check, on the coupon below, the cars that appeal to you most. Complete literature will be sent to you, without any obligation.
