To some it would seem almost miraculous that six cars of saleable potatoes could be found in the country after the failure of most of the crop in the near vicinity. Some, however, yielded well, but there is no likelihood of an overstocked market.

Mr. C. H. Gram, deputy commissioner and factory inspector, was in Beaverton Monday, in answer to a call from one of our citizens to inspect the new high school building. ## THE DIXIE HIGHWAY.

Completion of Route For Tourists Expected in Another Year.

The first inspection tour of the commissioners of the Dixie highway over the route from Chicago to Miami terminated recently in Miami. While it cannot be said that the commissioners found a twelve-months' road—that is, a highway easily used the year around—all the way they did find wonderful progress in road building along the entire way, and in many considerable stretches the highway is already ideal.

Several members of the touring party stated that the Dixie highway in its entirety is in as good condition as the Lincoln highway was at the time of the first inspection tour over it, if not better. It must be considered, of course, in this connection that the Dixie highway has not nearly as much mileage as the Lincoln highway.

The work which has already been done furnishes a basis for the perfection of the highway which is most advantageous. It is assured from the present condition of the road and the tremendous interest that has been taken in its construction that one year more will see a twelve-months' road. That it should be such a highway is absolutely necessary before the ideal and the purposes upon which the conception of the highway was founded can be realized.

There are two principal purposes back of the construction of the highway. One is for the economic benefit of the localities through which the road runs. The highway in its present condition is passable, but not in all instances in such condition as to allow the transportation of crops to market at the minimum cost.

The other purpose is for the benefit of tourists of the north coming south and for tourists of the south going north. The advantage now is greatly in favor of the tourists going north in the summer and, owing to several bad sections, offers less advantage as a whole to tourists coming south, because winter weather puts the roads in worse condition.

Aside from the convenience of tourists motoring southward, southern Georgia and Florida are to derive a great financial benefit from a perfected highway. Florida in particular is peculiarly dependent upon tourists' trade. The road is not yet in condition where motoring over its entire length will be a pleasure in the winter months.

## AFTER THE TOWN GOES DRY

To the married man who cannot get along without his drink! The following is being suggested as a means of freedom from bondage of the saloons:

Start a saloon in your home, be the only customer. You will have no license to pay. Go to your wife and give her two dollars to buy a gallon of whiskey, and remember there are sixty-nine drinks in one gallon. Buy your drinks from no one but your wife, and by the time the first gallon is gone she will have eight dollars to put in the bank and two dollars to start business again.

Should you live ten years and continue to buy booze from her, and then die with snakes in your boots, she will have money enough to bury you decently, educate your children, buy a house and lot, marry a decent man and quit thinking about you.—Ex.

## State Industrial Briefs

The port of Astoria will erect a \$22,000 grain elevator, which means business for this Oregon grain industry.

From Florence comes the report that a tie camp will be opened employing 600 men.

The report substantiates the fact that enough acreage has been signed up to insure Southern Oregon a sugar factory.

Much sashtrout is being canned in Eugene. This is no doubt for European trade. They are also canning a carload for the U. S. army.

Payett, located in the newly opened irrigation project of Payett, is promised a \$50,000 hotel. There must at any rate be a few visitors in that part of Oregon.

Scio, Ore., is agitating the street improvement plan. Scio is a town of 205 population, slightly smaller than Beaverton, and very much alive.

The first coffin ever ground in Hood River has just been turned out. We might add that perhaps this is the first on record in the state of Oregon.

The latest proof of advancement efficiency is the fact that the ministers of the Christian and Episcopal churches of Eugene are using the papers to fill their news on Sunday.

The St. Helena cannery shipped a carload of beans to Seattle. It is almost a certainty that if this traffic in canned beans is kept up, Seattle will soon rival Boston as bean eaters.

The Oregon Lumber has won again. Oregon fir, in place of Southern yellow pine, will be used for the floor of the Dallas postoffice building. Yellow pine was the specified material.

There will be erected in Newport a radio station in the near future. This will at once connect the people of Newport with civilization, so far as conversation is concerned.

## THE OLD, OLD SUBSCRIBER

How dear to my heart are the old things in general. When fond recollection presents them to view, Old pewter, old linen, old friends and old china, Old books and old songs are far better than new. And old shoes for comfort (we need new ones badly). The old cognac pipe I shall always hold dear. But the old, old subscriber, I mention him gladly. The faithful and true, he renews by the year. The old, old subscriber, the dear old subscriber, Old wine and old sweethearts, the older the better. The old folks at home—what is home without them? The old swimming hole—it must not be forgotten. The jewel of Memory's whole diadem. Old times and old customs, and 'e'en the old dances. We'll have to admit we cannot turkey trot! But, of old institutions, if one must take chances. The old, old subscriber's the best of the lot. The old, old subscriber, the dear old subscriber, The post-up subscriber's the best of the lot.

## THE GOOD JUDGE MEETS BOOSTERS OF THE REAL TOBACCO CHEW.

JUDGE, I'VE SWITCHED FROM ORDINARY TOBACCO TO W-B—THE NEW CUT REAL TOBACCO CHEW. IT MEANS HALF THE SIZE CHEW, HALF THE NUMBER, HALF THE COST AND FULL TOBACCO SATISFACTION.

ME TOO, JUDGE. THE SALT BRINGS OUT THE RICH TOBACCO TASTE THAT SATISFIES.

MANY men seem surprised when they find out for themselves that W-B CUT Chewing—the Real Tobacco Chew, new cut, long shred—is really much better than ordinary tobacco; to find that a small chew satisfies that they don't have to grind it; and that it lasts longer than the ordinary kind.

Get a pouch and give it a quality test.

Notice how the salt brings out the rich tobacco taste.
