Why No Other Leather Wears As Long As Wolverine Shell Horsehide

WE MAKE broad claims for Wolverine Work Shoes. But they live up to every claim. For they're made of Shell Horsehide (the one-sixth of the hide over the hips which contains a shell). No other leather wears as long because no other leather contains that shell. Wolverine Work Shoes always stay soft, never scuff, and stand up better against rips and acids. Prices are no higher than any good work shoe. Come in today and examine a pair without obligation.

Black water resisting leather. Plain toe blucher. Storm welt around toe and heel. Two extra heavy 1000-mile soles, brass fastened. Leather heel. A popular shoe for the American farmer.
