WHAT THE PRESIDENT CAN DO

It is a Question Whether This Will be Assumed a Liberal Attitude.

WASHINGTON, November 9 .- The announcement that the German authorities may conclude to determine the possibilities of the introduction of Texas fever into the Empire from expert opinions of American veterinarians was received with great interest by Secretary Morton, whose advocacy of retaliation by requiring a strict inspection of German wines and liquors has been told in these dispatches. The Secretary has in-vestigated the question, and finds that authority to entirely exclude German products in retaliation for discrimination of our goods is vested in the President by existing laws, all of which has been heretofore overlooked in the dis-cussion of the question. Secretary Morton had a conference with the President, and laid the law before him. It is in the United States Statutes at large, volume 26, Fifty-first Congress, page 414, chapter 839: "An act providing for an inspection of meats for exportation and prohibiting the importation of adulter-ated articles of food or drink, and au-thorizing the President to make a proc-ters. "That whenever the President is satisfied there is good reason to believe any importation is being made, or is about to be made, into the United States from ated, he (the President) may issue his proclamation suspending the importa-tion of such articles from such country for such period of time as he may think

necessary." The Secretary believes this law is the key to the situation furnishing this gov-ernment with full power to retaliate upon Germany for the exclusion of our their wines, or by stronger measures. At the State Department the attitude of the German government regression of the Arthur has docks can bloom the control of the department the attitude of the department regression. cattle either by the policy which he sug-gested, of requiring a strict inspection of tle is regarded as the natural and proper depot. If, as stated in the dispatch, the Germans have so far receded from their first position, justifying the absolute exclusion of American cattle without reasonable proof upon these important points then the State Department officials feel has assumed a very liberal attitude, and one which is likely to speedily result in the removal of the embargo.

Lord Salisbury's Tribute. London, November 9.-Lord Salisbury paid a tribute to the late Czarin a speech on municipal politics in London this ing any one an option on the subsidy himself and of his political associates at the loss of Alexander III. News of the Two War Powers Brought by Steamer.

San Francisco, November 9. - The Orient under date of Tokio, October 20,

The Corean peninsula has now been cleared of Chinese troops from end to end. Corea was one of the last vestiges of the middle kingdom's medieval majis a Question Whether This Will be States that acted as buffers between the big Empire and the "outer barbarians;" independent toward all the alien world, Germany Has Modified Its Order and dependent toward the Celestial Empire alone. That was the anomalous status of these buffers. One after another they have been shaken free by the impact of Western aggression. Burmah, Siam, Tonquin, Annam, the Pamir region—all have fallen away, leaving the flanks of the middle kingdom exposed to the kicks of the profane Occident. Corea alone remained. To her relations with Corea China could not choose but import some element of realism, for beyond the bor-ders of the peninsula Russia stood always ready to advance. Therefore the Peking statesman openly called Corea a de-pendency, and Europe believed that they had both the will and the ability to protect it.
