would claim a protectorate over Corea. The reports of Russia's purpose in absorbing Corea are not seriously entertained in diplomatic circles. No such purpose has ever been suggested in the official correspondence thus far. China's assertion of a protectorate over Corea led to the recent war, so it is not likely Japan would regard a similar claim by Russia with indifference. Another report coming from Frankfort that Russia's claim to Corea was for the purpose of protecting Russian merchants against Japanese competition is known to be erroneous by those familiar with the facts. A diplomat recently at Seoul, the capital of Corea, says there is only one Russian, a carpenter, in Corea outside of the legation.

FOREST FIRES RAGING.

Damage Done Between Tacoma and the Cascade Mountains.

Tacoma, May 18.—Severe forest fires are raging along both sides of the Northern Pacific track from South Prairie to the summit of the Cascade mountains, a distance of 55 miles. At Lester, 70 miles cast of here, the postoffice building and two small residences were burned, with all their contents, yesterday. The railroad employes saved the company's property by using locomotives and throwing water over the buildings. There was a number of loaded trains on the sidetracks there. The fire caught from burning logs and is still raging about the town. The railroad's bridge and section crews are all fighting the fire. Superintendent McCabe reports that the fires were put out in the snowsheds several times today. They caught from falling burning trees. A high wind would cause great damage, but rain is looked for.

Other Evidence Than the Presence Firearms Will Be Required Before Seizure Is Made.

Washington, May 17.—It can be stated authoritatively that British ships will be sent to Behring sea to patrol against poachers and to use every effort of carrying out the Paris award and the British law based thereupon. The instructions to the British ships will not, however, direct the seizure of vessels found with arms, but will require other external evidence of sealing, such as the possession of skins, the presence of blood on the ship, etc., as a basis of seizure. This will differ from the instruction of last year, which made the open possession of arms prima facie

The British law based on the Paris award does not forbid the open carrying of arms. The United States law. which is held by the authorities of Great Britain to have gone beyond the Paris award, makes the open possession of arms prima facie evidence of sealing. The British regulations last year yielded to a certain extent to the United States law. Now, however, the British law will be strictly adhered to, the theory of the British authorities being that the Paris arbitrationrs had the amplest means of providing against the extermination of the seals and that the award fully executed will give full protection.

Under these circumstances a serious question arises as to whether United States naval vessels will apprehend British sealers because they openly carry arms, this not being against the British regulations. Last year a United States ship apprehended the British sealer Wanderer under section 10 of the United States law, wihch provides that possession of arms is prima facie evidence of sealing.
