A bill for woman suffrage is before the Iowa legislature, and the Des Moines Register thinks the cause was injured the other day by a man holding a crying baby outside the senate door while his wife was within working, teeth and toenails, for the passage of the bill. That woman wasn't much of a politician or she would have left the old man and kid at home.—Exchange.

T. E. Cruikshank, who had been running the Fix livery stable since last fall, has quit the stable business and he and Fred Harland intend starting in a few days with a band of horses for the Dakota markets. We are not prepared to say whether the stable will be open for business any longer or not, but presume that if Mr. Fix concludes to open the stable for public patronage he will tell the public so through the Globe.

We notice in the Truth Seeker, published in San Francisco, an "open letter" to Senator Mitchell of Oregon, written by our Geo. W. Crawford of Lone Rock. George goes at it flat-footed, and in the most pathetic manner gives the senator to understand just what ails this nation and how to remedy it. This information will be of inestimable value to congress, and from now on the U. S. may expect to take a boom. It has cost the country billions of dollars by not getting this information six or eight months sooner.

L. W. Darling made a business trip to Ajax Wednesday. Mr. Darling informs us that during his 20 years residence in this section he has never seen the grain and grass at this season of the year look so well as at present, particularly in the Ferry canyon country. He says there are yet thousands of acres of government land, as rich and fertile as can be anywhere in the U. S., lying here and the John Day, the years for industrious settlers and make valuable farms of this rich land can now be for nothing—that is, and go to plowing up. If a few hundred of people from the East come out and settle they could soon be nothing to start.

Hon. W. L. Brown for John Grant and Harney co.

We are informed that the reason of Thirtymile will soon of a flouring. This is not a new idea as he has been contemplating this kind for some time. The assertion that a better location for a grist mill than at this place. Mr. had a great deal of experience of work, is a gentleman and plenty of energy, and may expect to see a first-class operation here before the snow again.

The Journal's skunk burst again in the last issue of that paper, and his couple of dozen readers were treated to a nice mess of perfume—the only kind his depraved intellect can produce. There was little else in his last issue but venom and slanderous abuse of the Globe. The new greenhorn has been "going after" nearly everybody and everything respectable lately. Why doesn't somebody over there "cane" him again—he's just itching for another dose. Perhaps they have concluded to let him break his own neck, which he is doing about as fast as anyone could. Any project (or candidate either) the people of his section favor, the best thing they could do is to get the Journal to work against it; they would be certain then of success. If he thinks the Globe is alone in its opinion in regard to the course he pursues, let him learn of the motion or resolution endorsed by the populists at Mayville Saturday. It was a corker.
