**OWLS**  
Note—Screech owls are getting so numerous in a Kansas town that they are annoying the citizens. One place in the east the screech owls are hooting. Not in the woodlands but over the town. Some of the folks there will soon be a-shooting if they keep staying and flying around.  
Down on the people with claws they are coming. Hitting one man so he may lose his sight. Away from the street you'll see them a running. They hunt some retreat as soon as it's night.  
But owls are so large with others comparing. We wonder why they should come in a flock. At least in a town to become so daring. With wings, claws and bill, the town folks to knock.  
Most any district has some peat or other. It makes no difference wherever you go. Mosquitoes and gnats the people will bother. And when the fleas come you don't stand much show.  
And when for the night our camp we are making. Down where it's cool by some little

**Give Your Motor Truck Driver a Tire He Can Depend On**

**T**he man who tells you that motor truck drivers are not interested in the efficient and economical operation of their trucks has never been in a garage when the trucks were coming in from their day's hauls.

Tire splitting and base separation are not things that truck drivers thought up to annoy their employers.

Until the new U. S. Grainless Rubber Solid Truck Tire was created, no way had ever been found to prevent solid tires from splitting. Nor had anyone ever

been able to prevent base separation.

As representatives of the oldest and largest rubber company in the world it is our privilege to introduce this new tire to the owners and drivers of this city.

The first solid truck tire ever made that will neither split nor separate from its base.

Give your driver a tire that he can depend on—that he doesn't have to nurse and be thinking of all the time—and watch how much more efficiently your trucks operate.

And how your tire costs go down.

In purchasing a new truck consult us about the type of tires to specify.
