**To the Man who is Interested
in Truck Tire Economy**

CAREFUL truck owners are
figuring their costs pretty
closely these days—tire costs
along with the others.

It is no longer "clap on a new
tire and hang the expense." At
least, not with the owners we
come in contact with.

Service, wear, traction,
cushioning qualities, construc-
tion are coming to mean more
than they used to, not only to
owners but to drivers of motor
trucks.

And the more they mean, the
more we find truck owners and
operators turning to the new
United States Grainless Rubber
Solid Truck Tire.

The tire that overcomes split-
ting and base separation—that
goes on its way day after day,
month after month, wearing
down smoothly and uniformly
without undue attention and
without expense.

Handling United States Solid
Truck Tires in this city is in
keeping with the progressive
policy of our concern.

Something new—something
a little in advance of the
times—is always coming out
of the United States Rubber
Company.

Before ordering a new truck,
consult us about the kind of
tires to specify.
