Manufactured by O. W. R. CO., Portland, Or. For Sale by L. W. Darling & Co., Condon, Or.

FROM WASHINGTON CITY. Representative Hermann Secures an Extension of the Mail Service in the State of Oregon.

The Bureau of American Republics is informed that Senor Don Antonio M. Flores, recently President of Ecuador, has been appointed and confirmed by Congress as Minister Plenipotentiary of that country to the United States, and will also be appointed honorary Commissioner-in-Chief to the World's Columbian Exposition.

The discrimination by Costa Rica against vessels and trade with the United States arising from the rebate allowed heretofore by Costa Rica of a 5 per cent. custom duty in favor of certain foreign vessels having been discontinued by a repeal and the ground for complaint of the government removed, vessels of that country will hereafter be admitted to United States ports without the exaction of discriminating duties.

Representative Hermann has secured the extension of the mail service on the Holley-Crawfordsville route, to begin at Sweet Home in Linn county. He has also secured an order from the Postoffice Department inviting proposals for a mail service twice a week from Bridgeport by way of Hereford to Unity and back, in Baker county, Or. The department also upon the showing of Mr. Hermann has issued proposals for bids for a mail service from Alesia by Lobster to Fisher in Benton county and back, once a week, from October 15, 1892, to June 30, 1894, until regular letting.

A second report on the Indians of the Southwest has been received at the Indian Bureau from Dr. Dorchester, Superintendent of Indian Schools. The report deals with Indians in Arizona, and gives prominence to the Apaches and Navajos. The whole Indian population of the Territory is given as 35,707, and the number of children available for schools as 4,280. This is an increase in the population since 1880 of 3,276. Of the children about 1,200 attended school either in Arizona or elsewhere. In 1889 only seventy-three children of Arizona Indians made any pretense of attending school. The school accommodations, though yet small, are said to be increasing each year, and for 1893 accommodations will be furnished for 1,070 children in the Territory. The Superintendent is not favorable to removing Indian children to Northern schools.

The officers of the Interior Department are considerably worried over the ruling of the First Comptroller, which will possibly prevent the use of nearly \$25,000 in surveying lands. The appropriation act provided that of the \$375,000 appropriated \$125,000 should be expended within railroad limits, and the Comptroller holds that none of the balance can be expended within these limits. As large portions of public lands are within railroad grants, especially lands which it is desirable to survey, it is possible that a great many States will be short on funds for surveys. It is thought Oregon would be the sufferer under this ruling, while portions of Washington State would be benefited. Acting Secretary Chandler says that notwithstanding the ruling he intends to expend the money where he thinks it will do the most good, regardless of the fact that it may be expended within the railroad limits.

At Golden, Col., a sluice that does the work of saving fine gold is in operation. It consists of a series of boxes lined with strips of Brussels carpeting and so arranged as to allow the sand and water to be carried from one to the other, and every particle of the impalpable flour gold is said to be saved.

A man found ill in a shanty on the outskirts of Sacramento was taken to the hospital, and when stripped for a bath each leg was found encircled with a garter made of canvas, doubled and the edges sewed together. The garters had apparently not been off his legs for many months, if for years. Each contained fifteen \$20 gold pieces, making \$600 in all. He also had \$8 in his pockets. He had every appearance of being a tramp.

The sloop Idler, which sailed from Seattle last June with a party of prospectors for Alaska, has returned after an unsuccessful cruise. The party consists of George Fisher, August Anderson, M. L. Johnson and Sam Sanner. They prospected on Sumter and Sheep Islands and found many good quartz ledges. All the valuable claims have been located.

Hop picking has commenced in California on some of the down-river ranches, and the crop is said to be very satisfactory. There is quite an army of buyers in the market from San Francisco. A majority of the pickers are Chinese, although a number of Nevada Indians have already come to engage in the work. While the redskins are there for the purpose of working, they are not rushing pell mell into the hop fields. A well-known grower says there is a prevailing opinion that the Indians and Chinese have this year pooled their issues and are going to put up the price of picking to a point that almost means ruination to the growers. They are now paying 90 cents to \$1 per hundred pounds to pickers, and this will probably be increased at the rate of 5 cents per hundred.

The total assessed valuation of all railroads in Montana, as fixed by the State Board of Equalization, is \$9,287,532, representing twenty-nine railroads with an aggregate mileage of 2,662. The Northern Pacific main line has a mileage of 782.6 and its rolling stock is valued at \$1,635 per mile for assessment purposes; its rails at \$700 per mile; the roadbed \$500 per mile and the roadway \$100 per mile. Its main line and branches have a combined mileage of 1,274.76, valued at \$4,178,331. The Great Northern and its branches count 1,057 miles, valued at \$3,712,701. Rolling stock on the latter road is assessed at \$5.00 per mile; rails, \$1,700; roadbed, \$1,700 and roadway \$100 per mile. There is an increase of the assessable value of the railroads over 1891 of \$1,506,142, due to the construction of the Pacific extension of the Great Northern.

OCCIDENTAL MELANGE PURELY PERSONAL.

Payment of Interest on Railroad Bonds to be Enjoined.

THE NATIONAL GUARD OF NEVADA. A Solder Applicable to Aluminium and German Silver Discovered by a Mining Engineer.

Yuma is to have an experimental farm. Heavy rains are falling in Southern Arizona. Interior counties of Nevada are very enthusiastic for the new railroad to Salt Lake.

The Colorado river is falling slowly, but is still far above the average height at this season of the year. A very large deposit of kaolin has been found in the vicinity of The Dalles on the Oregon side of the Columbia.

The M. E. Church (South) proposes to inaugurate at Phoenix an Arizona district high school. The buildings will cost \$60,000. All the saloons at Wardner, Idaho, have been closed. Miners have been holding secret meetings of the union in some of them.

The National Guard of Nevada has gone into camp for the first time in its history at Treadway's Meadow with nearly 400 in the field. One manufacturing plant at Puyallup, Wash., has this year made and sold \$10,000 worth of tree sprayers, all of them having found sale in Oregon and Washington.

A Mexican while prospecting in the hills north of Castle Dome in Arizona found a silver bar weighing 104 pounds. There is considerable speculation as to how the bar got where it was found.

The payment of the interest on the \$200,000 of bonds issued in 1885 by Maricopa county, A. T., to the Maricopa and Phoenix railway is to be enjoined, and the legality of the bonds issue is to be tested.

Up to 6 A. M. on Saturday morning the Chino (San Bernardino county, Cal.) beet-sugar factory had turned out this year 2,870,059 pounds of sugar. Of this quantity 516,900 pounds were from the syrups of 1891, and the balance was from this year's beet crop—2,352,059 pounds.

W. A. Merralls, a mining engineer of Los Angeles, claims to have discovered a solder for aluminium, a process which has in vain been sought for during the past thirty years. The invention will be of great value in dentistry, aluminium being admittedly far superior to rubber or gold in such work. The solder, it is claimed, is also applicable to German silver.

The Southern Pacific Company at San Pedro is endeavoring to shut off the ferry landing from the boat that is regularly rowed to Terminal Island, a place popular on Sundays and holidays, and the citizens propose to condemn a right of way for a street across the Southern Pacific's track to the water's edge, so that they can reach the ferry. There is some bitterness over the matter.

Mark Twain's name so frequently appears on the list of arrivals at Geneva that it might almost be supposed the Hartford author had expatriated himself and taken up his residence among the Swiss. His liking for Europe has grown with great strides during recent years, and he seizes every possible occasion to cross the water. "It's the Alps that draw me there," he said to a friend not long ago. "They follow me everywhere, and I cannot get away from them."

EDUCATIONAL NOTES. Garden and Fruit Culture Taught in the French Schools—Denominational Schools in Kansas.

Manitoba Catholics are determined to maintain their separate schools. Two of the graduates this year at the Chicago College of Law were women. Seven of the eight graduates of the State Library School at Albany this year are women.

A two years' course in pedagogy is to be opened at the University of Minnesota this autumn. In France there are 28,000 peasant schools in which are taught garden and fruit culture through State aid.

Mrs. Frederick Billings of Woodstock, Vt., has donated the sum of \$2,000 for a high-school building at that place. Missouri has 4,399 more Sunday-school officers and teachers than in 1891, 500 more schools and 30,000 more scholars.

There are thirty-five denominational schools in Kansas. Almost every sect on the road to heaven has a training school in that State. Sir Daniel Wilson, President of the Toronto University and probably the most distinguished educator in Canada, is dead at the age of 76.

Yale will have a handsome new psychological laboratory. This will be the second laboratory of its kind in this country, the other being at Park University, Worcester.

At Boulder, Col., they have started a State Divinity School, which is to be non-sectarian and without denominational bias. A sort of religious wump college, so to speak. It is probably the boldest attempt educationally that Boulder ever made.

Four years ago the senior class at Yale contained fifty-five free traders and forty-three protectionists. This year's senior class contained forty-two free traders and eighty-three protectionists. At Harvard President Eliot says that "most of our students are Republicans." If "tariff reform" is making any headway, it certainly is not among our educated youth.—Boston Journal.
