

THE CONDON GLOBE.

FRIDAY, JULY 13, 1894.

THE OFFICIAL PAPER OF GILLIAM COUNTY, OREGON.

According to the law of 1889 this is the year for adopting text books to be used in the public schools of the state during the next six years. But we seriously question the advisability of making any changes at this time, unless it be to provide for the publication of the necessary books by the state printer. The books to be used are selected by the several county school superintendents and the members of the state board of examiners, who are to record their vote before the first day of January next. The state school superintendent is directed by law to issue a circular to the county superintendents and the examiners containing a list of studies to be taught in the public schools, together with the wholesale, retail, exchange and introductory prices of all books in the list. Those entitled to vote write opposite each study the text book or series of text books preferred. These replies are transmitted to the state superintendent and by him to the state board of education and upon a canvass of the vote the text books receiving a majority of the votes cast are declared to be the authorized text books for the six years next succeeding the official announcement. The county superintendents would do well to carefully examine the pulse of the general people before recording their votes for an expensive change next January.

The one great blessing of the industrial depression is the decrease of foreign pauper and criminal immigration. Hordes of ignorant, besotted, semi civilized persons from the scums of Europe have poured into the United States at 2,000 a day or three-quarters of a million per year, and congressmen ruled by the steel trust, coal operators and a fear of the loss of the foreign vote have done nothing to check the influx. A time has been reached when all the coal mines of Ohio, West Virginia, Illinois, Indiana and Pennsylvania are worked by Poles, Russians, Hungarians and Italians. The large number of these classes may be conjectured when it is realized that most of the coal consumed in the East is mined by them. Few of the workers are Americans.—Guard.

Whether the millennium is about to dawn or not, it is plain that the devil has been turned loose. No one but Beelzebub could create such chaos and incite such riot as now prevails in the four quarters of the earth. Old Nick in boots is going to and fro through the world stirring up the evil passions of men, disjoining the times, knocking business into a cocked hat, and arraying classes against each other in a way to frighten the timid. Even the elements have become subservient to his satanic majesty, and storms and floods and cold waves are doing their utmost to push along the carnival of chaos and ruin. Yet if you want to keep up with these stirring events you will have to read the GLOBE, which will continue to print the news, and all the news. If judgment day comes it will find us printing the best country weekly on the Pacific coast.

Congress is made up of 309 lawyers, 19 bankers, 40 merchants and manufacturers, 6 doctors, 29 farmers, 8 editors and four of no avocation. The reason is plain to be seen why the country is governed so much and so expensively, and why the vain attempt is made to make the country prosperous by legislation. Without lots of laws, what would most of the lawyers do for business?

There is one railroad that the present strike does not affect. The Great Northern, which runs its own sleeping cars, is running all right. All roads should control and operate their own sleeping and dining cars. The Southern Pacific owns 75 percent of its Pullmans, but the smaller percent prevails and the strike is seriously demoralizing travel and business.

The London Live Stock Journal expresses its astonishment at results secured at the World's Columbian Exposition in the following language: The cow with the best individual record made almost seven times more than the worst of the seventy-five. When we take into consideration the fact that all the cows were doubtless selected ones, it almost passes belief that such a difference could exist. The thought naturally occurs: If in such a lot of selected cows one produces almost seven-fold more than another, what must be the difference in the ordinary farmers' stock throughout the country?

The farmers of Eastern Oregon will evidently pull through the present period of hard times in much better shape than seemed possible a few months ago. Although wool is very low, the yield is very large; the lamb crop is very large, and thousands of the mature sheep are being sold at prices, which, while low compare very well with prices of other farm products. Eastern Oregon steers are being bought up for Montana and Canada, and quite a number have been shipped to Omaha, with moderately good results. More hogs are being marketed from this part of the state than ever before.

You can't suit everybody all the time. For instance, this weather is the delight of hop growers, as it is death on the lice; but it makes the wheat growers sad, as it is a picnic for the grain aphid. Four days of hot weather would stamp out the grain aphid, but it would increase the hop lice by millions. The truth is, it is about as difficult a task to manufacture weather to suit all classes at all times in all places, under all conditions and in the face of all circumstances as it is to run a newspaper that will suit everybody all the time. It can't be done, you know.—Salem Statesman.

Crazy or not crazy, Prendergast will hang today, the 13th, the jury having decided that he is not insane. If he is crazy it is such a vicious type of insanity that hanging is the only protection against it. The long delay in his punishment is a reproach upon the system of American jurisprudence.

Casimir Perier, the new president of France, is elected for the full term of seven years. In this regard France is ahead of us. Our presidential term should be at least six years.

The human race is divided into two classes—those who go ahead and do something, and those who sit still and inquire why it is not done some other way.—Holmes.

When a sheriff attempted to address a mob of striking miners in Illinois the other day, he found not one man in the crowd understood English.

Every town has a liar or two. A smart Alack. Some pretty girls. More loafers than it needs. A woman or two that tattles. Streets given over to weeds. An old fogey that the town would be better off without. Men who stand on the street corners and make remarks about women. A young man and young woman who laugh an idiotic laugh every time they say anything. Scores of men with the caboose of their trousers worn as smooth as glass. Men who can tell you all about finance, the weather, and how to run other peoples business, but have made a dismal failure of their own.—Exchange.

Our boys have organized a fire company, and have been practicing the last week each evening at seeing how rapidly they can haul the engine from its nest and get it to work. They do very well, and a fire would have to be pretty well advanced that could not be subdued by its vicious nozzle.

To Whom It May Concern. My son, John Archie Webb, aged 15 years, having left his home on July 9th, without cause, I hereby notify the public that I will not be responsible for any debts contracted by him. J. C. WENZ. Mayville, Or., July 9, 1894.

A horse kicked H. S. Shaker, of the Freeway House, Middleburg, N. Y., on the knee, which laid him up in bed, and caused the knee joint to become stiff. A friend recommended him to use Chamberlain's Pain Balm, which he did, and in two days was able to be around. Mr. Shaker has recommended it to many others and says it is excellent for any kind of a bruise or sprain. This same remedy is also famous for its cures of rheumatism. For sale by all druggists.

Lone Rock Riplets.

July 5th, 1894.

Miss Anna Clarke has finished a successful term of school at Eightmile and returned to her home.

Quite a number of Indians camped near Lone Rock recently, making old-timers think of bygone days, when this country was lousy with pesky red-skins.

R. G. Robinson expects to move his store to Arlington about Sept. 1st, and will occupy his 1/2 of the Union block. We are all sorry to lose him, but wish him success in the new field. His sons expect to assist him in the business.

The Lone Rockers had a very fine time at their picnic on the 4th. A large crowd was present and the following program was rendered: Song by choir; prayer; oration by Rev. Bramblet; song—"Red, White and Blue;" recitation—"Columbia," by Jessie Goff; song—"Cast One Little Thought for Me," by Birdie Henshaw; recitation—"The Flag," by Flora Ward; song by choir; recitation by Bennie Stevens; flag drill by eight girls; song by choir. The entire program was well rendered and much appreciated by the large crowd present. The oration by Mr. Bramblet was very good and was delivered amid thunders of applause.

LONE ROCK, July 10th. Mrs. Henshaw of Condon is visiting friends here at present.

People are getting well along with their rye harvest. It is the largest for years. We are getting cranky about our mail, as it comes by jerks again. Portland mail is about ten days old when it gets here.

Mrs. Chas. Stevens, Mrs. and Mr. E. D. Wineland and Mrs. Woods were baptised in the Baptist church last Sunday and several others were taken into the church by letter and otherwise.

The wheat aphid is getting to be very thick up here. We do not know whether it will do any harm or not. Oats rye and all kinds of vegetation is effected here by the pest. Every plant seems to have an aphid peculiar to itself. JNO. DOE.

AN INDIAN TRADITION.

How the Rapids at the Cascades Were Formed.

Those who failed to visit the great gorge in the Cascade mountains where the Columbia dashes through the divide to the peaceful valley below, have not seen the flood in all its glory. The scenes up and down the river between the lower cascades and the rapids opposite the cascade locks are at once grand and awe-inspiring. As the torrent sweeps unrestricted over the ragged, rocky bed of the river, there comes to mind the Indian legend that at this point there once extended from mountain to mountain a natural barrier five miles wide at the base by 3000 feet high, which dammed the river, forming a mighty lake extending over the Inland Empire. In latter centuries the barrier gave way and the river flowed through, forming instead of a dam a natural bridge, but this also gave way, and the lake found an unobstructed outlet to the sea. As evidence of the truth of this legend the Indians point out the formation of the cliffs on either side of the river. On the Washington side a wall of rock rises to a height of 5500 feet, presenting a rugged surface which at a distance looks like masonry. The same phenomenon exists on the Oregon shore directly opposite. It was from these two points, according to the savage, that the dam was torn out.

An Ohio editor says hay fever is caused by kissing grass widows. A Missouri editor says it is caused by the grass widows kissing a fellow by moonlight. An Iowa editor says it is caused by kissing the hired girl while she is feeding hay to the cow. An esteemed Kansas exchange is of the opinion that it is caused by missing the girl and kissing the cow.

Ayer's Pills possess the curative virtues of the best known medical plants. These Pills are scientifically prepared, are easy to take, and safe for young and old. They are invaluable for regulating the bowels, and for the relief and cure of stomach troubles.

To prevent the hardening of the subcutaneous tissues of the scalp and the obliteration of the hair follicles, which cause baldness, use Hall's Hair Renewer.

W. H. Nelson, who is in the drug business at Kingville, Mo., has so much confidence in Chamberlain's Colic, Cholera and Diarrhoea Remedy that he warrants every bottle and offers to refund the money to any customer who is not satisfied after using it. Mr. Nelson takes no risk in doing this because the remedy is a certain cure for the diseases for which it is intended and he knows it. It is for sale by all druggists.

Last June, Dick Crawford brought his twelve months old child, suffering from infantile diarrhoea, to me. It had been weaned at four months old and being sickly everything ran through it like water through a sieve. I gave it the usual treatment but without benefit. The child kept growing thinner until it weighed but little more than when born, or perhaps ten pounds. I then started the father to giving Chamberlain's Colic, Cholera and Diarrhoea Remedy. Before one bottle of the 25-cent size had been used, a marked improvement was seen and its continued use cured the child. Its weakness and puny constitution disappeared and its father and myself believe the child's life was saved by this Remedy. J. T. MARLOW, M. D., Tamara, Ill. For sale by all druggists.

Notice. I have leased my barber shop to Sylvan Palmer and I would like for all owing me to settle immediately, as I need money to carry on my other business. A. BRANDENBURG. CONDON, June 13, 1894.

Mrs. J. H. HORSNYDER, 152 Pacific Ave., Santa Cruz, Cal., writes:

"When a girl at school, in Reading, Ohio, I had a severe attack of brain fever. On my recovery, I found myself perfectly bald, and, for a long time, I feared I should be permanently so. Friends urged me to use Ayer's Hair Vigor, and, on doing so, my hair

Began to Grow,

and I now have as fine a head of hair as one could wish for, being changed, however, from blonde to dark brown."

"After a fit of sickness, my hair came out in combfalls. I used two bottles of

Ayer's Hair Vigor

and now my hair is over a yard long and very full and heavy. I have recommended this preparation to others with like good effect."—Mrs. Sidney Carr, 1460 Regina st., Harrisburg, Pa.

"I have used Ayer's Hair Vigor for several years and always obtained satisfactory results. I know it is the best preparation for the hair that is made."—C. T. Arnett, Mammoth Spring, Ark.

Ayer's Hair Vigor

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass.

BUSINESS LOCALS.
