Friday, March 15, 1918.

The committee in charge of the patriotic food meeting at Hillsboro had it put off from Saturday to next Wednesday, so it would not interfere with the opening of the starch factory. Beaverton people will not be slow to show their appreciation.

Instead of complaining at the high cost of the substitutes for wheat which you must buy, think what the wheat flour would cost today if the Government had not set the price.

Our Closing Out Sale is Progressing Nicely

SOME LINES ARE GETTING LOW. WE OFFER THE FOLLOWING

**Specials for Saturday
March 16th**

ELMONICA NEWS

Holt Dietz, Correspondent

John Spies took a load of hay to Beaverton Wednesday to have it weighed and then delivered it to Arnold Shalsberger East of Beaverton.

R. Fujumura made a business visit in Beaverton Wednesday.

An Oregon Electric freight train bound towards Portland ran into and killed a Holstein cow of Teddy Shalsberger's.

The accident happened on the west side of the trestle west of Elmonica. Teddy has good fences around his pastures and his cattle rarely get out, let alone getting on the railroad track. The motorman sounded his whistle and bells but as he expected the cow to "vamoose" and as he was on a down hill grade with quite a number of cars he made little effort to stop. The cow was knocked down and run over. It was instantly killed and a flat car that had a defect in its coupling loosed itself and jumped the track rolling down the gulch. The car was broken up and the iron beaten into fantastic shapes. It is reported that the brakemen jumped off the cars as they hit the cow, knowing of the defect in the coupling. This happened at eleven fifteen Monday.

Mr. William Warfle and Philip Holsheimer, privates in the U. S. army have been visiting their homes.

Mrs. J. Fleeter of Sylvan, Or., was a guest of Mr. and Mrs. W. C. Dietz and son. Coming Friday evening she enjoyed a pleasant visit through the week end.

Henry Schlottman failed to deliver his groceries Tuesday.

Mrs. Thurston and Mrs. Dietz have been appointed chairmen for the sale of War Saving Stamps and Certificates in school district No. 57.

Uncle Hi Says:

I am going to the opening of the starch factory ARE YOU? Willie Schlottman visited his parents lately.

It is reported that Elmonica station is not to be moved. We hope this is not so.

The enterprising I. Shepard went to Portland to see about some cattle.

Henry Schlottman made a brief business visit to Beaverton Monday.

Mr. Langworthy "the wood man" was in Beaverton Monday from which place he went to Portland.

Mrs. Rutt was a Beaverton visitor Monday.

Get ready for the election.

David Pitt of Hood River was here Saturday looking at some property in Sorrento with a view of trading for it.

G. H. Dixon was in town Saturday on his way to Cherry Grove. He recently returned from a trip to Corvallis, Salem, Newport and other cities and has about decided to locate in Beaverton.

I. V. McAdoe, editor of the News at Sherwood, accompanied by E. A. Taylor, Virgil Weckert and Fred Swanson of that city, were in Beaverton a short while on their return from Hillsboro. The Times acknowledges a pleasant call.

J. W. Young of Huber has moved to Beaverton. He will occupy the Alexander bungalow in the neighborhood of the starch factory. Mr. Young is employed in the shipyards at Portland.

S. H. Zimmerman has returned to his Beaverton home after spending several weeks in Hillsboro where he was employed as a repair man in a garage.

NOW IS THE TIME TO ACT.

Scarcely a day passes but someone calls our attention to the need for a sewer system for Beaverton. It is an improvement which must come soon to Beaverton and the sooner the better for the health, comfort and convenience of all concerned.

Word comes from the County Judge that as soon as the weather will permit the rock quarries will be opened. The Town Council has announced its intention to lay the base for the paving in our principal streets as soon as the rock is available. It is the intention of a sufficient majority of the property owners along that principal street to extend the paving to the curb line. This can be done in the most economical manner if done at the same time that the paving on the state highway is laid.

It is highly important, then, that steps should be taken at once to provide the necessary funds for this purpose that the paving may be done in the best and most economical manner.

And knowing that the sewer system must come sooner or later, is it not the part of wisdom to consider it at the same time that the mains may be laid before the paving or even the rock base is laid, so that there may be neither the cost of digging through these materials nor the unsatisfactory and expensive tearing up of our paving the next year after it is laid.

It is not characteristic of Beaverton people to do things quickly but it is a well recognized fact that they do them well.

Bearing this fact in mind, is it not well to take some immediate steps in this direction, that there may be no embarrassing and expensive delays when the time comes for laying paving. Paving is often delayed, but when paving companies once get a contract they will not wait for us.

It may be necessary to amend the charter in order to raise the necessary funds for paving and sewers. This should never be done hurriedly. Is it not time, then, that something be done to determine the wishes of our townspeople in this matter and to prepare for the demand that is sure to come at no great distant date.

AN ASSET TO BEAVERTON.

Beaverton is particularly fortunate because of the location of the Pacific Potato Starch factory in this vicinity at this time. Being, as it is, the first factory of its kind in America, it carries immense possibilities for making this town the center of a new industry. Other factories are making potato starch; others are making and marketing potato flour; but no other in the country is doing what this factory is now doing and proposes to do in the future for the grower; no other takes from the raw material so many of the marketable products and no other so far eliminates the waste as this factory will do. Hence, Beaverton, Oregon, and the Pacific Northwest generally will profit by the location of the factory here.

The worth of the potato is being more fully recognized today than ever before. The new process that makes from it so great a variety of food products will add to its popularity. The difficulty of securing machines for the refining processes will have a tendency to make this plant a refining center to which will be shipped the product of the elementary processes of other factories. Potatoes are practically three-fourths water. Any process that will eliminate the water can be used to prepare them for shipment to this central factory for refinement and marketing.

Truly, we have in this factory an asset worth prizing at high worth.
