FLU PRECAUTIONS.

(By Dr. C. E. Mason.)

We are having a few new cases of influenza since the ban has been lifted and we are anxious to keep such control of it that it may not become necessary to close our schools. If the people of the community will cooperate with the teachers and doctor we hope this will be possible. So we would ask again that you allow no child to attend school who complains of any illness, it makes no difference if it may seem to be only a slight cold. It is best to play "Safety First" for the good of the school rather than have the credit of exposing so many others. Often children will not tell you when they are feeling ill but the teachers are going to observe all children and ask them to return home if they appear to be not so well. If your child is requested to return home for a few hours and it should develop later to be a false alarm please remember that the mistake is made with the very best of intentions and for the good of the community.

In homes where influenza exists it would be safest to keep all children from that house out of school until such time as the disease seems no longer contagious, that is we shall say 4 or 5 days after everyone in the house has recovered. Children who have had the influenza and after recovering seem to have rather a severe cough should not attend school until the cough is better. Secretions from the mouth and lung passages are infectious. In homes where influenza exists and even if no children from that home get the influenza it is better to fumigate before children

return to school. In other words fumigate every home where there are school children regardless as to whether the children have influenza or not. Formaldehyde fumigating candles may be obtained of Mr. Dean at 60c each.

These are mere suggestions and do not cover all points but we trust that everyone will put in his best licks to knock out our epidemic.

Want a Turkey for Christmas?

If you want a fine turkey—one of the milk-fed kind—for your Christmas dinner, go down to George Thyng's confectionery and learn about the big fat turkey gobbler which Mrs. Donaldson gave to the Red Cross and which you may have for 25 cents if you guess right.

HIGH SCHOOL NOTES.

The debating league met in Room 2 Monday for the purpose of organizing a society in this school. Miss Florence Snider, president, Miss Edna Hocken as secretary and treasurer combined. Mr. Jonas was chosen as general manager. We hope that they can show us some real pep in debating.

Miss J. Leiser having been ill with the "flu", is in danger of losing her position as teacher because of the many new teachers springing up during her absence. Among them, George Thompson, Edna Hocken, Thelma Pegg, and many others too numerous to mention.

The Domestic Art Class is now working on bed bags for the Red Cross.

A new system of grading has been formed by which those deserving are excused from the last study period from 3:25 to 4:00. The system is considered good by those who get out at 3:25. It consists of giving slips to the students who get their lessons perfect during the day.

Even those dear Freshie's have the fever. Take Notice!

A Radio Club has been formed at Beaverton High School by a number of boys interested in this work. The officers are: Arthur Nvgant, president; Geo. Thompson, vice president and Austin Delk chief electrician. They will soon be experimenting

and sending messages.

The General Science class has proved quite an attraction as shown by the way the "Freshie's" are clamoring for admittance.

The Freshie's are planning on giving the upper classmen the long promised party real soon.

The High School student body will give an entertainment soon for the benefit of the student body treasury. A notice of the date will be given later.

Miss Edna Weed is figuring on dancing the "washer woman" for our Xmas entertainment.

George Thompson's smiling face was missed at school last week. We wonder why?

The French class are learning rapidly to "Parlent francais."

The II French class are diligently translating, "Une nez gele" (a frozen nose) and they wish he was all frozen.

College Bees get Warm Winter Home.

Plenty of room, stores, and protection from unfavorable weather, is the slogan that has been applied to the record bee colonies at the Oregon Agricultural College. by A. L. Lovett, entomologist. The colonies that laid up a large honey surplus have been snugly and safely parked away for the winter.

"Some method of protection against the extremes of temperature of Eastern Oregon and the excessive moisture of Western Oregon is essential," declares Professor Lovett.

"Single colonies may be wrapped with old newspapers and covered with roofing paper or similar material. Colonies may be packed in groups of four or more stands surrounded by a large frame filled with sawdust and covered with a waterproof lid."

The exact type of protection depends upon the system of locating the colonies followed by the individual bee-keeper, points out Professor Lovett. Suggestions on solving the wintering problems are contained in a circular which may be had by writing to the College.

The Times has the finest line of samples ever brought to Beaverton. You can select just the kind of paper you want and have it printed in just the way you like best.

PROVED SPIRIT OF DEMOCRACY

Voluntary Basis of Food Saving Showed Heart of America Beat True for Freedom.

To the voluntary service and sacrifice of the American people must be attributed the continued health, strength and morale of the Allied armies and the civil populace.

Upon this spirit of service and sacrifice will depend Europe's fate in the months to come. In the past year we have carried out an export program, the magnitude of which is almost beyond comprehension. But with the new demands that have come, with the liberation of nations freed from German oppression, our exports must be almost doubled. Instead of 11,820,000 tons, we must ship twenty million tons of food to Europe in the coming year—as much as can be pushed through our ports.

If the Allies had not been fed by America, it would have been impossible for them to maintain their defense against Germany.

Meeting this world need on a purely voluntary basis, the American people have conclusively proved that democracy is a success and that in time of need it will rise to its own defense.

If there were no other accomplishment to its credit the very fact that it has shown the strength of democracy has in itself more than justified the existence of the Food Administration in the eyes of the world.

Less than four months after the United States declared war the United States Food Administrator expressed his determination to meet America's food problem on a basis of voluntary action and reiterated his confidence that awakened democracy would prove irresistible.

"Many thinking Americans," said Mr. Hoover, "and the whole world have been watching anxiously the last four months in the fear that democratic America could not organize to meet autocratic Germany. Germany has been confident that it could not be done. Contrary proof is immediately at our door, and our people have already demonstrated their ability to mobilize, organize, endure and prepare voluntarily and efficiently in many directions and upon the mere word of inspiration aside from the remarkable assemblage of our Army and finances."

The history of the Food Administration has clearly shown that the trust of those who put their faith in democracy has not been misplaced.

There are a few copies of the Oregon Motor Vehicle Laws at The Times office for those who call for them.

Holiday Greeting Cards printed to order at The Times office.

The Valve-in-head-type engine illustrated here, like all internal combustion engines, requires an oil that holds its lubricating qualities at cylinder heat, burns clean in the combustion chambers and goes out with exhaust. Zerolene fills these requirements perfectly, because it is correctly refined from selected California asphalt-base crude.

ZEROLENE
The Standard Oil for Motor Cars

It Keeps the Engine Young!

Zerolene keeps the engine young—full-powered, smooth-running, and economical in fuel and oil consumption—because it is correctly refined from selected California asphalt-base crude. Gives better lubrication with less carbon. Made in several consistencies. Get our Correct Lubrication Chart covering your car.

At dealers everywhere and Standard Oil Service Stations.
