GIRL'S STATEMENT WILL HELP BEAVERTON

Here is the girl's own story: "For years I had dyspepsia, sour stomach and constipation. I drank hot water and olive oil by the gallon. Nothing helped until I tried buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. ONE SPOONFUL helped me INSTANTLY." Because Adler-i-ka flushes the ENTIRE alimentary tract it relieves ANY CASE constipation, sour stomach or gas and prevents appendicitis. It has QUICKEST action of anything we ever sold. L. R. Dean, druggist.

Dodging Mother Meng.
Infant prodigies are not unknown in China, and Chinese Buddhists find it easy to account for them. According to the doctrine of the transmigration of souls, persons passing through hades on their way to the wheel of life (which relaunches souls into the bodies of babies or animals just being born) have to cross a bridge. Before mounting the bridge they are stopped by an old hag called Meng, who, ladle in hand, compels each soul to drink a mouthful of the waters of forgetfulness, for which the popular name is Mother Meng's soup. Those who drink of this forget all that they had passed through or had known in their former life and thus on being reborn into the world are entirely ignorant. Some, however, manage to dodge Mother Meng and enter the world full of knowledge, which they display as soon as they can articulate.

First Stamps of Nippon.

It was in March, 1871, that postage stamps were for the first time issued in Japan, following the system of western countries. The stamps were of four denominations of mon. These stamps, however, disappeared shortly after their issue, to be replaced in 1872 by another series in the denomination of sen. These denominations are still in use today, but at the present time there is a far wider variety, the values being from one-quarter of a cent to \$5. The first stamps were extremely crude in appearance, were without gum and were printed by the ancient method of wood engraving. Today electric machines turn out the stamps, as we know them in this country, in enormous quantities.—Japan Society Bulletin.

Animals Under Water.

The ability of a beaver to remain under water for a long time is not really so tough a problem as it looks. When the lake or pond is frozen over a beaver will come to the under surface of the ice and expel his breath so that it will form a wide, flat bubble. The air, coming in contact with the ice and water, is purified, and the beaver breathes it again. This operation he can repeat several times. The otter and muskrat do the same thing.

Must Keep Them.

"Does he keep his promises?"
"I guess so. I never heard of anybody wanting to take them."—Detroit Free Press.

What He Made.

"How's business, old man? Been making anything lately?"
"Yes; an assignment."—Boston Transcript.

A reception will be held in the Congregational Parsonage Monday night. All are invited to be present.

OTTO ERICKSON

Authorized Ford Agent

Service Station

Gasoline, Oils, Tires, Tubes, and a Full Line of Accessories---Ladies' Rest Room

Three strong reasons urge you to buy the Ford car: First, "because of its record of satisfactory service to more than fifteen hundred thousand owners; Second, because of the reliability of the Company which makes it; Third, because of its large radiator and enclosed fan, streamline hood, crown fenders front and rear, black finish, nickel trimmings, it is most attractive in appearance. To these must be added its wonderful economy in operation and maintenance—about two cents a mile; likewise the fact that by reason of its simplicity in construction anyone can operate and care for it. Nine thousand Ford agents make Ford service as universal as the car.
