FENCE

LAWN

TIME TO SPRAY BY B LEIS

BEAVERTON, ORB., April 13, 1914.

To The Editor Owl: apples. I did not have a half box of wormy or unclean fruit now. There is from 25 years' practice and not from books, but practical experience in my own orchards. Fruit Inspector Atwell says that we ever raise the best apples in the world, and I know he is right as I have done it for many years, and he also says that I have one of the cleanest, if not, the cleanest orchard in the Willamette valley, and I think he is right; and you can do the same. I know there are many orchards that should and would produce good fruit, but Deputy Recorder Seeks Nomination EDW. C. LUCE, COUNTY CLERK are many orenards that should and would produce good iffult, but for want of care they are making a very poor hog food at its best. There is a law that we should spray. If there was not, we would have no need of an inspector. Now it is impossible to raise good fruit without spraying; that time has passed long agb. In spraying for the codling moth or worms, the first spraying should be made about eight or ten days after the petals have fail on. The apple is then in the motion resilion to rariive the spray

The apple is then in the proper position to receive the spray en. The apple is then in the proper position to receive the spray The object is to fill the cup up with polson in a few days. The cup will close, and it will be impossible to get any polson into it, and you polson almost all of the first brood on the apple by that means. Use strong pressure, say 125 to 200 pounds, so as to force the spray into the extremity, and I would recommend a Bordeaux nozzie for that purpose, and point it downward, as then you will have bette results by forcing it into the caly cup. Now this is your last spray-ing for the worms, and if you neglect the spraying you may just is well not spray any more during the season as it will be but very little good, and would not pay to bother with it any more. At this spraying there are no worms to kill as they usually do not deposi spraying there are no worms to kill as they usually do not deposi spraying there are no worms to kill as they usually do not deposi-their eggs until about the middle of June. If conditions are favor-able they work mostly at night. I have never seen a coding moth-in the daytime; much more could be said, but I think I am extend-ing on your space; but I know it will be of interest to many as I get many letters; asking this information. Now what do I spray with and at what time? Well, you will have to spray at the right time; if that cannot be done, not wight as gold not spray as I have tried it, and it did

well, you will have to spray at the right time; it that cannot be done you might as well not spray as I have tried it, and it did not do any good whatever. I use from 2 1-2 to 3 pounds of the Grasselli Neutral Brand of arsennte of lead. I find by trying other brand; the Grassellis gave the best results and is used by the Hou River and by mostly all the fruitgrowers' unions, and I am such there is no better on the market, for good results get the latter adding to this 1 1-2 gallons of the Atma brand of lime and sulphu solution—the first is for worms the latter for scale. Don't use solution-the first is for worms, the latter for scab. Don't use Bordeux mixture as it will hurt your fruit making it unsightly are about as bad as scab. This is to 50 gallons of water of Aphis ar troublesome: add to your spray 1 pint of black leaf, 40 to 300 c water, about the 20th of June spray again with the same ingred-ents, and again about August 20 for the second crop of worms. Al these sprays I keep on hand and for sale, hoping that this will be of benefit to some of you- readers. I am yours, etc., B LEIS

LET THE MOON SHINE IN BEAVERTON

Vancouver, Wash .- When the moon shines bright and clear The time for the first spraying for worms or codling moth will be with us in a few days, and for the benefit of those that are try-ing to raise clean fruit, I will try to give an outline theme. I man-Vancouver, Wash.—When the moon shines bright and clear this spring and summer, it may spell money to the taxpayers of Vancouver. It has been recommended by Mayor Crass, who is age my orchard and raise as you know clean fruit out of 2000 boxes carrying out his platform of an economic administration, that the electric street lights be turned off when the moon is shining.

A purchasing agent will have charge of the buying in the future and it is expected that a good sum of money will be saved.

Fred A. Everest announces himself as candidate for the of. Candidate for a Second Term fice of Recorder of Conveyances; Thanking everyone for past is now and has been for past favors, I present my name for three years Deputy Recorder; is a resident of Hillsboro, and is running on the Republican ticket for the nomination on May 15. Primary election May 15 (adv.)

Missouri, stating the serious illness of his father. Mr. Thurston left immediately for the East.

Mrs. Carrie Paitz, formerly of Beaverton, has entered suit in circuit court at Oregon City for divorce from her husband, william Paitz.

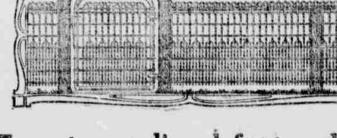

Old Landmark Burns

Early Wednesday, about 1:30 a. m., the fire bell rang and Hose Cart Nos. 1 and 2 responded to a place. The Klink barn, "an oldtimer," went up in smoke. In the owners had permitted the city to install the hydrant in front of their place last winter. possibly the barn could have been saved, as it was when the water came over 800 feet the pressure was too low. Some hay and chickens burnt.

William Thurston of Skeek-unville received a telegram from Otto Muessig delivers "A No. I" wood at your door on short notice; woodyard near Flour mill. All-night dance at Morse Hall, Beaverton, Friday night, April 17. Ashworth's orchestra; swell music, "Sunny Lane" and sweet story. Will serve supper.
