

WAR WOULD BE WELCOME

Spaniards in Cuba Want Present Strain Relieved.

THE SUSPENSE IS KILLING

Officers Urge the Government to Demand an Ultimatum of the United States Regarding Maine Disaster at Once.

New York, March 3.—The Spanish government officials in Cuba are praying for relief from a strain which they cannot endure much longer. It is not encouraging when officers of high rank in the army who deplore the Maine catastrophe as deeply and as sincerely as do the American people, beg to demand that if the United States "intends" to make the disaster a cause for going to war, it shall do so quickly, says the Havana correspondent of the Tribune.

These expressions do not represent the settled convictions of those by whom they are uttered. They are utterances of men overburdened with anxiety and uncertainty. In their calmer moments these officers would be the first to accept the mediation of the United States as the best means of helping Spain out of her desperate situation in Cuba. Under the present strain they do not accept it. They complain that the thorough and comprehensive investigation which the naval court of inquiry is making is too slow, and they profess to believe that instead of conducting an impartial investigation to learn the facts, the court is trying to make out a case of foul play.

There are representatives of the military arm of the government, who do not believe anything of the kind. They only talk to relieve their overburdened minds. If the clouds which the Maine disaster has thrown over the relations of Spain and the United States were cleared away the international complications would not be lessened. The loss of the American warship and its crew had nothing to do with the series of minor military successes which the insurgents are gaining in all parts of the island. That is due to the demoralization of the Spanish troops. Gomez keeps almost within range of the railroad and telegraph in Santa Clara province. He could not do so if Spain was able to carry on an effective campaign.

The so-called crisis in the autonomist cabinet is another thing which the United States has nothing to do. The crisis is not a dangerous one, because Govin and his radical colleagues have the support of the Sagasta ministry. Galvez, Montero and Zayas, who are all that remain of the conservative autonomists, may not endorse the plan to open negotiations with the insurgents and to offer Gomez a place in the Cuban government, but their resignations are not expected. The Sagasta ministry approves the scheme of making further concessions to the insurgents, and with this knowledge members of the autonomist cabinet who disapprove it are likely to be passive. The junta in New York has already rejected the propositions. That is not so important as the repudiation of them which will come from Gomez. Then nothing will remain for the government of Spain except to confess the failure of autonomy and more than autonomy to restore peace and save her sovereignty in Cuba. The confession cannot await the election of the cortes in April.

LOUD POSTAL BILL.

Much Opposition Removed by the Latest Amendment.

Washington, March 3.—The house today entered upon the consideration of the Loud bill, relating to second-class mail matter. The bill is identical with the bill passed by the last congress, but Loud, its author, gave notice of an amendment permitting the transmission, at pound rates, of sample copies, up to 10 per cent of the bona fide circulation of the newspaper or periodicals. This amendment removes much opposition to the bill. Three speeches were delivered today. Loud made an exhaustive speech in its favor, claiming that the government practically paid a subsidy of \$20,000,000 to the proprietors of publications, which now get access to the mails at pound rates, as the cost of transporting mail, and its handling averaged 8 cents per pound. Moon, of Tennessee, spoke in opposition to the bill, and Perkins, of Iowa, in favor of it.

The senate passed the Bacon resolution for the erection, in some suitable place in the capitol, of a bronze memorial tablet commemorative of the officers and sailors who lost their lives in the Maine disaster. Before the resolution passed, Perkins made an eloquent speech in its support and in eulogy of the American navy.

Hour endeavored to have a conference committee appointed on the bankruptcy bill, but Stewart talked until 2 o'clock, when the Alaskan right of way and homestead bill came up under the regular order. Rawlins resumed his speech opposing the bill.

Washington, March 3.—The subcommittee appointed by Chairman Walker of the house banking and currency committee to draft a currency-reform measure for submission to the Republican members of that committee, have been at work for 10 days, and have practically agreed upon the fundamental principles to be embodied in a bill, and their labors will result in reporting a complete bill to their colleagues, though they refuse to divulge the points of their measure.

WEEKLY MARKET LETTER.

Trade Conditions in the Leading Cities of the World.

It begins to look as if Leiter, for all his impudence in ignoring the advice of Tom, Dick, Harry and other old time speculators, knew something about running a wheat deal. Where wheat will get to is beyond anybody's ken. Armour says there is no reason why it should not be put to \$1.50. He adds he is a believer in high prices for another year. Leiter talks \$1.25. No human being can forecast a market with certainty, for it would be no market if such a thing were possible. Leiter appreciates this or he would not now be marketing his cash holding. The speculators with widest experience agree that the Leiter control is as complete as anything human could be. There has never been a time, though, and never will be, when there are not contingencies enough about the wheat situation to keep it exciting. The Leiter wheat interest continues larger than any that ever existed before. It was deemed extraordinary early in February that he should extend his purchases into May. He has not stopped at that. He has gone into July. His risks on his cash lines in the pit have been reduced by his recent sales, but his line in the pit have been increased. The whole effort has been of late to cheapen the average holding, and it would look as if success had attended that. Leiter has lost more or less wheat on "calls." What he has done in the pit is mere guess work. The "talent" believe his May line a very commanding one, somewhere between 5,000,000 bushels and 10,000,000 bushels. His accumulations of July wheat last week might easily have reached 2,500,000 bushels, perhaps double that. The figures seem grandiose. Leiters' ideas of quantities are, however, different from the ordinary trades. It will be no exaggeration, in the estimation of any professional in this market, to put Leiter's interest, with all his recent cash sales, at 23,000,000 bushels. His present profits, on paper, must be astounding, easily \$2,000,000, perhaps double that. If Leiter continues to be favored to the end as he has been in the past the story of his huge wheat operations will read like an oriental one, the plans too magnificent, the results too extraordinary to be everyday.

Portland Market.

Wheat—Walla Walla, 74@75c; Valley and Bluestem, 77@78c per bushel. Flour—Best grades, \$3.85; Graham, \$3.80; superfine, \$3.25 per barrel. Oats—Choice white, 36@37c; choice gray, 33@34c per bushel. Corn—Whole, \$23; cracked, per ton, \$23; feed meal, \$23 per ton. Barley—Rolled or ground, per ton, \$23; whole, \$22. Hay—Puget sound, new, per ton, \$12@14; Eastern Washington timothy, \$15; alfalfa, \$19. Fresh Meats—Choice dressed beef, steers, 7 1/2c; cows, 6 1/2c; mutton sheep, 8 1/2c; pork, 6 1/2c; veal, small, 8c. Fresh Fish—Halibut, 6@7c; salmon, 3c; salmon trout, 10c; sounders and sole, 3@4c; ling cod, 4@5c; rock cod, 5c; smelt, 2 1/2 @ 4c. Fresh Fruit—Apples, 50c@51.75 per box; pears, 25@76c per box; oranges navel, \$2@3 per box.

San Francisco Market.

Wool—Nevada 11@13c; Oregon, 12@14c; Northern 7@8c per pound. Hops—12 1/2 @ 17 1/2c per pound. Millstuffs—Middlings, \$22@25; California bran, \$17.50@18.50 per ton. Onions—silverskin, \$2.50@2.75 per cental. Eggs—Store, 11@11 1/2c; ranch, 11 1/2 @ 12 1/2c; Eastern, 18@19; duck, 14c per dozen. Cheese—Fancy mild, new, 10 1/2c; fair to good, 7@8c per pound. Butter—Fancy creamery, 22 1/2c; do seconds, 21c; fancy dairy, 20c; good to choice, 18@19c per pound. Fresh Fruit—Apples, 25c@31.25 per large box; grapes, 25@40c; Isabella, 60@75c; peaches, 50c@61c; pears 75c; plums, 20@35c.

DUNHAM'S STORY.

Interesting Report of a Government Official on the Klondike.

Located in Circle City, 180 miles northwest of Dawson, which all the river traffic to and from the Klondike passes, is the man whom the United States government has sent out to gather information regarding the Klondike which the public may know is accurate—Samuel C. Dunham. Mr. Dunham is under the direct jurisdiction of the commissioner of labor at Washington. All the long winter months he has lived in a room in a \$20,000 house at Circle City, a house that is made of logs and boards, and whose real worth seems preposterous.

Mr. Dunham has sent some valuable information to Washington—or to the United States, as he puts it. While Alaska is a part of the United States you never would think so if you lived there and heard the people talk. They always refer to the rest of the nation as: "Back in the States."

It is safe to say that of the thousands already en route to the new Eldorado only a small percentage are actually aware of the real conditions that exist in the land of their destination. As gorgeous pictures of wealth have been painted for their edification as imagination could devise, and that is why the cold facts that have come to us by the aid of carrier, dog and sledge, and finally the United States mail, create something of a feeling of astonishment. Mr. Dunham tells us that there is not work for the people who are already in the Klondike, and that before the spring rush is half over the country will teem with the destitute and homeless. However, the destitution is not now so great as it was imagined to be the case, and this because it has been found possible for the different camps to help one another.

When Mr. Dunham's report, which is now on its way, reaches Washington, it will be sent to congress at once, but owing to the fact that the report is not likely to reach the department before March, after the Klondike emigration has passed flood tide, Mr. Dunham has deemed it best to forward the more important facts here present-d. In his latest letter to the Commissioner of Labor Mr. Dunham says:

"I am making fair progress on my report, and have reached a point where I can give an outline of its practical features. I have completed an introduction, giving a short sketch of the stamped as I saw it from the other side of the mountains; a chapter on the Klondike containing the first accurate account of the original discovery and the development of the mines, and what I hope will prove an approximately correct statement of the output (an exceedingly hard subject to handle); a chapter on Dawson and its surroundings, giving full information relative to wages, cost of living, opportunities for employment, etc., and ending up with an account of the food famine and the exodus, and a chapter on navigation of the Yukon.

"I have well under way a chapter on Circle City and the Birch Creek district, and have all necessary data for one on mining laws and local regulations, incidentally touching on the only form of government that has been known here previous to the present year—miners' meetings. In addition to these I shall give considerable space to the trails and the best means of getting here, expense, etc.; the best routes for railroads, which we assume are bound to come within a few years, although we do not know what is going on outside; the possibilities in agriculture, which are considerable in the Yukon valley, as wheat, oats, and vegetables of many kinds can be grown here successfully; the outlook from the commercial point of view, etc.

"A thousand pages could be written on the situation without exhausting the subject or the reader; but I shall stop short of 400 typewritten pages. It is exceedingly difficult to get information here, on account of the great distances and the unsettled condition of the public mind on the food question. It is hard to work when one hears constantly on every hand stories of starvation and death from exposure. I consider the situation grave, but not desperate. There is food at Fort Yukon for 600 more men than are wintering there, and this can be freighted to Dawson or part of Dawson can go to it. It may be that the transportation companies can feed the population next year, but it is doubted here.

"I have secured an accurate statement of the amount of freight landed in Dawson by the steamers during the season, made up from the manifests of the boats and from information obtained from the agents of the companies. Less than 2,700 tons reached there, and between 700 and 800 tons of this consisted of furniture, whisky, hardware, etc.—and less than 2,000 tons of this consisted of furniture, whisky, hardware, and much of it was consumed during the summer. Prices are increasing in Dawson, flour selling for \$150 a hundred and many more other staples in proportion. Luxuries are not quoted, simply commanding what a man feels disposed to pay for them. Dogs have sold as high as \$500 apiece there, and \$300 has been offered and refused here.

"Our mail carrier is still here, stranded—without dogs or provisions to get out. The government pays \$600 for a trip that costs \$2,500. Nobody blames the poor carrier, but everybody blames the government and the contractors. I send this out by private parties.

"I am well and strong. The weather is fine, the coldest to date being 25 below zero. Two feet of snow on the ground. The sun rises at 10 and sets at 2, giving us seven or eight hours daylight. Moon swings in the heavens all night, giving a light by which one could read a newspaper if it was to be had. The trails are open and men are starting out in every direction with their dog teams—to Fort Yukon for freight; to Birch creek mines, to drift, and to Dawson and thence to Juneau."

ALASKA BREAD

How to Prepare the "Staff of Life," by a Practical Miner.

Bread in Alaska means always baking powder bread or biscuit, for no other kind is possible. There is no yeast or any other means of raising dough. An experienced miner, one who has been in Alaska five years, has just given us two of his most useful receipts.

Those who think of going to the Klondike should keep them, and those who stay at home will be interested in knowing how a practical miner prepares his "staff of life."

Bread: quart of flour, two tablespoonfuls of Cleveland's baking powder, half a teaspoonful of salt; mix up with cold water or milk until stiff. Grease the pan, bake until cooked (about half an hour).

Biscuit: quart of flour, two teaspoonfuls Cleveland's baking powder, and half a teaspoonful of salt. Mix thoroughly while dry with lard or bacon fat. Then mix with water or milk until stiff enough to roll out. Cut into circles with top of baking powder can or cup; bake about fifteen minutes.

Several other Alaska receipts together with lists of groceries, clothing and supplies to take with one are published in a Klondike circular. This circular, together with a cook book of four hundred receipts, will be mailed you free if you send stamp and address to Cleveland Baking Powder Co., 81 Fulton St., New York.

Be sure to mention the Klondike circular if you want it; otherwise the cook book only will be sent.

Knob on the Pocket.

Pockets of garments may be safely closed by a new invention, consisting of a wire frame similar to pocketbook frames to be sewed into the ordinary knob catch.

Wales is the richest part of Great Britain in mineral wealth. England produces annually about \$10 to each acre, Scotland a little less than \$10. The product of Wales amounts to over \$20 per acre.

A WEAK SPOT.

A weak spot in a piece of timber may endanger a whole building, and certain it is that the man who suffers with lumbago lets down the whole framework of his anatomy. In case of the building, it is shored up and made strong, and just so St. Jacobs Oil shores up the muscles of the back, strengthens the muscular frame and in a very short time the sufferer is restored to his native strength. Why then will a man go about on crutches for months and years, when the stimulation of a good liniment like St. Jacobs Oil will in so short a time send him back to business and to the bosom of his family a strong and healthy man.

Iceland's geysers never shoot their water higher than 100 feet, while some of our Yellowstone geysers go more than three times as high.

NEWS FOR THE WHEELMEN.

The League of American Wheelmen numbers nearly 2,000 below the 100,000 mark within the last few weeks. In spite of this startling diminution, the maximum of health may be attained by those who use the comforting and thorough tonic, Hostetter's Stomach Bitters, which promotes digestion, a healthy flow of bile, regularity of the bowels, and cures kidney trouble. It is, moreover, a remedy for and preventive of malaria and rheumatism.

The cologne of a sovereign (about \$5) costs the English mint 3/4d (about 1 1/2 cents).

SHAKE INTO YOUR SHOES.

Allen's Foot-Ease, a powder for the feet. It cures painful, swollen smarting feet and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for chilblains, sweating, damp, itching and hot, tired aching feet. We have over 10,000 testimonials of cures. Try it today. Sold by all druggists and shoe stores. By mail for 25c. In stamps. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y.

There are parts of the Ganges valley in India where the population averages 1,200 to the square mile.

HOME PRODUCTS AND PURE FOOD.

All Eastern syrup, so-called, usually very light colored and of heavy body, is made from glucose. "Tea Garden Syrup" is made from Sugar Cane and is strictly pure. It is for sale by first-class grocers, in cans only. Manufactured by the Pacific Coast Syrup Co. All genuine "Tea Garden Syrup" have the manufacturer's name lithographed on every can.

The fastest flowing river in the world is the Sutlej, in British India, with a descent of 12,000 feet in 18 miles.

CATARH CAN BE CURED.

With local applications, as they cannot reach the seat of the disease, Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Sent for testimonials, free.

The czar's New Cruiser.

The official trials of the cruiser Svetlana, built at Zaire, France, for the Russian government, have just taken place. The contract speed of 20 knots was exceeded by 21-100ths in trials which lasted six consecutive hours. Work on the Svetlana was begun on December 7, 1898. She is an armored cruiser, armed with guns and torpedo tubes, and at the same time is a yacht. She is officially intended for the use of the Grand Duke Alexis, grand admiral of the Russian navy. The Svetlana's armament consists of 10 guns, six Canet cannon of 15 centimeters and ten quick-firing 47 millimeter guns. The grand duke visited the yacht and expressed himself as extremely satisfied. The cost is 8,000,000 francs, or about \$1,300,000.

Gallop Proof Bridge.

The new Milan bridge at Topaka is one of the new structures of the kind in the country that will not have a sign above it reading in this way: "Five dollars' fine for riding or driving across this bridge faster than a walk." One of the tests given the bridge was running teams across it at breakneck speed. No limit is to be placed upon the speed of vehicles except the same as over the streets.—Kansas Journal.

Printing Device on Scales.

A handy attachment for weighing scales consists of a printing register attached to a sliding weight on the scale beam, the figures on the beam being raised to be inked and print a card by the impression of a lever attached to the mechanism.

A Wonderful Statement

From Mrs. J. S. McGinnis, of 115 Kilburn Avenue, Rockford, Ill.

"I was dreadfully ill—the doctors said they could cure me, but failed to do so.

"I gave up in despair and took to my bed. I had dreadful pains in my heart, fainting spells, sparks before my eyes, and sometimes I would get so blind I could not see for several minutes. I could not stand very long without feeling sick and vomiting.

I also had female weakness, inflammation of ovaries, painful menstruation, displacement of the womb, itching of the external parts, and ulceration of the womb. I have had all these complaints.

"The pains I had to stand were something dreadful. My husband told me to try a bottle of Lydia E. Pinkham's medicine, which I did, and after taking it for a while, was cured."

Electric Life

It Cures You While You Sleep. It makes weak people strong by invigorating the nerves and organs, storing fresh energy in the vital parts and renewing the healthy action of all parts of the body.

Stop drugging, and try this new and certain cure. Book, "Three Causes of Men," free upon application. Call or address: SANDEN ELECTRIC BELT CO., 258 West Washington St., Portland, Or. Please mention this paper.

FERRY'S SEEDS

In buying seeds, economy is extra gain. The highest degree of cultivation used on inferior seeds always largely exceeds the original cost of the seed and several seeds to be lost. The best is always the cheapest. Pay a trifle more for FERRY'S SEEDS. Five cents per paper everywhere. Always the best. Seed Annual free. D. M. FERRY & CO., Detroit, Mich.
