Poison in the Kitchen.

No article entering so generally into the food of every household is so generally and villainously adultered as baking powder. These adulterated powders are shoved upon the public with the greatest persistency.

Throbbing advertisements in newspapers claiming this brand or that is absolutely pure, backed by analyses and certificates, and yet they are adulterated with ammonia or alum. It is to be hoped the law will take hold of these merciless manufacturers and punish them for destroying the stomachs of the unsuspecting consumer.

Amid all this fraud and deceit Dr. Price's Cream Baking Powder stands almost alone battling for pure food and continues to furnish a pure cream of tartar powder at almost the same cost to the people as the ammoina and alum powders are sold at, yet it costs much more to manufacture.

Dr. Price's Cream Baking Powder is of the highest strength. It produces the largest amount of leavening power attainable in a pure baking powder. It is free from ammonia or any other adulteration. No powder does such work. Housewives who have tested all use Dr. Prices only.

STITCHES IN THE BACK CURED. Peter C. Vandewater, Commissioner of

Highways, Woodsburgh, Long Island, N. Y., writes:

" During the last three years I have been troubled with stitches in the back. They came on without the slightest warning, and haid me up for two and three weeks at a time, and nothing did me any good. Over a year ago I had a more severe attack. I could hardly move. My wife then applied an ALLCOCK'S POROUS PLASTER on the small of the back, where the kink appeared to be. I never had used one before. In a short time all pain had vanished, and the next morn-ing I got up and attended to my business. I put a fresh plaster on every week for a month, and I feel that I have been entirely cured, as I have not had an attack in the last eighteen months." troubled with stitches in the back. They

Fortunes Quickly Made.

A man came into the editorial room today and broke everybody up with this story: Several years ago a pay master in the United States army invested \$500 in a piece of ground in Spokane Falls. The other day he sold it for \$54,000. The excitement that greeted this story had scarcely died away, and the boys in the room were fanning each other and cutting each other's hair to cool their skulls, when another man came in and told this story: In 1882 a Pennsylvanian went to Denver, and when he landed he had enough to buy a tent and a few mining tools. He went prospecting, made a little money and then went back to Denver and bought real estate. Today he is worth \$4,060,000. The only sound that greeted this story was a succession of dull thuds as men dropped to the floor.

There was a hiatus of half an hour. when another man came in and said he had just heard of a young man in one of the mushroom towns of Virginia who had invested a little money in real estate right after breakfast, and when he sat down to dinner had cleaned up 1,000 on his purchase. There are three half crazy men in this office. Whenever a man comes into the editorial room he is asked before he gets warm: "How much did the fellow make?" Then he tells his little story and goes out, leaving the boys just as poor as ever. - Harrisburg Telegraph.
