Editorial

In a recent robbery or attempted robbery in Portland the other day, four boys were captured and will serve long terms in prison. The fifth boy of the group was killed. Some people will wonder what the world is coming to when boys so young as these five attempt, and sometimes succeed in bold robberies, which even lead to murder. What is the cause of this young crime wave? Is it that these boys are left by themselves, to run at large over a large city and to pick up all the traits of the sneak thieves and criminal men of the underworld section? The question will be asked: why isn't there something done about this menace? Perhaps the parents of these boys have to work throughout the day and cannot or do not rightly train their children. The state and city authorities could do something for these boys if they tried hard enough. They could have more truant officers to keep a stricter watch on all who skip school, so that the boys would be compelled to go to school where they could not get into mischief. After school hours and on holidays the boys could be taken to the Y. M. C. A. or to other organizations, where they could learn sportsmanship instead of thievery, and could be brought up mentally and physically straight. This might add extra work to the officials, but these boys are to make the future citizens of America, and the officers would only be helping their government and insuring the prosperity and power of America by starting these boys on the right road that leads to a successful life and makes good American citizens.
