Beaverton should do a lot of improving this coming summer in the way of home beautifying. Begin now to make your plans for some kind of improvement. Improve your lawn or your parking or both. Nothing prettier than nice, well-kept lawns and parkings. Just a little work will accomplish wonders.

NEW SPORT ON SUBMARINES

Fishing With Baited Lines Is New Employed to Relieve the Tedium of the Life.

Fishing with inverted lines from the decks of American submarines is the newest pastime among members of their crews operating in the Pacific ocean from the Los Angeles submarine base, says the Popular Mechanics Magazine.

The boats make frequent practice trips between Los Angeles and Santa Catalina Island. The water in this area averages about 90 feet in depth, and is one of the finest fishing grounds of the Pacific coast.

Frequently the boats dive to the bottom, and lie there with their motors shut off while practicing submarine signaling, torpedo-tube routine and the like.

The upside-down fishing is done in a very simple manner. Prior to making a dive the men arrange their lines on the deck rails of the submarine. The hooks are baited and are strung out on the decks to be carried upward when the boat dives, by a float attached near the hook.

Since any fish that takes the bait can not be removed until the boat comes to the surface, the lines are fastened to the deck rail by coil springs. This practically eliminates the chance of losing the fish by its breaking the line, or tearing the hook out of its mouth.

Franklin Medal to Sir Charles Parsons.

The Franklin medal has been awarded to Sir Charles Parsons "in recognition of his epoch-making success in the development and the construction of the steam turbine which has revolutionized the art of steam engineering, particularly in regard to the propulsion of mercantile and naval vessels, and the driving of electrical generators." Not many people know of the courageous struggle of Sir Charles in the early days of his invention, and that he separated from his original partners owing to their becoming too discouraged to "carry on." Engineering, in speaking of the award, says: "The work of Sir Charles Parsons has halved the cost of producing electric power and reduced in still greater proportion the capital cost of engineering machinery.—Scientific American.

Inconsistent.

"That man says he wants universal peace."
"I can't see it that way. If he wants universal peace, he wouldn't persist in starting a political argument on a hot day."

HIS RECOMMENDATION
"Have you a recommendation from your last place?"
"Yes, sir; seven months off for good behavior."

NOW EAT LIGHT BREAKFASTS

English People, Since the War, Are Said to Have Abandoned Heavy Morning Meal.

The hearty breakfast which everybody in England ate for centuries has gone out of fashion, a correspondent of the New York World writes. Steaks and chops as an early morning meal, which the French regarded as a horrible British habit, disappeared some time ago. Now scarcely any one eats porridge, fish, ham and eggs and marmalade for breakfast. Both those who have leisure and those who work eat smaller breakfasts and larger lunches.

The clubs and restaurants now provide big lunches. Many serve a luncheon of four or five courses—soup, fish, joints, sweets and cheese—and at a comparatively moderate price. Boys men find they can work better after a light breakfast—boiled egg or a thin rasber of ham or bacon. But they satisfy their appetites fully at luncheon, giving an hour or even more to enjoy their food in comfort.

With women, too, the hearty luncheon is becoming popular. They no longer are satisfied with a cup of coffee and some buttered cakes. Girl stenographers and clerks take a substantial meal of meat and pudding. Probably they have done a good morning's work on a cup of tea and a slice of bread and butter. So they have learned to appreciate and enjoy a luncheon that sustains and upbuilds them.

Nelson Gardner

Nelson Gardner was born in Osage county, Missouri, on Jan. 28th, 1840, and died in Forest Grove, Oregon, Jan. 3rd, 1921, lacking only 25 days of his 81st birthday. He was the last of a family of 12 children.

He was united in marriage to Anna Shearer, who survives him, March 15, 1860, in Keokuk, Iowa.

They crossed the plains in 1862 and after a long and perilous journey lasting six months, they located on a homestead in Washington, remaining there until the attractions of the Willamette valley drew them to Oregon. Here he successfully farmed until advancing years admonished him that he should seek a well-earned rest. About fifteen years ago he retired from the farm and came to Forest Grove, where he has lived since, respected and highly esteemed by all.

He was the father of ten children, eight of whom survive him and were present with their mother, at the services. They are: Mrs. O. F. Taylor, Salem; Mrs. G. H. Howe, Forest Grove; Mrs. T. C. Morrison, Sheridan; Mrs. J. L. Howard, Aberdeen, Wash.; Mrs. T. J. Butler, Eugene; Mrs. C. P. Myers, Prescott, Arizona; and the two sons, F. D. and A. E. Gardner, Forest Grove. There are thirty-four grandchildren and eight great-grandchildren.

Father Gardner, as he was familiarly called, was converted when 19 and at first united with the United Brethren church, but soon transferred his membership to the Methodist Episcopal church, in which he was an active member, serving the Lord for over sixty years, enjoying the peace of God here, and without fear, with unswerving faith and unfaltering trust he committed his all to Him, believing with all his heart that He will keep that which is committed to Him. When he realized the end of this life was near, he gathered the members of his family about him and after they all sang, "God Be With You 'Till We Meet Again," and a prayer by his pastor, he gave his blessing to all and asked them to meet him in heaven. His message to the community was, "Give the people my love."

His funeral was conducted from the First Methodist church on Wednesday, Jan. 6th, 1920, at 2 P. M. by

Rev. C. R. Carles.

The interment was in the Forest View cemetery.

Got anything warming in your cellar, old man? You bet your life. Ten tons of coal.

LUCKY
Mrs. Bug—Well, well, a nice load of stove wood, all cut, has been left for me!

WHY CERTAINLY

Why do you continually refuse me? Haven't I promised to lay the world at your feet? That's where it's always been.
