

ANNOUNCEMENT

Of Personal and Vital Interest to Every Farmer, Rancher and Orchardist in Washington County.

We extend a most cordial invitation and hearty welcome to every tiller of the soil in Washington County to come to Hillsboro and see our Exhibit of Samson products.

It includes Tractors, Implements, Farm Trucks, Automobiles and the wonderful Sunyhome Light and Power Plant with its many electrical novelties.

This complete line is made by the Samson Division of the General Motors Corporation, which controls the well-known Cadillac, Buick, Oldsmobile, Oakland, Chevrolet and Scripps-Booth Automobiles and GMC Trucks.

Take a few minutes to read over carefully the descriptions on the following pages of the new lines exhibited, including the Samson Model M, high-powered, two- to three-plow Tractor, which is also extra well adapted to heavy belt power work, irrigating jobs, threshing, silo-filling, etc.

Next comes the Samson Iron Horse—a machine that is new and revolutionary in its performance, and almost universal in its uses on every farm, large or small. It is a simple four wheel drive machine and is handled with lines like a team.

You will be astonished at its marvelous performance, and decide there are many jobs it could do on your place, because you have never seen anything just like it before.

The new line of Samson $\frac{3}{4}$ - and $1\frac{1}{4}$ -ton Trucks are bound to interest you, if you have any hauling to do on the farm, in town or in the city. With a new wonderful and yet simple invention, you can successfully go through soft fields, plowed ground, orchard and bad roads regardless of weather.

Notice this new invention on the following pages, also the prices of these Trucks.

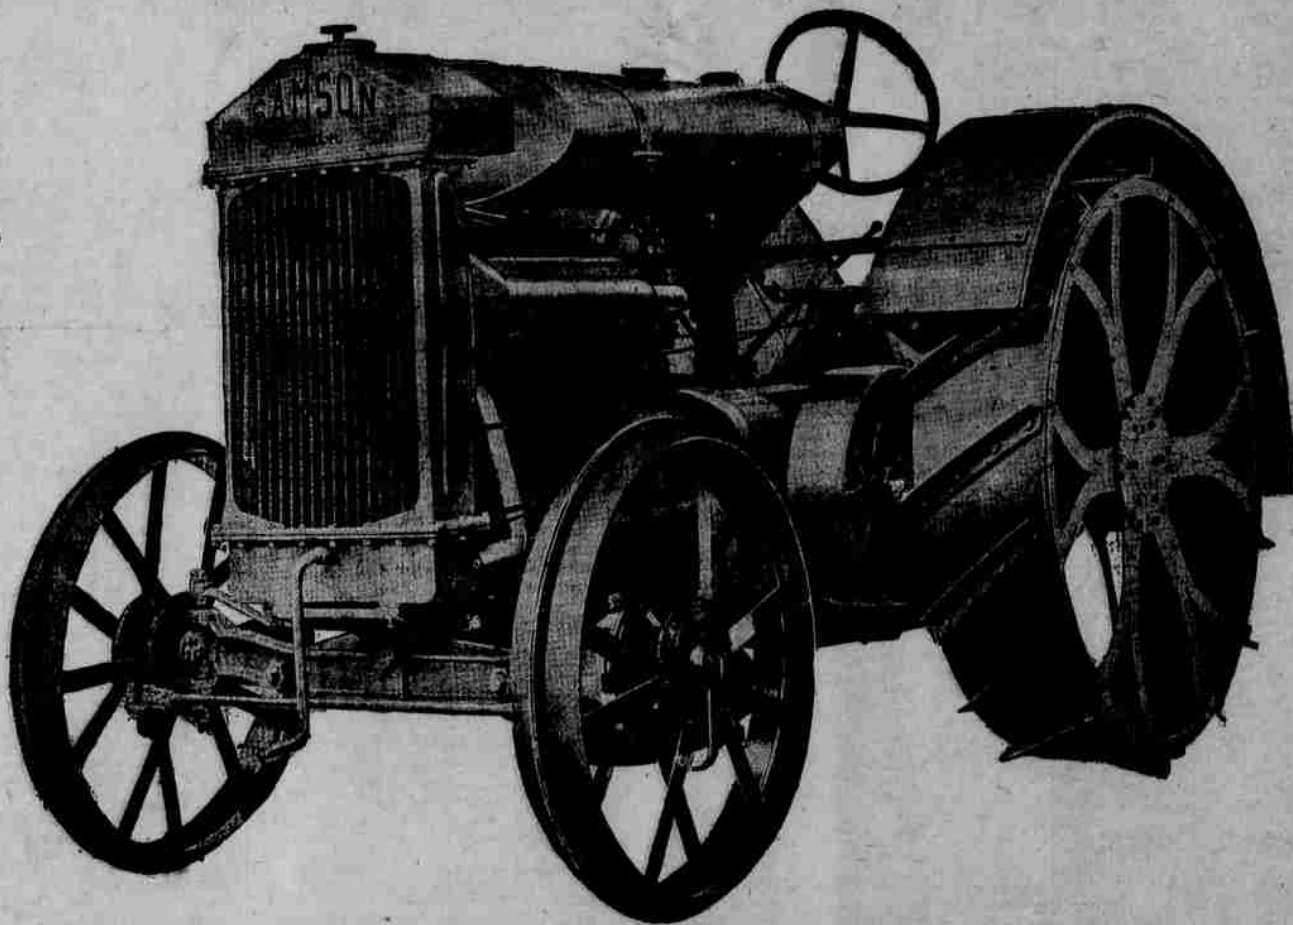

The Sunyhome Light and Power Plant interests everybody, especially the women folks around the house, because it lightens every burden in the home and really makes every home a Sunny home.

It is the greatest electrical development up to date, and with it you can lighten the burdens of housekeeping and make work that used to be drudgery a real pleasure.

Come and see the exhibit at your convenience.

SAMSON TRACTOR

Horsepower—heavy draft horsepower—for drawbar and belt, that's what you want, but at the right price, both in first cost and upkeep as well.

This is what the designers, engineers and producers had uppermost in their minds when they developed the Samson Model M Tractor.

You want a tractor that will take the place and perform the duty of a barn full of horses without costing you a fortune or a big part of your crop to buy and maintain.

A tractor with more drawbar capacity for less weight, also a tractor that will give you an unlimited range of steady power on the pulley for heavy-pulley jobs, such as lifting water for irrigation, threshing and silo filling.

That's exactly the kind of a tractor you get in the Samson Model M—no superfluous and unnecessary dead weight.

The Samson Model M is the last word in modern tractor construction. It is not like the average I-beam and chan-

nel-steel frame tractor, that weighs so much that it takes a large per cent. of its own power for self-propulsion—it is a close-coupled power unit all by itself from radiator to rear wheels.

Every working part is enclosed and protected against dust, mud or rain.

The even distribution of weight, compact design and low center of gravity give to the Samson great stability, making it hug the ground and preventing all danger of rearing up and tipping over.

It has no lost motion, for it is built and lubricated throughout like a \$3,000 automobile, insuring great efficiency, ease of operation, maximum length of life and service and the price—the most unbelievable figure of \$940.00 f. o. b. Hillsboro—because of correct design, engineering and quantity production.

We provide all necessary extra traction equipment to meet the soil condition here.
