Editorial

February is the month of famous birthdays, for Lincoln's and Washington's birthdays are celebrated in this month.

Many stories are circulated about George Washington's truthfulness, his honesty, and his power of leadership. A short time ago a leading historian maintained that he had absolute proof that Washington was a man who led a wild life of drunkenness and vice and that he was far from being the perfect man some people had pictured him.

What difference does it make what George Washington's private life was compared to the great service he did for our little struggling colonies in the war with Great Britain? His private life did not affect his usefulness to the colonies after the war, when he filled the post of the first president of the then very new United States. His work as president then was much harder than the work of our presidents now, as he had no precedents to follow and he had to rely entirely upon his own judgment. He filled his position and kept true to his trust, and it was partly through his good judgment and through honesty to his purpose that he made possible our United States of today. He may have drunk liquor—that was a human weakness then as it is now, and he may have had faults, but who does not? Those things did not seem to make a difference in his control of the army as commander-in-chief, or in his keen judgment later as president. If historians want to rake up disparaging facts about the great men who have died, let them do so. Let us, however, consider such accounts with a grain of salt.
