BEAVERTON HIGH RANKS WITH BEST IN OREGON—CHURCHILL

State Superintendent Assures Member of Local Board that Diploma from Local School is Full Value.

Prompted by numerous stories of uncertain origin which have been circulated to the detriment of the local school, a member of the local board of directors recently wrote to the State Superintendent asking for the stading of the local high school. The reply of Mr. Churchill is self explanatory. There are no high schools in the state which grant a diploma worth more than that given by the local school. Some students have failed to get credit for subjects taken here but they would have been denied credit for these subjects wherever taken. Mr. C. Churchill's letter follows:

Salem, Oregon, Sept. 28, 1919.

Mr. R. W. Cook, Beaverton, Oregon.
My dear Mr. Cook: I returned to my desk after an absence of more than a week, and find your letter under date of September 20th awaiting me.

In reply will say that your school is a standard high school, and that in this office it has the same rating as any other high school in the state.

An accredited school is one that has the equipment but does not offer more than three years of work. I do not, therefore, understand what is meant that students have the notion that it is not an accredited high school, unless they mean to say that where a pupil completes a course in Beaverton high school that work will not be accredited at a standard college or university. A standard college or university accepts pupils on the work they have done in a standard high school. You offer a course in the Beaverton high school which, if taken by pupils, will permit upon graduation to enter a standard college or university. However, in the past your high school has been offering some subjects that are not high school subjects. When the pupils have taken such subjects as have met the requirements for graduation but not for college entrance, the fault of the pupil has been that he would have had college requirements if he would have taken them.

Trusting that I have made myself clear, I remain,

Sincerely yours,
(Signed) J. A. CHURCHILL,
Supt. of Public Instruction.

LIBERAL GIFTS FROM LOCAL PEOPLE CLOTHE ARMENIANS

Generous Response Made to Appeal for Aid and Large Shipment Goes Forth from Beaverton.

Responding generously to the appeal of aid from over the seas, the people of Beaverton contributed a goodly supply of clothing for the relief of the suffering Armenians. It was by no means just cast-off clothing that found its way to the school building last Monday and on Thursday loaded Ed. Wolfe's truck on its trip to Portland.

There were many suits with genuine wear in them, shoes that will be proof against the weather for many weeks and garments that will satisfy the vanity as well as insure the comfort of the Armenian women.

The committee in charge of the local work express their thanks to the people of Beaverton for their generous response and assure them that the gifts were timely and appropriate.

DIRECTORS OF FACTORY APPROVE NEW PLAN

Increased capacity and better results will follow slight changes now being made and the Starch Mill will begin operations soon.

J. R. Olden, of Heppner, and H. R. Smith, of Ione, two of the directors of the Pacific Potato Starch Co., were in Beaverton Monday and looked over the plans which Manager W. C. Gifford and Superintendent C. T. Colt have worked out for the increase of the capacity of the factory. They approved the plans and assured Manager Gifford that they thought the improvements he has in mind are just what the plant needs.

The plant will be ready to start between the 20th of this month and the first of next. The improvements to the plant will be completed about the 15th and the company will then be ready to receive potatoes for which they will pay cash on delivery and will dump them promptly and return sacks immediately.

The improvements consist of one big cement settling tank, 13x36, one big storage bin, 20x90, conveyors to take potatoes direct from the bin to the washer, a pulp drier and other minor changes which will greatly increase capacity.

Mr. Olden is a prosperous and efficient stockman of the Heppner district. Mr. Smith is a well-known wheat grower of the rich Ione section. He and his partner, Henry Smaus, are among the large growers of the section, running a big 75 Holt tractor and a big combine with a 24 foot cut. When men of this type turn their attention and their money to projects of the type of the starch factory it bodes well for the local industry.
