MARVELSEAL

Marvelseal Liquid Roof Cement is
a weatherproof compound for pro-
tecting, preserving and renewing
roofs and metal siding. Just one
coat is needed on any surface.

Marvelseal is made from tough,
elastic gums, waterproof oils and
pure Canadian long fibre asbestos,
the fibre is the same as used in mak-
ing fireproof theatre curtains or fire-
proof mats. This is the pigment
used to give the cement body and to
form a mat which prevents the cem-
ent from cracking or running no
matter how steep the roof or how
hot the sun.

The oils are a combination of gli-
sonite gum varnish, heavy pine pitch
and preservatives.

The cement adheres firmly to the
entire surface, forming a tough ten-
acious coating, and will renew the
roof for at least ten years.

A new roof treated with Marvel-
seal as often as ten years or there-
abouts will make the original roof
last as long as the building.

For any kind of Roofing, Marvel-
seal gives service and protection on
crete, canvas or gravel roofs. On
porous concrete roofs, wood shingles
or old composition roofing that has
become spongy through injury, wear
or neglect, it enters the pores and
acts as a powerful preservative, at
the same time providing a tough,
durable and weathertight coating.
