## The Condition of Americans in Cuba Revealed.

### SENATE COMMITTEE REPORTS

#### American Citizens Destitute and Helpless in the Towns of the Pearl of the Antilles—Action Soon to Be Taken.

Washington, May 15.—There was a sudden and violent outbreak of Cuban sentiment today at the capitol, and during the early hours the drift of opinion was strongly toward speedy and radical action by both congress and the executive, but later there was somewhat of a reaction upon its becoming known that the president, while keenly alive to the situation, and anxious to learn everything possible that could guide his conduct of our Cuban and Spanish relations, felt that further information was necessary, and for the immediate present the question was not one of recognition of the belligerency or independence of the Cuban insurgents, but of relief for the American citizens, destitute and helpless in the towns of the Pearl of the Antilles.

The foreign relations committee, it should be stated, while agreeing upon the necessity of relief for the suffering Americans, is favorable to more radical measures, and a number of its members are earnestly desirous of instant action by the executive in aid of the insurgents, but have not succeeded in converting the administration to their views that present action is appropriate and imperative.

The event of the day was a report to their colleagues by a subcommittee which yesterday examined the state department's Cuban reports. This statement, though not given to the public, was so far disclosed in character as to give rise to a good deal of excited comment among senators and members.

The report, based upon facts presented by the United States consuls in Cuba, it is said, brings out in strong relief the destitution which exists not only among the Cubans, but among Americans and pacificos now in the islands who were driven from their farms and into the towns by Weyler's orders, and are thereby prevented from supporting themselves.

For several days past, the subject matter of this report has been under discussion quietly among a few of the friends of Cuba in congress, and they have lost no opportunity of impressing upon the president their convictions that it is his duty, as the chief executive, to delay no longer in taking active steps to terminate the present condition of affairs in Cuba. These representations, however, have not been sufficient to induce hasty action. The president is moving steadily and with all speed that safety and sound judgment warrant in the collection of facts touching the conditions that exist upon the island today. To this end, Mr. Calhoun is now in Cuba, officially on another mission, but also charged with the observation of the conditions that prevail. When he has reported to the president and the latter has obtained what he regards as a sufficient store of information, based on facts that cannot be questioned, he will be ready either to take himself, or to suggest to congress, such action as these facts warrant.

Meanwhile, he has under consideration the best means of affording relief to Americans suffering as a result of the conditions on the islands. Today, the president saw, by appointment, Edwin W. Atkins, of Boston, who is largely interested in Cuban sugar plantations. Mr. Atkins gave him a faithful picture of the economic conditions that prevailed in Havana and in other parts of the island when he left.

#### Committee's Report.

The senate committee on foreign relations today had the Cuban question under consideration on the basis of the subcommittee appointed yesterday to confer with the president and Secretary Sherman. The report was prepared by Davis and Foraker, Republican members, Morgan, the Democratic member, declining to participate in it. The report consisted of a concise statement of the contents of official reports from the American consuls in Cuba, bringing information up to within a week. This report confirms the newspaper reports as to the situation on the island, and even goes farther in depicting the deplorable situation than do most of the newspaper stories. Especial stress is laid upon the condition of American citizens. It is positively stated that hundreds are in a starving condition and wretchedly clothed. Deaths are daily reported. Americans are scattered in all parts of the island, and are shown no consideration whatever because of their American citizenship.

The Americans are generally persons who reside on the plantations, but who have been driven from their homes to the towns, and, being among strangers and without employment, are compelled to subsist on almost nothing. They are not allowed to return to their plantations, even to pick berries or secure the least article of subsistence. They are theoretically under the care of the Spanish army, but the army is without a commissariat. They have no means of leaving the island. Their condition is pronounced wholly deplorable.

The committee was especially impressed with this recital, and the opinion was generally expressed that the situation should be remedied, if possible. It was considered as placing even a worse aspect upon the question of our relations with Cuba than the imprisonment of Americans, of which there are now comparatively few instances.

## THE CASE OF CHAPMAN.

### Allen Brought It Up in the Senate—An Agonized by Hoar.

Washington, May 14.—In the senate today the sugar investigation of 1894 was recalled by the introduction of a resolution by Allen reciting the circumstances of the investigation, the refusal of Elverton R. Chapman to testify, his conviction in the courts as a contumacious witness, and the present efforts toward his pardon. The resolution proposes that Chapman be brought to the bar of the senate to purge himself of contumacy as a prerequisite to pardon. Allen sought to secure immediate action on the resolution, but it went over on objection of Gallinger and Hoar. The latter criticized the resolution as giving away authority of the senate, and said he would propose an amendment with a view to having Chapman punished unless he purged himself of contempt without reference to the question of pardon. The consideration of the resolution will be in order tomorrow.

Morgan made a statement relative to his resolution on Cuba. He said the committee on foreign relations had considered the question of referring the resolution to a committee, and had not agreed. The committee desired, however, that the resolution go over till noon tomorrow, in order to have a statement laid before the senate at that time. On Morgan's suggestion the resolution went over.

A resolution by Butler, requesting the president for information relative to the sale of the Union Pacific railroad, was presented and went over.

The senate bills for public buildings at Deadwood, S. D., to cost \$200,000, were passed.

The senate then took up the calendar and passed bills as follows: For the relief of certain citizens of Montana, claiming the benefits of the homestead laws; granting to Montana 50,000 acres of land in aid of an asylum for the blind; appropriating \$174,000 to Charles P. Chouteau for extra work on the ironclad Edith.

The immigration and kinetoscope bills were referred, but went over on objection.

#### Ute Boundary to Be Fixed.

Washington, May 14.—The necessary action for settling the vexatious dispute over the eastern boundary line of the Southern Ute Indian reservation in Colorado was taken today when Samuel S. Gannett, a topographer in the geological survey, was designated as special agent at \$10 a day to fix the line permanently. His instructions are to locate the intersection of the 107th meridian with the new Mexican-Colo- rado boundary line. The work will begin immediately and upon its early completion the exact location will be proclaimed. The Utes claim the line is too far west. The surplus of un- allotted lands on that part of the reservation lying east of range 14 have been held up from the opening to settlement pending the location for some time. Some 48,000 acres of land valued at \$60,000 are involved in the variance between the present and claimed boundaries.

#### Minnesota Forest Fires.

White Earth, Minn., May 14.—Heavy forest fires are raging in the pine belt about 100 miles east of the agency, and considerable damage is being done to the timber. A party of men was sent from here to save the government saw mill twenty miles east of here. They have returned, and report that the country is all on fire, and that the government saw, shingle and planing mills were destroyed by fire, despite all efforts to save the property. The men narrowly escaped with their lives. The fire cut them off from their horses and they were compelled to run about eight miles to a lake to save their lives. A number of lumber camps were also burned, with outfits, sleighs, etc. The Indians' sugar camps are burned. A heavy wind is prevailing, and if a rainfall does not come soon the whole country will be on fire.

#### The Postal Congress.

Washington, May 14.—The ways and means committee of the universal postal congress today practically completed the preliminary consideration of the amendments which have been proposed to the international treaty. In doing this they have followed the practice common in many legislative bodies of passing over informally the various amendments which it was known would give rise to any extended discussion, and have acted on such as the delegates were generally agreed on. The more important questions remaining undisposed of relate to the universal postage stamp, the proposed establishment of all branches in postal rates, and the proposition for a reduction in the pay of mails in transit.

#### Ups and Downs of Americans.

Havana, May 14.—Admiral Navarro signed yesterday the legal documents and records bearing on the cases of Ona Melton and William Leavitt, the American members of the Competitor crew, and these will be forwarded to Spain on the 20th. Eduardo Garcia, correspondent for a New York newspaper, has been arrested.

#### Commissioner Calhoun at Havana.

Havana, May 14.—William J. Calhoun, the special commissioner appointed by President McKinley to investigate the death of Dr. Ricardo Ruiz, arrived today.

#### Another Sanguinily Landing.

New York, May 14.—A Herald dispatch from Havana says: Julio Sanguinily is said to have landed on May 3 with a large expedition at San Juan de las Playas. It is also said that Roloff, with 1,000 men, was there to receive him. It is added that commanders of gunboats patrolling that coast have been placed under arrest for not preventing the landing of Sanguinily. San Juan is ten leagues east of Sagua. The insurgents are numerous and active in that district.

## Chronic Rheumatism.

### The Patient Had Suffered for Over Thirty Years and Now Enjoys Perfect Health.

From the Industrial News, Jackson, Mich. The Industrial News, ever on the alert to bring its readers all items of interest, learned of the entire cure of one of Jackson county's prominent citizens, Mr. Lorenzo Neeley, of Liberty township, who had suffered with the twangs and pangs of rheumatism for over thirty years.

In order to give authentic facts, an Industrial News representative interviewed Mr. Neeley and elicited the following facts:

Mr. Lorenzo Neeley is 56 years of age, and actively engaged in farming. When 17 years old by an unfortunate accident he hurt his shoulder, and a few years after that he commenced to have rheumatic pains in his shoulders. This would not always trouble him, but on taking a slight cold or the least strain, or sometimes without any apparent cause the trouble would start again and he would suffer the most excruciating pains.

For over thirty years he has thus suffered, and for the last decade has suffered continually so that he was unable to do any work. To this the frequent occurrences of dizzy spells were lately added, making him almost a helpless invalid.

He tried the best physicians but without getting any help, and has tried several specific rheumatic cures, but all without any appreciable relief. About one year and six months ago he read in the Jackson Industrial News of a case somewhat similar to his which was cured by the use of Dr. Williams' Pink Pills for Pale People, and he concluded to try this remedy.

After the first box he felt somewhat better, and after taking three boxes the pains entirely disappeared and the dizziness left him, and he has now for over a year been entirely free from all his former trouble and enjoys better health than he has had since his boyhood.

Mr. Neeley is loud in his praises of Dr. Williams' Pink Pills for Pale People, and will gladly corroborate the above statements. His postoffice address is Lorenzo Neeley, Horton, Jackson county, Michigan.

Dr. Williams' Pink Pills for Pale People contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are also a specific for troubles peculiar to females, such as suppressions, irregularities and all forms of weakness. They build up the blood, and restore the glow of health to pale and sallow cheeks. In men they effect a radical cure in all cases arising from mental worry, overwork or excesses of whatever nature. Pink Pills are sold in boxes (never in loose bulk) at 50 cents a box or six boxes for \$2.50, and may be had of all druggists, or direct by mail from Dr. Williams' Medicine Company, Schenectady, N. Y.

All Fools' day is 200 years old. Brady's Clavis calendaria, published in 1812, mentions that more than a century previous the almanac designated the first of April as "All Fools' Day."

## Gladness Comes

With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

## WEEKLY MARKET LETTER.

### Downing, Hopkins & Company's Review of Trade.

The wheat market was very dull during the past week. On Saturday a speculative demand sprung upon a "tip" that the coming government report on growing winter wheat would show a decline in condition of about 5 points and have a tendency to enhance values.

The slow demand from abroad for our wheat is especially discouraging, as the inquiry is below anything figured early in the season, on this side of the Atlantic or on the other. When the figures of total production were first compiled the only question that agitated speculators was the problem of how the world was going to get along with so light supply, without prices advancing to a point that would turn enough consumption to substitutes for wheat, to make the less quantity of it do for the whole crop year. Most people thought then that nothing short of 90c to \$1 a bushel would do it. There is where the mistake seems to lie. About 75c in the primary markets turned away enough wheat bread eaters to substitute to lengthen sufficiently the supply, for all practical purposes. Even at the moderate prices prevailing last week, this country's foreign shipments were away under 2,000,000 bushels. The low price of corn at 25c, of rye at 33c, barley at 25c, and oats at 18c are particularly attractive to the practical economist who supplies the family table, in these times, when so many are idle or in a state bordering upon idleness. The official wheat yield in this country was something of an error, but the usual commercial reckoning was not much astray. The fault of calculation seems to be in the price that would turn so many consumers to the cheaper cereals.

## DON'T TRUST IT.

Because the weather is mild and the air balmy we cannot count on being rid of rheumatism or neuralgia. The very sudden changes of temperature or exposure to draughts are both likely to increase rather than diminish both complaints. For this reason it is wise at this season to be well prepared for sudden attacks, and to have ready what is known as the best remedy for all visitations of aches or pains. All well regulated households ought to have a nook or corner for a bottle of St. Jacobs Oil. There are other reasons also why this Master-cure should be kept at hand; rheumatism and neuralgia are chronic, acute or inflammatory, but to whatever degree of suffering they may come, the old reliable cure is the best for treatment and the surest to give permanent relief.

#### PHYSICIANS WISE IN THEIR GENERATION.

The above class of scientists recognize and have repeatedly borne testimony to the efficacy of Hostetter's stomach Bitters as a remedy and preventive of fever and ague, rheumatism, want of vigor, liver complaint, and some other ailments and infirm conditions of the system. Experience and observation have taught them its value. They but echo the verdict pronounced by the public and the press. Only the benighted now are ignorant of America's tonic and alterative.

## Eczema All Her Life.

Mr. E. D. Jenkins, of Lithonia, Ga., says that his daughter, Ida, inherited a severe case of Eczema, which the usual mercury and other remedies failed to relieve. Year by year she was treated with various medicines, external applications and internal remedies, without result. Her sufferings were intense, and her condition grew steadily worse. All the so-called blood remedies did not seem to reach the disease as at all, when S.S.S. was given, and an improvement was at once noticed. The medicine was continued with favorable results, and now she is cured sound and well, her skin is perfectly clear and pure and she has been saved from what threatened to blight her life forever. S.S.S. (guaranteed purely vegetable) cures Eczema, Scrofula, Cancer, Rheumatism, or any other blood trouble. It is a real blood remedy and always cures even after all else fails.
