McFADDEN'S PHARMACY

A "used car" is unused transportation

A GOOD automobile is built to stand years of use. It will provide many thousands of miles of satisfactory transportation.

But only occasionally are all its years and all its mileage used up by one owner. Many owners turn their cars in after an average use of only two to three years—long before the cars' lives have been exhausted.

This custom brings into the market every year so-called "used" cars which represent outstanding opportunities to buy unused transportation at low cost.

Every year more and more people appreciate this fact. Today millions of families are driving cars of which they are the second or third or even fourth owners; and this year the volume of new car sales and trade-in transactions has created wider choices and greater values in unused transportation than ever before.

3 out of 5 buy used cars

THREE out of five of the cars you see on the road have been purchased as "used" cars. You cannot tell—nor do you ask yourself—whether the driver of any particular car is its first owner, or its second or its third, providing the car looks well and is running satisfactorily.

The cars which General Motors dealers have accepted in trade vary in name, body style and price. Some have seen sturdy service; in others the potential mileage has scarcely been touched. And all offer a wide field of opportunities—

- To the family wanting transportation at lowest possible cost.
- To the family wishing to own a car of a higher price class.
- To the family needing a second or third car to meet the requirements of all its members.

We invite you to examine the unused transportation in the stores of General Motors dealers. For your convenience General Motors extends the GMAC Purchase Plan.

GENERAL MOTORS

CLIP THE COUPON

General Motors wants you to know what it is doing to give value to the purchaser of its products. Send in the coupon. There will be no obligation attached.

GENERAL MOTORS (Dept. A.), Detroit, Mich. Please send, without obligation to me, illustrated literature describing the General Motors product I have checked—together with the booklets "The Proving Ground" and "Principles and Policies."
