

Tomorrow is the Day—Third Liberty Loan Begins!

BUY A BOND!

Bonds are Good Investments

There is no safer, better investment today than the United States Government's Third Liberty Loan. Backed by the unlimited resources of the greatest nation on earth, guaranteed by my earnings and yours, issued for a purpose that makes the whole world grateful to us, there can be no better investment from the point of safety, from the point of worth or from the point of the good it may do.

Pay 4 1/4 Per Cent Interest

As these bonds pay 4 1/4 per cent interest, payable every six months, and may be had in either the coupon or the registered bonds, they are one of the most convenient and profitable investments, considering their absolute safety, that anyone could possibly make.

Safe as the Nation Itself

"What good is money, anyway, if we don't win this war?" If this nation endures, these bonds will be paid just so surely as they fall due. And if this nation and the principles for which it stands do not endure, all the wealth which you can save will profit you nothing. Then why hesitate? Act today! Call at the bank and tell the committee that you are back of Uncle Sam.

You Cannot Lose

You gain in self respect: you rise in the estimation of your neighbors: you create an asset on which you can realize in case of necessity: you establish the habit of careful savings and safe investment in your home: you cannot lose in any way by buying Third Liberty Loan bonds.

Let Your Dollars Help the Boys at the Front!

Yes! Let your dollars work. Let them work for you here at home and let them give courage and power and support to the boys at the front. In no other way can you do so much to give the soldiers courage, to make them proud of their na-

tive state, their county and their home town.

Then buy a Liberty Bond first thing in the morning; buy all you can afford; then resolve to sacrifice a bit during the next three months and buy another bond or two and go home Saturday night the happiest man you ever were.

Every Bond is a Bullet Right at the Kaiser

This is our war and every bond is a bullet that hits home at autocracy. It is a shot in defense of home, of Democracy, of American institutions. Do your bit! Do it today! Let's send Eastern Washington County over the top with a spirit that will put the laggards to shame! Oregon has set the mark to go over the top in a week. Portland plans to raise her quota by Wednesday night. But Eastern Washington County can and will go over the top the first day! Do your part! Have a hand in the triumph!

Back up Your Soldier With Your Savings

Maybe you have saved in the past. Maybe you have only dreamed of saving. But in either event you can buy a bond and the savings you have made, or the savings you have dreamed of making can back up your soldier at the front. And whether you have a son or brother at the front or not, when you have bought a bond you can say "My soldier!" with a pride that you can feel clear down deep by your heart, for you will know that you are helping some brave boy to do his part better and more effectively. There is only one proviso. If you buy only one bond when you could buy two, if you buy only five when you could buy ten, you cannot feel the pride which comes to a man for a duty well done.

This is America's Triumph

This is America's triumph. Will it be your triumph? It will, if you do your duty. Do your bit! Do your utmost! And you will have the joy of a part in America's triumph! Buy a bond.

Buy it the First Day!

Tomorrow is the Day—Third Liberty Loan Begins!
