SAVING ON RENT

Note—It is reported that four Mexican families have cut the high cost of rent by occupying a four room cottage. There are twelve in each family and they live in one room, the children being supported in baskets from the ceiling at night.

There's a question that is answered. And more likely it is true. How the Mexicans have hit upon a scheme.

The way they have cut on rentals it may not appeal to you. For it sounds to me more like some crazy dream.

For a home they went a-looking. And of families there was four. But they could not find one large enough to hold.

So they took the only cottage. Which had four rooms and no more. Although each family had twelve in it all told.

In a room each one was crowded. They went quarters on the rent. And they only had space in it for one bed.

On the floor some were a-sleeping. While the younger ones were sent in a basket to the ceiling over head.

If in flats you are a-living. Where things in walls disappear. You might get a pointer from this bit of news.

If on space you are conserving. There's an object lesson here. It's the over-head space which we never use.

When it comes to cut down rentals it takes Mexicans for that.

That's the way to avoid a big building boom. They have nearly slipped one over. For a one-room built-in flat. When a family of twelve can live in one room.

O. O. SMITH.
